Juillet 1985

## Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Employment, earnings and hours,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9900) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(973-6586)	Vancouver	(666-3691)
Credit Card only (973-8018)			

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

Newfoundland and Labrador	Zenith 0-7037
Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192
Quebec	1-800-361-2831
Ontario	1-800-268-1151
Manitoba	1-800-282-8006
Saskatchewan	1(112)800-667-3524
Alberta	1-800-222-6400
British Columbia (South and Central)	112-800-663-1551
Yukon and Northern B.C. (area served by NorthwTel Inc.)	Zenith 0-8913
Northwest Territories (area served by NorthwTel Inc.)	Zenith 2-2015

## How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, K1A 0T6.

1(613)990-8114  
1(613)990-8115

## Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Emploi, gains et durée du travail,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-9900) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(973-6586)	Vancouver	(666-3691)
Carte de crédit seulement (973-8018)			

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, aux **utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres régionaux de consultation.

Terre-Neuve et Labrador	Zenith 0-7037

## Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

## Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

## EXPLANATION OF CHANGES

Effective with the June 1985 issue, the following tables no longer appear in *Employment, Earnings and Hours*, Catalogue 72-002:

Table 4.	Number of Employees by Industry, Urban Areas
Table 7.	Weekly Earnings, Urban Areas
Table 8.	Weekly Overtime Earnings, Canada
Table 9.	Weekly Overtime Earnings, Provinces
Table 10.	Weekly Overtime Earnings, Urban Areas
Table 13.	Hours and Hourly Earnings, Urban Areas
Table 14.	Employment, Earnings and Hours for Take-some Units
Table 19.	Number of Employees and Average Weekly Earnings by Urban Areas and by Position in Order of Earnings

These changes result from a requirement to introduce more realistic pricing of publications based on the principle that direct costs of making information available to specific users should be borne by those users. In order to maintain a reasonable price structure while continuing to satisfy the majority of demands from the user community only the most frequently used and most reliable data were retained.

Data for urban areas were removed mainly because of their variability. The survey from which the data are derived was not designed to produce estimates of a pre-specified degree of reliability at sub-provincial levels. Furthermore, the urban area component is not considered when selecting the sample. Data for Take-some units were removed for similar reasons. Weekly overtime earnings can be derived using average weekly earnings including and excluding overtime.

These data will still be available to users on request. For further information on obtaining unpublished data please contact Jack Beauregard or Renée Arsenault at 613-990-9900. The data also remain available on the Canadian Socio-Economic Information Management System (CANSIM) with the addition of a cautionary note concerning the reliability of urban area data. Users interested in accessing data via CANSIM should contact one of Statistics Canada's regional reference centres at the numbers listed on the inside front cover of this publication or contact CANSIM directly at 613-991-1150.

The remaining statistical tables have been re-numbered as a result of the changes noted above: a conversion from old to new table numbers is contained in the table of contents which follows this note.

Table titles have been modified to provide a clearer description of the data presented. The word "estimated"

## EXPLICATION DES CHANGEMENTS

Depuis l'édition du mois de Juin 1985 les tableaux suivants n'apparaissent plus dans *Emploi, gains et durée du travail*, n° 72-002 au catalogue:

Tableau 4.	Nombre de salariés par activité économique, régions urbaines
Tableau 7.	Rémunération hebdomadaire, régions urbaines
Tableau 8.	Rémunération hebdomadaire pour travail supplémentaire, Canada
Tableau 9.	Rémunération hebdomadaire pour travail supplémentaire, provinces
Tableau 10.	Rémunération hebdomadaire pour travail supplémentaire, régions urbaines
Tableau 13.	Heures hebdomadaires et rémunération horaire, régions urbaines
Tableau 14.	Emploi, rémunération et durée du travail pour les unités à tirage partiel
Tableau 19.	Nombre de salariés et rémunération hebdomadaire moyenne par régions urbaines, selon leur rang de rémunération

Ces changements résultent d'un besoin de fixer des prix plus réalistes pour les publications fondé sur le principe selon lequel les coûts rattachés à la mise en disponibilité d'informations pour des utilisateurs spécifiques devraient être assumés par ceux-ci. Dans le but de maintenir une structure de prix raisonnable tout en continuant de satisfaire la majorité des besoins des utilisateurs, seules les données les plus utilisées et les plus fiables ont été retenues.

Les données pour les régions urbaines ont été supprimées de la publication principalement à cause de leur variabilité. En fait, l'enquête qui fournit ces données n'a pas été conçue pour produire des estimations sous-provinciales avec un niveau de fiabilité prédéterminé. De plus, on ne tient pas compte des régions urbaines lors de la sélection de l'échantillon. Les données pour les unités à tirage partiel ont été retirées pour des raisons semblables. La rémunération hebdomadaire pour le temps supplémentaire peut être calculée en utilisant les chiffres sur la rémunération hebdomadaire moyenne incluant et excluant le temps supplémentaire.

Ces chiffres sont encore disponibles sur demande. Pour plus d'information sur la façon d'obtenir des données non-publiées veuillez communiquer avec Jack Beauregard ou Renée Arsenault au 613-990-9900. Mentionnons aussi que l'on peut toujours obtenir ces séries du Système canadien d'information socio-économique (CANSIM), où nous avons ajouté une note sur la fiabilité des estimations. Les utilisateurs voulant obtenir des chiffres par l'intermédiaire de CANSIM doivent contacter un des centres de consultation de Statistique Canada dont les numéros de téléphone se trouvent à l'endos du couvert de cette publication ou en communiquant directement avec CANSIM au 613-991-1150.

Les tableaux qui font encore partie de cette publication ont été rénumérotés. La table des matières, à la page suivante, sert aussi de table de conversion des anciens aux nouveaux tableaux.

Les titres des tableaux ont aussi été modifiés de façon à mieux décrire le contenu de ceux-ci. On a ajouté le mot "estimation"

has been added where applicable to emphasize that data derived from a sample survey are subject to a degree of sampling error and should therefore be used with appropriate caution. For more information on the sampling methodology and on the measurement and interpretation of sampling error, consult the methodology section of this publication.

A description of the type of units used in tabulating the survey estimates has also been added. Estimates for the universe of all firms are entitled estimates for "firms of all sizes" while data for firms which are always included in the survey are entitled data for "Take-all firms". A definition of take-all firms is contained in the Concepts and Methods section of this publication.

pour rendre l'utilisateur conscient que les données sont dérivées d'une enquête-échantillon et qu'elles sont donc sujettes aux erreurs d'échantillonnage et doivent être utilisées avec précaution. Pour plus de renseignements sur la méthodologie de l'échantillonnage ainsi que sur l'erreur d'échantillonnage et la façon de la mesurer veuillez vous référer à la section Concepts et méthodes de cette publication.

Une description du type d'unités utilisé dans les totalisations de l'enquête a aussi été ajoutée. Les estimations pour l'univers des entreprises sont intitulées estimation pour les "entreprises de toutes les tailles" alors que les données pour les entreprises étant toujours incluses dans l'enquête s'intitulent données pour les "entreprises à tirage complet". Pour une définition d'entreprise à tirage complet veuillez consulter la section Concept set méthodes de cette publication.

## COMMENTARY

### Preliminary Estimates<sup>1</sup> (Unadjusted data) - July 1985

Preliminary data for July 1985 showed an estimated 9,084.8 thousand employees for the Canada industrial aggregate<sup>2</sup>, down 1.1% from June 1985. Decreases were noted in forestry (- 1.2%), transportation, communication and other utilities (- 1.3%), and community, business and personal services (- 3.0%). The mines, quarries and oil wells and construction industries increased by 1.8% and 1.9% respectively. The remaining industry groups showed no significant changes. All provinces registered decreases in employment except Newfoundland and the Yukon and Northwest Territories.

Average weekly earnings at the Canada industrial aggregate level were estimated at \$419.84 for July, virtually unchanged from \$419.81 in June. Decreases registered in forestry (- 6.0%), and community, business and personal services (- 1.1%) were offset by increases in mines, quarries and oil wells (+ 1.1%), transportation, communication and other utilities (+ 1.2%), and finance, insurance and real estate (+ 1.8%). At the provincial level the most significant changes were registered in Newfoundland (+ 1.6%), Prince Edward Island (- 1.2%), Alberta (+ 1.5%), British Columbia (- 1.2%) and the Yukon (+ 1.6%) and Northwest Territories (+ 5.4%). The remaining provinces showed little change.

<sup>1</sup> See note on "Statistical presentation" under "Concepts and Methods" at the back of this publication.

<sup>2</sup> The industrial aggregate is the sum of all industries with the exception of agriculture; fishing and trapping; religious organizations; private households and military personnel.  
Goods-producing industries comprise forestry; mines, quarries and oil wells; manufacturing and construction.  
Service-producing industries include transportation, communication and other utilities; trade; finance, insurance and real estate; community, business and personal services (except religious organizations and private households) and public administration (except military personnel).

## OBSERVATIONS

### Estimations préliminaires<sup>1</sup> (chiffres non désaisonnalisés) - Juillet 1985

Les données préliminaires pour l'ensemble des activités économiques<sup>2</sup> au Canada étaient estimées à 9,084.8 milliers de salariés, indiquant une diminution de 1.1% entre juin et juillet 1985. Des diminutions ont été notées dans les forêts (- 1.2%), les transports, communications et autres services publics (- 1.3%), et les services socio-culturels, communautaires et personnels (- 3.0%). Les mines, carrières et puits de pétrole et la construction augmentaient respectivement de 1.8% et 1.9%. Toutes les provinces ont connu des diminutions sauf Terre-Neuve, le Yukon et les Territoires du Nord-Ouest.

La rémunération hebdomadaire moyenne pour l'ensemble des activités économiques était estimée à \$419.84 pour juillet, pratiquement inchangée par rapport à \$419.81 en juin. Les diminutions enregistrées dans les forêts (- 6.0%) et dans les services socio-culturels, communautaires et personnels (- 1.1%) ont été contrebalancées par des augmentations dans les mines, carrières et puits de pétrole (+ 1.1%), dans les transports, communications et autres services publics (+ 1.2%), et dans les finances, assurances et affaires immobilières (+ 1.8%). Au niveau provincial les variations les plus importantes ont été observées à Terre-Neuve (+ 1.6%), à l'Île-du-Prince-Édouard (- 1.2%), en Alberta (+ 1.5%), en Colombie-Britannique (- 1.2%), au Yukon (+ 1.6%) et dans les Territoires du Nord-Ouest (+ 5.4%). Les autres provinces sont demeurées relativement stables.

<sup>1</sup> Voir la partie "Présentation statistique" sous la rubrique "concepts et méthodes", à la fin de cette publication.

<sup>2</sup> L'ensemble des activités économiques est la somme de toutes les industries à l'exception de l'agriculture, la pêche et le piégeage, les organismes religieux, les ménages privés et les services de défense.  
Les industries productrices de biens englobent les forêts, les mines, les carrières et puits de pétrole, les manufactures et la construction.  
La branche des services englobe les transports, les communications et autres services publics, le commerce, les finances, assurances et affaires immobilières, les services communautaires aux entreprises et personnels (sauf les organismes religieux et les ménages privés) et l'administration publique (à l'exception du personnel militaire).

## NOTE TO USERS

Effective with the January 1985 reference month, the tables in this publication contain 3 consecutive months of data. Estimates for the most recent month are preliminary.

## SOURCES FOR HISTORICAL DATA

### 1984

Data published monthly in the January to July issues of Catalogue 72-002 for the industries listed below were revised. The corrected series appear in the September 1984 issue. All variables for the "All employees" and "Salaried employees" categories for both "All and Take-All" survey units for Canada, Provinces and Territories may be affected.

Concepts and methods are described at the back of this publication.  
Les concepts et méthodes sont décrits à la fin de la présente publication.

## CONCEPTS AND METHODS

### Objectives

The Survey of Employment, Payrolls and Hours is designed to measure, on a monthly basis, the levels and month-to-month trends of employment, paid hours and earnings. These measures are compiled at detailed industrial and geographic levels.

All industries are covered by the survey with the exception of agriculture, fishing and trapping, private household services, religious organizations, and military services.

### Source of Data

The statistics contained in this report are based on information obtained through a mail survey of firms, institutions and organizations of all sizes.

The **firm** is defined as any business entity whether incorporated or not; it comprises sole proprietorships, partnerships, corporations and other forms of organization such as co-operatives. Most firms consist of only one "establishment" (see definition under Industrial Classification) but, in some cases, the firm is made up of a number of establishments which may or may not be engaged in the same kind of economic activity.

The universe for the survey is derived from a central file of employers maintained by the Business Register and Profiling Division of Statistics Canada.

### Industrial Classification

All **firms** are assigned to an industry on the basis of their principal activity. In instances where the firm is engaged in only one kind of industrial activity, the industrial classification is straightforward. Classification problems arise when a firm is active in more than one kind of classifiable industrial activity. This usually occurs when a firm operates more than one establishment. The **establishment** (typically a factory, mine, store or a similar unit) is defined, for statistical purposes, as the smallest separate operating entity capable of reporting all elements of basic industrial data which permit the calculation of "census value added" or "gross mark up" or "gross profit" as well as data on employment and payrolls.

For purposes of detailed geographical statistics, the establishment is often sub-divided into **reporting units** which, although not capable of reporting all basic industrial statistics, can report employment, payrolls and hours data for particular locations.

The industrial classification of the statistics contained in this report is based on the 1970 version of the Standard Industrial Classification. A description of the various industries and groups of industries is contained

## CONCEPTS ET MÉTHODES

### Objectifs

L'enquête sur l'emploi, la rémunération et les heures de travail a pour objet de mesurer mensuellement les niveaux et les tendances de l'emploi, des heures rémunérées et des gains. Ces mesures sont rassemblées à des niveaux détaillés selon l'activité économique et le lieu géographique.

L'enquête vise tous les secteurs de l'activité économique sauf l'agriculture, la pêche et le piégeage, le service domestique des ménages, les organismes religieux et les services de la défense.

### Source des données

Les statistiques présentées dans ce bulletin se fondent sur des renseignements recueillis au moyen d'une enquête postale menée auprès des entreprises et autres organismes ou établissements de toutes tailles.

Le terme **entreprise** désigne toute entité commerciale ou industrielle constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une société en nom collectif, d'une corporation ou d'une autre forme quelconque d'organisation, telle une coopérative. La plupart des entreprises ne comptent qu'un seul "établissement" (voir la définition sous la rubrique "Classement par activité économique") mais, dans certains cas, l'entreprise peut regrouper plusieurs établissements qui exercent ou non le même genre d'activité.

L'univers de l'enquête est établi à l'aide d'un registre central des employeurs tenu par la Division des profils et du registre des entreprises de Statistique Canada.

### Classement par activité économique

Toutes les **entreprises** appartiennent à une branche d'activité économique déterminée en fonction de leur activité principale. Si l'entreprise n'exerce qu'un seul genre d'activité économique, le classement est simple. Les problèmes surgissent lorsqu'elle en exerce plus d'un, par exemple lorsqu'elle possède plus d'un **établissement**. À des fins statistiques, on définit l'établissement (en général une usine, une mine, un magasin ou une unité semblable) comme la plus petite unité constituant un ensemble fonctionnel distinct capable de déclarer, à l'égard de l'activité économique, tous les éléments statistiques de base qui permettent de calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut", ainsi que des données sur l'emploi et la rémunération.

Pour obtenir des statistiques géographiques détaillées, souvent on subdivise l'établissement en **unités déclarantes** qui, bien qu'elles ne puissent fournir toutes les statistiques de base, sont en mesure de déclarer des données sur l'emploi, la rémunération et les heures de travail relativement à certains endroits.

Le classement des statistiques que nous présentons dans ce volume s'inspire de la Classification des activités économiques, de 1970. Vous trouverez une description de ces diverses activités et de leurs groupements dans le bulletin de la Classification

in the "Standard Industrial Classification Manual", Catalogue No. 12-501. The "S.I.C. Code" columns on the tables correspond to the codes of this manual. These tables also contain the following groupings which are not part of the "Standard Industrial Classification Manual":

- a) Industrial aggregate (031-951) represents the sum of all the industries included in the survey (see Objectives).
- b) Goods-producing industries (031-421) comprise forestry, mining, manufacturing and construction.
- c) Service-producing industries (501 to 951) consist of transportation, communication and other utilities, trade, finance, insurance and real estate, services (except for religious organizations and private households), and public administration (with the exception of military personnel, and other government services).
- d) Durable goods manufacturing (durable) includes wood industries (251-259), furniture and fixture industries (261-268), primary metal industries (291-298), metal fabricating industries except machinery and transportation equipment (301-309), machinery industries except electrical machinery (311-318), transportation equipment industries (321-329), electrical products industries (331-339), and non-metallic mineral products industries (351-359).
- e) Non-durable goods manufacturing (non-dur.) is the sum of food and beverage industries (101-109), tobacco products industries (151-153), rubber and plastic products industries (162-165), leather industries (172-179), textile industries (181-189), knitting mills (231-239), clothing industries (243-249), paper and allied industries (271-274), printing, publishing and allied industries (286-289), petroleum and coal products industries (365-369), chemical and chemical products industries (372-379), and miscellaneous manufacturing industries (391-399).
- f) Building construction (404, 421) comprises building construction (404) and special-trade contractors (421).
- g) Industrial and Heavy (Engineering) construction (406, 409) includes highway, bridge and street construction (406) and other construction (409).
- h) Education services (809T) consist of kindergartens and nursery schools (801), elementary and secondary schools (802), schools of arts and performing arts (803), vocational centers, trade schools and business colleges (804), post-secondary non-university educational institutions (805), universities and colleges (806), and education and related services (809).
- i) Public administration (909-951) contains only the establishments engaged in activities that are gov-

des activités économiques, n° 12-501 au catalogue. Les codes C.A.É. qui apparaissent dans les colonnes de certains tableaux de notre publication correspondent au codes de ce bulletin. Les tableaux en question renferment aussi les groupes suivants, qui ne figurent pas dans la Classification des activités économiques:

- a) Ensemble des activités économiques (031-951) — Il s'agit de la somme des diverses activités économiques visées par l'enquête (voir objectifs).
- b) Branche productrice de biens (031-421) — Ce groupe englobe les forêts, les mines, les manufactures et la construction.
- c) Branche des services (501-951) — Englobe les transports, les communications et autres services publics, le commerce, les finances, assurances et affaires immobilières, les services (sauf les organismes religieux et les ménages privés), et l'administration publique (à l'exception du personnel militaire et des autres services gouvernementaux).
- d) Fabrication des biens durables (durables) — Englobe les industries du bois (251-259), l'industrie du meuble et des accessoires d'ameublement (261-268), l'industrie de première transformation des métaux (291-298), l'industrie des produits métalliques (sauf les machines et le matériel de transport) (301-309), la fabrication des machines (sauf le matériel électrique) (311-318), l'industrie du matériel de transport (321-329), l'industrie des appareils et du matériel électriques (331-339) et l'industrie des produits minéraux non métalliques (351-359).
- e) Fabrication des biens non durables (non dur.) — Englobe l'industrie des aliments et boissons (101-109), l'industrie du tabac (151-153), l'industrie du caoutchouc et des produits en matière plastique (162-165), l'industrie du cuir (172-179), l'industrie textile (181-189), la bonneterie (231-239), l'industrie de l'habillement (243-249), l'industrie du papier et des produits connexes (271-274), l'imprimerie, l'édition et industries connexes (286-289), l'industrie du pétrole, du charbon et de leurs dérivés (360-369), l'industrie chimique et des produits connexes (372-379), et les industries manufacturières diverses (391-399).
- f) Bâtiment (404, 421) — Englobe la construction de bâtiments (404) et l'activité des entrepreneurs spécialisés (421).
- g) Construction industrielle et lourde (travaux de génie) (406, 409) — Englobe la construction de routes, ponts et rues (406) et autres constructions (409).
- h) Enseignement et services connexes (809T) — Englobe les jardins d'enfants et écoles maternelles (801), les écoles primaires et secondaires (802), les écoles de beaux-arts (803), les centres de formation professionnelle, écoles de métiers et collèges commerciaux (804), les établissements d'enseignement postsecondaire non universitaire (805), les universités et collèges (806), et l'enseignement et services connexes (809).
- i) Administration publique (909-951) — Comprend les établissements dont les activités ont un caractère essentiellement

ernmental in character and those serving as internal service agencies of the public service. Government owned establishments primarily engaged in activities assigned to other industries are classified in those industries along with similar establishments owned by non-government bodies. Therefore, data included in this industry division do not represent the actual number of persons employed by government at any level.

## Geographic Classification

Reporting units are assigned to a province, a census division, an economic region (for the province of Quebec and Ontario) and, where applicable, to a metropolitan or urban area. The survey selected metropolitan and urban areas as delineated for the 1981 Census of Population; these areas usually consist of the urban centre as well as the surrounding territory and had a population of 25,000 inhabitants or more. The reporting units not located in a tabulated urban area or not allocated to a compiled census division are included in the provincial and national totals.

A description of the various geographical areas is contained in the "Standard Geographical Classification Manual, 1981", Catalogue No. 12-567.

## Definitions

### 1. Reference Period

Conceptually, the data in this report refer to the last seven days in the specified month. In practice, few firms keep payroll records covering precisely this period. Therefore, firms are asked to report for their last pay period or pay periods in each month. When the reported pay period is longer than one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period.

If, owing to **strikes**, unpaid holidays or other similar unpaid circumstances, the data reported are not representative of the last seven days of the month, adjustments are made to reflect the economic situation of the reference period (i.e. when a strike effects the last seven days of the survey month, the derived data will reflect the strike situation).

### 2. Employee

All persons drawing pay for services rendered or for paid absences and for whom the employer is required to complete a Revenue Canada T-4 Supplementary Form constitute employees.

gouvernemental, et les organismes auxiliaires assurant les services internes de l'État. Les établissements publics dont l'activité dominante relève d'autres activités économiques sont classés sous les mêmes rubriques que les établissements privés semblables. Ainsi, les données publiées pour cette division économique ne représentent pas le nombre réel de personnes employées par les différents pouvoirs publics.

## Classement géographique

On attribue les unités déclarantes à une province, à une division de recensement, à une région économique (pour les provinces suivantes: Québec et Ontario) et, s'il y a lieu, à une région métropolitaine ou urbaine. Les régions métropolitaines et urbaines choisies pour l'enquête sont celles du recensement de la population de 1981; ces régions, qui se composent habituellement d'un centre urbain et du territoire environnant, comptaient lors du dernier recensement 25,000 habitants ou plus. Les unités déclarantes situées en dehors de toute région urbaine indiquée dans les tableaux, ou non attribuées à une division de recensement prise en compte, font partie des totaux provinciaux et nationaux.

La description des diverses régions géographiques se trouve dans la "Classification géographique type, 1981", numéro 12-567 au catalogue.

## Définitions

### 1. Période de référence

En théorie, les données sur l'emploi se rapportent aux sept derniers jours du mois de référence. Dans la pratique, peu d'entreprises tiennent des registres de paye pour cette période précise; on demande donc aux répondants de faire porter leur déclaration sur la(les) dernière(s) période(s) de paye de chaque mois. Lorsque la période de paye sur laquelle porte la déclaration dépasse une semaine, on rajuste les données en divisant le nombre de jours d'activité hebdomadaire de l'entreprise par le nombre de jours ouvrables compris dans la période de paye sur laquelle porte la déclaration.

Si, en raison d'une **grève**, d'un congé non payé ou d'autres circonstances semblables, les données déclarées ne sont pas représentatives des sept derniers jours du mois, on procède aux rajustements qui s'imposent afin de traduire la situation qui régnait pendant la période de référence (cela signifie que lorsqu'une grève touche les sept derniers jours du mois d'enquête, les données qui en découlent reflètent l'état de grève).

### 2. Salarié

Toute personne rétribuée pour ses services ou ses absences et pour laquelle l'employeur doit remplir une déclaration T-4 Supplémentaire de Revenu Canada, est un salarié.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment) and casual or temporary employees (those who are hired for discontinuous periods or on an irregular basis). It also comprises working owners, directors, partners and other officers of incorporated businesses.

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self-employed, unpaid family workers, persons doing non-remunerative work, pensioners, home workers, members of elected or appointed bodies, persons working outside Canada, military personnel and persons providing services to an establishment on a contract basis. It also excludes persons who did not receive any pay from the employer for the entire survey reference period (e.g. persons on strike, persons on unpaid holidays, persons receiving remuneration from an insurance, Workmen's Compensation or other related fund, etc.); however, employees paid from the employer for a part of the reference period and unemployed or on strike for the rest are counted as employed.

The employees are classified into the following categories:

- a) **Employees paid by the hour**  
Any employee whose basic wage is expressed as an hourly rate.
- b) **Salaried Employees**  
Any employee whose basic remuneration is a fixed amount for a period of at least one week.
- c) **Other Employees**  
Those employees whose basic remuneration is in the form of commissions, piece rates, mileage allowances, etc.
- d) **Non-teaching Staff**  
All employees other than teachers and academic staff, i.e. president, vice-president, librarian, registrar, bursar, accountant, guidance counsellor, laboratory technician, personnel officer, and other services (e.g. janitor, caretaker, bus driver, etc.)
- e) **Teaching Staff**  
Those classified as teachers, instructors or academics in the payroll records (e.g. principal, professor, dean, head of department, master, teacher, etc.) whether they teach during the day or evening. Supply or substitute teachers are excluded.
- f) **Supply or Substitute Teachers**  
Teachers who are called in to teach whenever their services are needed either to augment

Le terme "salariés" désigne les salariés à temps plein, les salariés à temps partiel (ceux qui travaillent régulièrement un nombre d'heures inférieur à la semaine normale de travail de l'entreprise) et les salariés occasionnels ou temporaires (ceux qui sont embauchés de façon irrégulière ou temporaire). Il désigne aussi les propriétaires, les administrateurs, les associés et les autres dirigeants actifs des entreprises constituées en corporation.

Le concept de salarié exclut les propriétaires et les associés des entreprises non constituées en corporation et ceux des bureaux voués à l'exercice d'une profession libérale, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les retraités, les travailleurs à domicile, les membres des corps élus ou nommés, les personnes travaillant à l'extérieur du Canada, le personnel militaire et les personnes fournissant des services à un établissement sur une base forfaitaire. Sont également exclus les travailleurs n'ayant pas reçu de paye de leur employeur pendant la période de référence de l'enquête (i.e. les personnes en grève, en congé non payé, celles recevant une rémunération aux termes d'un régime d'assurance, d'une caisse d'indemnisation des accidents au travail ou d'une caisse analogue, etc.); cependant, les travailleurs rémunérés par leur employeur pour une partie de la période de référence, mais en chômage ou en grève pendant l'autre partie, sont quand même considérés comme salariés.

Les salariés sont classés dans les catégories suivantes:

- a) **Salariés rémunérés à l'heure**  
Tout salarié dont la rémunération de base est calculée selon un taux horaire.
- b) **Employés**  
Tout salarié dont la rémunération de base constitue une somme fixe versée pour une période d'au moins une semaine.
- c) **Autres salariés**  
Tout salarié dont la rémunération de base se présente sous forme de commissions, de salaire à la pièce, d'indemnités de trajet, etc.
- d) **Personnel non enseignant**  
Tous les salariés autres que le personnel enseignant, c'est-à-dire le président, le vice-président, le bibliothécaire, le secrétaire général, l'économe, le comptable, les orienteurs, les techniciens de laboratoire, les agents du personnel, le concierge, les chauffeurs d'autobus, etc.
- e) **Personnel enseignant**  
Tout travailleur classé comme enseignant ou chargé de cours dans les dossiers du service de la paye (directeur, professeurs, doyens, chefs de département, maîtres, enseignants, etc.), qu'il enseigne le jour ou le soir. Les suppléants ou remplaçants sont exclus.
- f) **Suppléants ou remplaçants**  
Enseignants appelés à se présenter au travail lorsqu'on a besoin de leurs services soit pour accroître le

the existing staff or as a short-term replacement for a full-time or part-time teacher.

personnel existant, soit pour remplacer pendant une courte période un enseignant à temps plein ou à temps partiel.

### 3. Earnings

Earnings represent gross pay before deductions for taxes, unemployment insurance contributions, etc.

The payroll concept does not include supplementary labour costs such as employer's contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or director's fees.

#### a) Gross Pay

Gross pay includes salaries, straight-time wages, piece-work and regular commission earnings, regular paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey reference week.

#### b) Overtime Pay

All pay received for the number of hours worked in excess of the standard workday or workweek.

### 4. Hours

#### a) Total hours paid

All hours worked, including overtime hours, **plus** hours of paid absence (e.g. holidays, vacation, sick leave, jury duty, etc.)

#### b) Overtime Hours

The total hours for which overtime was paid. These represent the hours worked.

### 5. Paid Absence

Paid absence comprises paid holidays, vacation, sick leave including industrial injury and personal leave such as bereavement leave, jury duty, etc.

### 6. Standard Workweek

The hours in the standard workweek constitute the average number of hours of work normally scheduled in a workweek.

### 3. Gains

Les gains représentent la rémunération brute avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc.

Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents, ni les jetons de présence des administrateurs.

#### a) Rémunération brute

Comprend les salaires, les traitements à taux ordinaires, la rémunération du travail à la pièce et les commissions régulières, ainsi que les primes, indemnités de vie chère et autres gratifications versées régulièrement, les payes de surtemps et la rémunération des absences payées dans la semaine de référence de l'enquête.

#### b) Rémunération du temps supplémentaire

Ensemble de la rémunération versée pour le nombre d'heures de travail effectuées en sus de la journée ou de la semaine normale de travail.

### 4. Heures

#### a) Nombre total d'heures payées

Ensemble des heures travaillées, y compris les heures supplémentaires, **plus** les heures de congé (par ex., les jours fériés, les vacances, les congés de maladie, les congés pour service judiciaire, etc.)

#### b) Heures supplémentaires

Total des heures payées à un taux majoré; il s'agit d'heures réellement travaillées.

### 5. Absence payée

Les absences payées comprennent toutes les heures rémunérées dans le cas des jours fériés payés, des vacances, des congés de maladie, ainsi que des congés d'accident du travail et des congés pour motifs personnels tels que les congés de deuil et les congés pour service judiciaire.

### 6. Semaine normale de travail

Les heures d'une semaine normale de travail reflètent la moyenne des heures de travail normalement fixées pour une semaine.

## 7. Take-all and Take-some Units

Take-all units are reporting units of firms or organizations which are included in the survey sample with certainty every month. These include:

- a) All firms or organizations with 200 or more employees;
- b) All firms with more than one reporting unit;
- c) Firms which report their survey data on computer listings rather than on the standard questionnaire;
- d) Units of government departments and crown corporations;
- e) Units belonging to elementary and secondary schools;
- f) Certain other pre-specified units or firms.

Take-some units are all the other firms in the universe which have a known probability of selection.

## Methodology

The statistics contained in this publication are based on information obtained through a sample survey of reporting units. The data is collected by means of questionnaires mailed monthly to a sample of about 70,000 reporting units selected out of a universe of about 700,000. The sample covers all industries in scope for the survey, all provinces and territories and all sizes of units. Both the universe and the sample are updated monthly for births and deaths.

## Stratification

For the determination of the survey sample size and for the purpose of the sample selection, the universe of reporting units is stratified by 12 provinces and territories, 16 industry groups and 4 size groups. (An industry group is slightly more detailed than the 1-digit industry code). The size of a unit is defined to be the total number of paid employees in that unit. The four size groups are 0 to 19, 20 to 49, 50 to 199 and 200 or more employees.

The universe of reporting units is further stratified into **take-all** and **take-some** categories as defined earlier under Definitions.

## 7. Unités à tirage complet et à tirage partiel

Les unités à tirage complet sont les unités déclarantes d'entreprises ou d'organisations incluses en permanence dans l'échantillon de l'enquête. Elles comprennent:

- a) toutes les entreprises de 200 salariés ou plus;
- b) toutes les entreprises ayant plus d'une unité déclarante;
- c) les entreprises qui déclarent leurs données au moyen d'un imprimé d'ordinateur plutôt qu'à l'aide du questionnaire;
- d) unités des services gouvernementaux et des sociétés de la couronne;
- e) unités propres aux écoles primaires et secondaires;
- f) d'autres unités ou entreprises préalablement choisies.

Les unités à tirage partiel sont toutes les autres entreprises qui ont une probabilité connue de ne pas être choisies dans l'échantillon de l'enquête. Lorsqu'elles sont choisies, de telles unités sortent de l'enquête après un certain nombre de mois.

## Méthodologie

Les statistiques présentées dans cette publication se fondent sur les résultats d'une enquête effectuée par sondage auprès d'unités déclarantes. Les données sont recueillies au moyen d'un questionnaire posté tous les mois à un échantillon de quelque 70,000 unités déclarantes provenant d'un univers d'environ 700,000 unités. L'échantillon couvre toutes les activités économiques que vise l'enquête, ainsi que toutes les provinces et les territoires et toutes les tailles d'unité. Chaque mois, nous mettons à jour l'univers ainsi que l'échantillon, en tenant compte des créations et des disparitions d'unités ou d'entreprises.

## Stratification

Pour déterminer la taille et la composition de l'échantillon, nous répartissons l'univers des unités déclarantes en 12 provinces et territoires, 16 groupes industriels (activités économiques) et quatre groupes de taille. (Un groupe industriel est légèrement plus détaillé qu'une industrie dont le code n'a qu'un chiffre). La taille d'une unité se définit comme étant le nombre total de salariés rémunérés que compte cette unité. Les quatre groupes de taille sont 0 à 19, 20 à 49, 50 à 199 et 200 salariés et plus.

En outre, l'univers des unités déclarantes est stratifié en deux catégories: les unités à **tirage complet** et les unités à **tirage partiel**, au sens que nous avons précisé dans la section "Définitions".

## Sample allocation and selection

The size of the take-some sample for the survey has been determined so as to provide estimates of total number of paid employees at the industry group and province level with a prespecified reliability. The determination has been done under the requirement that the sample at the industry group and province level is allocated to each size group in proportion to the total estimated take-some employment in that size group. If the sampling fraction resulting from this allocation is less than .01, then a minimum sampling fraction of .01 is adopted in order to avoid unusually large weights. The allocation makes the probability of inclusion of a unit in the sample in a size stratum approximately proportional to the average number of employees per unit in that size stratum. The sample design, therefore, provides for a small sample of small reporting units if the concentration of employment is mainly in the large reporting units. On the other hand, if the proportion of total employment from small reporting units is substantial, then the sample will include a large number of small reporting units.

The number of reporting units to be selected at the industry group, province and size levels is again allocated to each three-digit industry within that industry group, province and size in proportion to the total number of reporting units in that three-digit industry. In other words, the sampling fraction used at the three-digit industry level is the same as the one determined at the industry group, province and size. However, it should be noted that a minimum sample of three units is selected whenever the use of the sampling fraction results in less than 3 units. If the universe itself is less than three units, then all the units are taken into the sample.

A systematic sample of the predetermined number of units is drawn from the take-some universe in every three-digit industry, province and size group. The total sample is the sum of the number of take-all and selected take-some units.

## Sample rotation

The design provides for rotation of the take-some sample within a three-digit industry, province and size group. Each month, approximately one-twelfth of the take-some sample is replaced. This means that units generally remain in the sample for 12 months before rotating out. The units are not eligible for reselection for at least 12 months after they rotate out.

In some small three-digit industry, province and size group cells it may not be possible to rotate out units each month. Consequently, in some small cells, units may have to stay longer than 12 months.

## Répartition et choix de l'échantillon

La taille de la portion à tirage partiel de l'échantillon a été déterminée de façon à fournir, avec une fiabilité prédéterminée, des estimations du nombre total de salariés rémunérés, au niveau du groupe industriel et de la province. Ce calcul tient compte du fait que l'échantillon, au niveau du groupe industriel et de la province, doit être réparti dans chaque groupe de taille proportionnellement à l'estimation de l'emploi total au sein de la portion à tirage partiel de chacun des groupes de taille. Si la fraction d'échantillon résultant de cette répartition est inférieure à 0.01, on la remplace alors par la fraction minimale 0.01 afin d'éviter toute pondération excessive. La répartition est telle que la probabilité qu'une unité entre dans une strate particulière de l'échantillon est à peu près proportionnelle au nombre moyen de salariés par unité comprise dans cette strate. Le plan d'échantillonnage prévoit donc un petit échantillon de petites unités déclarantes lorsque l'emploi se concentre principalement dans les grandes unités déclarantes. Par contre, si l'emploi total provenant des petites unités déclarantes est élevé, alors l'échantillon contiendra un grand nombre de petites unités déclarantes.

Le nombre d'unités qu'il faut choisir au niveau du groupe industriel, de la province et de la taille est, en outre, réparti entre chacune des industries ayant un code à trois chiffres, lesquelles font partie du groupe industriel, de la province et de la taille considérés; cette répartition se fait proportionnellement au nombre total d'unités déclarantes comprises dans l'industrie dont le code comporte trois chiffres. En d'autres termes, la fraction d'échantillon utilisée au niveau industriel à trois chiffres est la même que celle déterminée pour le groupe industriel, la province et la taille. Il faut cependant noter que l'échantillon minimal est de trois unités, peu importe le résultat obtenu en utilisant la fraction d'échantillon. S'il y a moins de trois unités dans l'univers, toutes les unités disponibles sont incluses dans l'échantillon.

Au sein de la portion à tirage partiel, on choisit un échantillon systématique d'un nombre prédéterminé d'unités dans chaque industrie ayant un code à trois chiffres, et ce dans chaque province et chaque groupe de taille. L'échantillon total résulte de la somme du nombre d'unités à tirage complet et du nombre d'unités à tirage partiel sélectionnées.

## Rotation de l'échantillon

Pour chaque industrie (code à trois chiffres), province et groupe de taille, le plan prévoit une rotation de la portion à tirage partiel de l'échantillon. Chaque mois, le douzième environ de la portion à tirage partiel de l'échantillon est remplacé. Cela signifie qu'en général les unités demeurent 12 mois dans l'échantillon avant d'en sortir par voie de rotation. Les unités ne peuvent pas être choisies de nouveau avant au moins 12 mois suivant leur mois de sortie.

Dans le cas de certaines petites cellules (une cellule regroupe les unités de même industrie au niveau du code à trois chiffres, même province et même groupe de taille), il est parfois impossible d'assurer la rotation des unités chaque mois. Ainsi, il peut arriver que des unités demeurent plus de douze mois dans certaines petites cellules.

## Data edit and correction

All the questionnaires are initially screened for completeness by the interviewers of the Statistics Canada regional offices. Thereafter, extensive computer edit procedures for accuracy and consistency are performed at the Ottawa head office. As a result of any of the above-mentioned editing techniques, the respondent may be contacted to confirm or explain the data.

The edit procedures include the comparison of the values of key characteristics (e.g. number of employees, hours worked, salary per employee, etc.) reported for consecutive months by the same unit in order to detect large changes or errors in reporting. Whenever there is a large change or the data appears inconsistent, the record is signaled by the computer edit for review and is subject to correction or acceptance as appropriate.

## Follow-up

Reporting units which are non-respondents to the initial mailing are followed up by telephone by the staff of the regional offices of Statistics Canada. Priority for this follow-up is given to (i) units which are in the sample for the first time and which have not responded, (ii) units which have not responded for two consecutive months, (iii) large nonrespondent units. Follow-up also takes into account response rates and employment in the various industry groups in determining priority.

If units continue to be non-respondents even after follow-up, then data will be imputed for these units. All the records with imputed values are subject to the edits mentioned above.

## Imputation

Imputation for nonrespondent units which have been in the survey for more than one month is based on the ratio of the monthly changes. The ratio of the monthly change for each characteristic is calculated from units that responded both in the current and the previous month and is applied to the previous month's data of each nonrespondent.

For the nonresponding units that are new to the survey, imputation is based on other sources of information such as the employment intention of the unit, the characteristics of the responding units in the same industry group, province and size.

## Estimates

The basic "building block" for producing the monthly estimates is the three-digit industry, province and size group. Estimates at higher levels are obtained by the aggregation of the above estimates. Estimates of averages are obtained by first estimating the totals for the

## Vérification des données et correction

Au départ, les interviewers des bureaux régionaux de Statistique Canada s'assurent que tous les questionnaires sont complets. Ultérieurement, le personnel du bureau d'Ottawa vérifie par ordinateur l'exactitude et la cohérence des chiffres déclarés. À chacune de ces deux étapes de vérification, un répondant peut donc être prié de confirmer ou d'expliquer ses chiffres.

Nos procédés de vérification nous permettent de comparer les valeurs de certaines caractéristiques (nombre de salariés, heures de travail, gains par salarié, etc.) déclarées par la même unité plusieurs mois de suite. Ainsi, il est possible de déceler les grandes variations ou les erreurs, s'il en est. Chaque fois qu'une forte variation apparaît ou que les données semblent incohérentes, l'ordinateur signale le cas, et l'enregistrement est aussitôt corrigé s'il comporte effectivement une erreur.

## Méthode de suivi

Le personnel des bureaux régionaux de Statistique Canada relance par téléphone les unités déclarantes qui tardent à répondre au questionnaire. Cette méthode de suivi s'adresse en priorité (i) aux unités qui font partie de l'échantillon pour la première fois et qui n'ont pas encore répondu; (ii) aux unités qui accusent un retard de deux mois consécutifs; (iii) aux grandes unités non répondantes. Pour déterminer l'ordre de priorité des suivis, on tient compte des taux de réponse et du volume de l'emploi dans les différents groupes industriels.

Lorsque des unités persistent à ne pas répondre même après le suivi, des données leurs sont imputées. Tous les enregistrements dont les données découlent d'une imputation sont soumis aux vérifications mentionnées ci-dessus.

## Imputation

L'imputation de données aux unités non répondantes comprises dans le champ de l'enquête depuis plus d'un mois est basée sur le ratio des variations mensuelles de ces unités. Le ratio de la variation mensuelle d'une caractéristique se calcule à partir des unités qui ont répondu pour le mois courant et le mois précédent, et s'applique aux données du mois précédent de chaque unité non répondante.

Dans le cas des unités non répondantes qui figurent dans l'enquête pour la première fois, l'imputation se fonde sur d'autres sources d'information telles que les prévisions d'emploi de l'unité et les caractéristiques des unités déclarantes du même groupe industriel, de la même province et de la même taille.

## Estimations

L'élément de base qui sert à établir les estimations est l'industrie (code à trois chiffres), la province et la taille. Les estimations plus agrégatives sont obtenues par la sommation des estimations susdites. Pour calculer les moyennes, on estime d'abord les totaux du numérateur et ceux du dénominateur, au

numerator and the denominator at the desired level and then calculating the ratio. Estimates for certain sub-provincial areas are also produced, treating the sub-province as a domain. Coefficients of variation for estimates of some key characteristics at all levels are also produced.

Provision has also been made in the estimation procedure to change the weights of "unusually large" observations occurring in size groups 1, 2 and 3. These observations are termed "outliers" and are judged not to be representative of other units in that size group. The weights of the remaining units are adjusted accordingly.

### Reliability of the estimates

There are two types of errors possible in estimates based on a sample survey: sampling and non-sampling.

**Sampling errors** occur because observations are made only on a sample rather than on the entire universe. Estimates based on a sample differ from the figures that would have been obtained if a complete census had been taken using the same questionnaires, instructions, interviewers and processing techniques. This difference with respect to a particular estimate is called the sampling error of the estimate.

**Non-sampling errors** are errors which are not related to sampling and may occur in a survey operation for many reasons. Non-response, coverage and classification errors, differences in the interpretation of the questions, incorrect information from respondents, mistakes in recording, coding and processing of data are examples of non-sampling errors. It should be noted that non-sampling errors also occur in complete censuses. In the Survey of Employment, Payrolls and Hours, efforts to reduce non-sampling errors include careful design of questionnaires, editing of data, follow-up of and imputation for non-respondents and thorough control of processing operations.

### Indicators of sampling error

The sampling error, as described above, is not known. However, it can be estimated from the sample itself by using a statistical measure called the **standard error** of a survey estimate. When the standard error is expressed as a percent of the estimate, it is known as the relative standard error or coefficient of variation.

Alphabetic symbols of the coefficient of variation are used in this publication (see Tables A to F at the end of this explanatory note) to give an indication of the reliability of the estimates and are based on a 12-month average of the coefficients of variation. The ranges of the coefficients of variation and their corresponding alphabetic indicator are given in the following table.

niveau désiré, puis on en fixe le ratio. Nous produisons aussi des estimations concernant certaines régions infraprovinciales, considérant chacune de ces régions comme un domaine. Enfin, nous calculons des coefficients de variation pour les estimations de certaines caractéristiques clés, à tous les niveaux.

Le procédé d'estimation comporte en outre des mécanismes qui permettent de changer les poids lorsque des observations "exceptionnellement grandes" apparaissent chez les unités des groupes de taille 1, 2 ou 3. Ces observations, dites "aberrantes", ne sont pas représentatives des autres unités du même groupe de taille, de sorte que l'on rajuste les poids des autres unités en conséquence.

### Fiabilité des estimations

En ce qui concerne les estimations basées sur un sondage, il existe deux types d'erreurs possibles, soit les erreurs d'échantillonnage et les erreurs non liées à l'échantillonnage.

Les **erreurs d'échantillonnage** proviennent de ce que les observations se font à partir d'un échantillon au lieu de l'univers complet. Les estimations basées sur un échantillon diffèrent des statistiques que l'on obtiendrait d'un recensement complet effectué au moyen des mêmes questionnaires, des mêmes directives, des mêmes interviewers et des mêmes techniques de traitement. Cette différence, lorsqu'il s'agit d'une estimation particulière, s'appelle erreur d'échantillonnage de l'estimation.

Les **erreurs non dues à l'échantillonnage** ne se rattachent pas à l'échantillon et peuvent se produire tout au long d'une enquête pour plusieurs raisons. Les cas de non-réponse, les anomalies de couverture et de classification, les différences d'interprétation des questions, la communication de renseignements inexacts par les répondants et les fautes d'entrée, de codage et de traitement des données sont autant d'erreurs non attribuables à l'échantillonnage. Il faut noter que des erreurs de ce genre peuvent aussi se produire dans les recensements. Pour l'enquête sur l'emploi, la rémunération et les heures de travail, nous avons tenté d'en réduire le risque par une formulation soignée des questionnaires, par une vérification rigoureuse des chiffres déclarés, par le travail de suivi, par l'imputation de données aux unités non répondantes et par un contrôle attentif des techniques de traitement.

### Indicateurs des erreurs d'échantillonnage

L'erreur d'échantillonnage que nous venons de décrire reste inconnue. On peut cependant l'estimer à partir de l'échantillon, en utilisant une mesure appelée **écart-type** d'une estimation de sondage. Lorsque l'écart-type est exprimé en pourcentage de l'estimation, on l'appelle écart-type relatif ou coefficient de variation.

Dans la présente publication, nous utilisons des symboles littéraux de coefficient de variation (voir tableaux A à F à la fin de cette note explicative), pour indiquer le degré de fiabilité des estimations; cette symbolisation repose sur la moyenne des coefficients de variation de 12 mois. Les intervalles de confiance des coefficients de variation et les symboles correspondants sont précisés dans le tableau suivant.

## ALPHABETIC INDICATORS OF COEFFICIENT OF VARIATION

Alphabetic Indicator	Range of Coefficient of Variation Percent
A	0 - 1.0
B	1.1 - 2.5
C	2.6 - 5.0
D	5.1 - 10.0
E	10.1 - 15.0
F	15.1 - 25.0
G	> 25.0

The sample estimate and its standard error (derived from the coefficient of variation) may be used to construct an interval within which the unknown census value is expected to be contained with a prescribed confidence. The particular sample used in this survey is one of a large number of all possible samples of the same size that could have been selected using the same sample design. Estimates derived from the different samples would differ from each other. If intervals from two standard errors below the estimate to two standard errors above the estimate are constructed using each of the above estimates, then approximately 19 out of 20 of the intervals would include the census value. Such an interval is called a 95 percent confidence interval. For example, let the estimate under consideration be the total number of paid employees at Canada level in Construction and say it is 450,000 employees. If the estimate has a reliability indicator A, then assuming that the coefficient of variation of the estimate is 1%, the standard error of the estimate would be 4,500 employees. Therefore, in this case, one can say with 95% confidence that the census value of total paid employees in Construction is included in the interval 441,000 to 459,000 employees.

In general, the estimates of monthly changes are expected to be more reliable than the estimates of levels due to the large overlap of reporting units in the monthly samples and the high correlation between the reported values for two consecutive months.

### Statistical Presentation

#### 1. Data Revision

Each month, statistics for the two latest months are prepared from the survey of Employment, Payrolls and Hours. Data for the most current month are titled **preliminary** estimates and are based on a response rate of around 80%. Estimates are also prepared for the month immediately preceding the most current month; these are known as **revised** estimates and are based on a higher rate of response (approximately 90%).

## INDICATEURS LITTÉRAUX DU COEFFICIENT DE VARIATION

Indicateur littéral	Intervalle de confiance du coefficient de variation en pourcentage
A	0 - 1.0
B	1.1 - 2.5
C	2.6 - 5.0
D	5.1 - 10.0
E	10.1 - 15.0
F	15.1 - 25.0
G	> 25.0

L'estimation de l'échantillon et son écart-type (établi d'après le coefficient de variation) peuvent servir à construire un intervalle à l'intérieur duquel s'inscrira, sous réserve d'une limite de confiance prédéterminée, la valeur inconnue que l'on obtiendrait par recensement. L'échantillon sur lequel s'appuie notre enquête n'est qu'un des multiples fragments de même taille que nous aurions pu choisir en utilisant le même plan. Les estimations tirées d'autres échantillons du même univers diffèreraient les unes des autres. Si l'on construisait des intervalles allant de deux écarts-types sous l'estimation à deux écarts-types au-dessus de l'estimation, en utilisant chacune des estimations possibles (selon l'échantillon choisi), environ 19 intervalles sur 20 contiendraient alors la valeur que donnerait un recensement. Ce genre d'intervalle se nomme intervalle de confiance à 95%. Prenons par exemple comme estimation le nombre total de salariés de la construction pour l'ensemble du Canada, et supposons que ce nombre soit 450,000. Si l'indicateur de fiabilité de cette estimation est A, et si son coefficient de variation s'établit à 1%, alors l'écart-type de l'estimation sera de 4,500 salariés. Dans ce cas, on peut donc dire avec 95% de confiance que le nombre total de salariés de la construction, obtenu par recensement, se situe dans l'intervalle 441,000 à 459,000 salariés.

En général, on s'attend à ce que les estimations des variations mensuelles soient plus fiables que les estimations de niveaux, par suite de l'ample chevauchement des unités déclarantes au sein des échantillons mensuels, et de la forte corrélation qui existe entre les valeurs déclarées pour deux mois consécutifs.

### Présentation statistique

#### 1. Révision des données

Chaque mois, nous préparons, à l'égard des deux derniers mois, des statistiques tirées de l'enquête sur l'emploi, la rémunération et les heures de travail. Les données du mois le plus récent sont appelées estimations **préliminaires** et se fondent sur un taux de réponse d'environ 80%. Nous établissons également des estimations pour le mois qui précède le mois le plus récent; il s'agit d'estimations **révisées** qui prennent appui sur un taux de réponse plus élevé (environ 90%).

## 2. Data Release

As soon as the estimates become available, selected highly aggregated statistics are released in the Statistics Canada Daily, while detailed data are entered in the Canadian Socio-Economic Information Management System (i.e. CANSIM).

Detailed estimates appear in this report at a later date.

## 3. Rounding

Totals and averages for any level of geographical or industrial aggregation are calculated using unrounded figures and then rounded using the usual procedure adopted by Statistics Canada. Published employment figures are rounded to hundreds. The sum of individually rounded items may not always equal the total.

## 4. Averages

The average weekly earnings (including overtime) is obtained by dividing the total weekly payrolls by the number of employees. It is calculated for the total number of employees, for the hourly-rated employees, for the salaried employees, and for the other types of employees.

The average weekly overtime earnings is derived by dividing the overtime weekly payrolls by the number of employees. It is calculated for the total number of employees, the hourly-rated employees and the salaried employees.

The average hourly earnings (including overtime) is obtained by dividing the total weekly payrolls by the total weekly number of hours (the total weekly number of hours is reported for the hourly-rated employees while, for salaried employees, it is derived by multiplying the average standard workweek hours by the number of salaried employees). It is calculated for the hourly-rated employees and for the salaried employees.

The average hourly overtime earnings is calculated for the hourly-rated employees by dividing the overtime weekly payrolls by the weekly number of overtime hours reported for this group of employees.

The average weekly hours (including overtime) is obtained by dividing the total weekly number of hours by the number of employees. This statistic is calculated for the hourly-rated employees and the salaried employees.

The average weekly overtime hours is derived by dividing the weekly number of overtime hours by the number of employees. This average is calculated for the hourly-rated employees.

## 2. Diffusion des données

Dès que les estimations requises sont disponibles, des statistiques choisies à un niveau d'agrégation élevé paraissent dans le Quotidien de Statistique Canada, tandis que les chiffres détaillés sont introduits dans le Système canadien d'information socio-économique (CANSIM).

Les estimations détaillées apparaissent dans ce bulletin plus tard.

## 3. Arrondissement

Les totaux et les moyennes des divers niveaux d'agrégation géographique ou industrielle sont calculés au moyen des chiffres bruts, ensuite arrondis conformément à la méthode d'arrondissement habituelle de Statistique Canada. Les nombres publiés concernant l'emploi sont arrondis à la centaine. Par conséquent, il peut arriver que la somme des chiffres arrondis individuellement ne corresponde pas au total.

## 4. Moyennes

On obtient les rémunérations hebdomadaires moyennes (y compris celles du temps supplémentaire) en divisant les rémunérations hebdomadaires totales par le nombre de salariés. Ces moyennes sont calculées à l'égard du nombre total de salariés, de salariés rémunérés à l'heure, d'employés et des autres catégories de salariés.

Pour obtenir les rémunérations hebdomadaires moyennes du temps supplémentaire, on divise les rémunérations hebdomadaires pour le temps supplémentaire par le nombre de salariés. Ces moyennes sont calculées à l'égard du nombre total de salariés, de salariés rémunérés à l'heure et d'employés.

On obtient les gains horaires moyens (y compris la rémunération pour le temps supplémentaire) en divisant les rémunérations hebdomadaires totales par le nombre total hebdomadaire d'heures travaillées (le nombre total d'heures hebdomadaires est celui déclaré pour les salariés rémunérés à l'heure, tandis que dans le cas des employés on l'établit en multipliant la moyenne des heures fournies pendant la semaine normale de travail par le nombre d'employés). Nous calculons cette statistique à l'égard des salariés rémunérés à l'heure et des employés.

Quant au temps supplémentaire, on calcule les gains horaires moyens des salariés rémunérés à l'heure en divisant les rémunérations hebdomadaires pour le temps supplémentaire par le nombre d'heures supplémentaires hebdomadaires déclarées pour ce groupe de salariés.

Pour déterminer les heures hebdomadaires moyennes (y compris les heures supplémentaires) on divise le total des heures hebdomadaires par le nombre de salariés. Cette statistique est établie à l'égard des salariés rémunérés à l'heure ainsi qu'à l'égard des employés.

Pour calculer les heures supplémentaires moyennes hebdomadaires on divise le nombre d'heures supplémentaires hebdomadaires par le nombre de salariés.

The average weekly earnings (excluding overtime) is obtained by dividing the weekly payrolls, which exclude the overtime weekly payrolls, by the number of employees. This estimate is calculated for hourly-rated employees and salaried employees.

## 5. Unpublished Data

A large number of non-confidential detailed industrial and geographic estimates are compiled but not included in this report. Although the reliability of these estimates is lower than the reliability of the published estimates, these data will be available on request on a cost recovery basis.

In addition to the total number of employees for the education industry, data are also available for the teaching and non-teaching staff separately.

## 6. CANSIM

Data published in this report are also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System).

Tables giving the CANSIM matrix numbers, the CANSIM series numbers and the types of survey estimates are presented at the end of this explanatory text (see Tables I to V) to provide the user with an easy and quick link to the CANSIM system.

Generally speaking, the CANSIM matrix number identifies a type of survey estimates for a particular geographic area, while the CANSIM series number represents an industrial level. Owing to the different types of data aggregations (all units, take-all units, take-some units) and to the large number of survey estimate types (number of employees, average hourly earnings of hourly-rated employees, etc.), the user will have to follow the steps given hereafter to select the proper CANSIM matrix and series numbers.

- a) Determine the type of tabulated information needed (this will define the value of "x" for the CANSIM series number of Table II):
  - i) Aggregation of all survey units has the value 1,
  - ii) Aggregation of take-all units has the value 2 and
  - iii) Aggregation of take-some units has the value 3.
- b) Determine the type of survey estimates required; this will provide the value of "y" for the CANSIM series number. This value is obtained by consulting Table I which lists the 20 types of survey estimates; the number of salaried employees, for example, constitutes type 2.

La moyenne des rémunérations hebdomadaires (temps supplémentaire exclu) s'obtient en divisant les rémunérations hebdomadaires, qui excluent les rémunérations hebdomadaires pour le temps supplémentaire, par le nombre de salariés. Cette estimation est calculée à l'égard des salariés rémunérés à l'heure, de même qu'à l'égard des employés.

## 5. Données non publiées

Nous établissons, aux niveaux industriel et géographique, un grand nombre d'estimations non confidentielles détaillées qui, toutefois, ne figurent pas dans le présent ouvrage. Bien que leur fiabilité soit plus faible que celle des estimations publiées, ces données peuvent être obtenues sur demande sur une base de recouvrement des coûts.

Outre le chiffre total des salariés du domaine de l'éducation, nous pouvons aussi fournir des données distinctes concernant le personnel enseignant et le personnel non enseignant.

## 6. CANSIM

Les données qui apparaissent dans la présente publication sont également disponibles sous une forme ordiolingue dans CANSIM (Système canadien d'information socio-économique).

Les intéressés trouveront à la fin de ces notes explicatives des tableaux indiquant les numéros des matrices CANSIM, les numéros des séries CANSIM et les types d'estimations de l'enquête (voir tableaux I à V). Ces tableaux fournissent à l'utilisateur un moyen d'accès facile et rapide au système CANSIM.

De façon générale, le numéro de matrice CANSIM désigne un type d'estimation de l'enquête pour une région géographique particulière, tandis qu'un numéro de série CANSIM désigne un niveau industriel. En raison de la multiplicité des types d'agrégation (ensemble des unités, unités à tirage complet, unités à tirage partiel) et des nombreux types d'estimations de l'enquête (nombre de salariés, salaires horaires moyens des salariés rémunérés à l'heure, etc.), l'utilisateur devra franchir les étapes suivantes pour choisir les bons numéros de matrice et de série CANSIM.

- a) Déterminer le type désiré de totalisation parmi les cas suivants (cette opération définira la valeur de "x" pour le numéro de série CANSIM au tableau II):
  - i) ensemble des unités de l'enquête: vaut 1,
  - ii) unités à tirage complet: vaut 2 et
  - iii) unités à tirage partiel: vaut 3.
- b) Déterminer le type requis d'estimations de l'enquête; cette opération fixera la valeur de "y" pour le numéro de série CANSIM. On obtient cette valeur en consultant le tableau I, qui contient la liste des 20 types d'estimations de l'enquête; le type "employés", par exemple, a la valeur 2.

- c) Determine the industrial level needed and refer to the Industry Code column of the CANSIM series number Table II to find the rest of the series number (e.g. Industry Code 031 has series number **x.y.1.1.1.1**).
- d) Determine the geographical level required and refer to the CANSIM matrix number tables (Tables III to V) to select the appropriate matrix number.

A specific example would be as follows. The "average weekly overtime earnings of salaried employees" for "all survey units" is needed for the Ontario total manufacturing. The CANSIM series number will be 1.13.1.1.3 according to:

- i) The "x" value of 1 for the "All survey units" aggregation,
- ii) The "y" value of 13 for the type of survey estimates and
- iii) The tail-end of the series number 1.1.3 for the manufacturing Industry Code 101-399.

The CANSIM matrix number will be 8375 because the type of estimates 13 is required for Ontario.

It should be noted that only two types of survey estimates are available for the Census Agglomerations (i.e. estimates 01: total number of employees, and 05: average weekly earnings (including overtime) of all employees), while twenty types of estimates are available for Canada, the provinces and the Census Metropolitan Areas.

For further information on CANSIM call (613) 991-1150 or write CANSIM Division, Statistics Canada, R.H. Coats BLDG., Ottawa, Ontario, K1A 0T6.

## 7. Confidentiality

The information presented in this publication has been reviewed to ensure that the confidentiality of individual responses is respected.

- c) Déterminer le niveau industriel désiré et utiliser la colonne "code des industries" du tableau II des numéros de série CANSIM pour trouver les autres chiffres du numéro de série (par ex. le code d'industrie 031 possède le numéro de série **x.y.1.1.1.1**).
- d) Déterminer le niveau géographique requis et utiliser les tableaux de numéros de matrice CANSIM (Tableaux III à V) pour choisir le numéro de matrice approprié.

Voici un exemple. Supposons que l'on veuille connaître la "rémunération hebdomadaire moyenne du surtemps des employés" de "l'ensemble des unités de l'enquête" pour les manufactures de l'Ontario. Le numéro de série CANSIM sera 1.13.1.1.3, puisque:

- i) la valeur de "x" pour le groupe "ensemble des unités de l'enquête" est 1,
- ii) la valeur de "y" pour le type d'estimation est 13, et
- iii) la fin du numéro de série pour le "code d'industrie" des manufactures 101-399 est 1.1.3.

Le numéro de matrice CANSIM sera 8375, car le type d'estimation 13 s'applique à l'Ontario.

Notons qu'il n'existe que deux types d'estimations au niveau des agglomérations de recensement (i.e. les estimations 01: nombre total des salariés, et 05: salaires hebdomadaires moyens (y compris le surtemps) pour l'ensemble des salariés), alors qu'il y a vingt types d'estimations disponibles aux niveaux du Canada, des provinces et des régions métropolitaines.

Pour de plus amples informations concernant CANSIM, téléphoner à (613) 991-1150 ou écrire à Division CANSIM, Statistique Canada, immeuble R.H. Coats, Ottawa, Ontario, K1A 0T6.

## 7. Confidentialité

Les données du présent bulletin sont vérifiées afin de s'assurer qu'elles respectent le caractère confidentiel des réponses fournies par les entreprises.

TABLE I. Type of Estimates

TABLEAU I. Type d'estimations

Estimates Estimations	Description
1	All employees - Ensemble des salariés
2	Salaried employees - Employés
3	Employees paid by the hour - Salariés rémunérés à l'heure
4	Other employees - Autres salariés
5	Average weekly earnings (including overtime) of all employees - Rémunération hebdomadaire moyenne (incluant le temps supplémentaire) de l'ensemble des salariés
6	Average weekly earnings (including overtime) of salaried employees - Rémunération hebdomadaire moyenne (incluant le temps supplémentaire) des employés
7	Average weekly earnings (including overtime) of employees paid by the hour - Rémunération hebdomadaire moyenne (incluant le temps supplémentaire) des salariés rémunérés à l'heure
8	Average weekly earnings (including overtime) of other employees - Rémunération hebdomadaire moyenne (incluant le temps supplémentaire) des autres salariés
9	Average weekly earnings (excluding overtime) of all employees - Rémunération hebdomadaire moyenne (excluant le temps supplémentaire) de l'ensemble des salariés
10	Average weekly earnings (excluding overtime) of salaried employees - Rémunération hebdomadaire moyenne (excluant le temps supplémentaire) des employés
11	Average weekly earnings (excluding overtime) of employees paid by the hour - Rémunération hebdomadaire moyenne (excluant le temps supplémentaire) des salariés rémunérés à l'heure
12	Average weekly overtime earnings of all employees - Rémunération hebdomadaire moyenne pour travail supplémentaire, ensemble des salariés
13	Average weekly overtime earnings of salaried employees - Rémunération hebdomadaire moyenne pour travail supplémentaire, des employés
14	Average weekly overtime earnings of employees paid by the hour - Rémunération hebdomadaire moyenne pour travail supplémentaire des salariés rémunérés à l'heure
15	Average weekly hours of salaried employees - Heures hebdomadaires moyennes des employés
16	Average weekly hours of employees paid by the hour - Heures hebdomadaires moyennes des salariés rémunérés à l'heure
17	Average weekly overtime hours of employees paid by the hour - Heures supplémentaires hebdomadaires moyennes des salariés rémunérés à l'heure
18	Average hourly earnings of salaried employees - Rémunération horaire moyenne des employés
19	Average hourly earnings (including overtime) of employees paid by the hour - Rémunération horaire moyenne (incluant le temps supplémentaire) des salariés rémunérés à l'heure
20	Average hourly overtime earnings of employees paid by the hour - Rémunération horaire moyenne du travail supplémentaire, des salariés rémunérés à l'heure

## ANNEX 2

### “INDUSTRIAL COMPOSITE” ESTIMATES

For data produced on employment, payrolls, and hours prior to April 1983, there was an aggregate entitled “Industrial Composite”. This covered all sectors except agriculture, government, defence, hospitals, schools, religion, household services, and fishing, trapping and hunting; in addition, only firms with 20 or more employees were surveyed. Therefore, neither employment nor average weekly earnings for the Industrial Composite were ever intended to be global measures.

With the beginning of the Survey of Employment, Payrolls and Hours (SEPH) in April 1983, the Industrial Composite classification ceased to have its original justification. The SEPH survey has much more complete coverage than its predecessor, and its aggregates provide much fuller coverage of the economy, both by industry and by size of employer, than did the Industrial Composite. For this reason, it was decided not to continue the Industrial Composite as a regular SEPH output. Users are encouraged to change to the new published data as soon as possible.

It is recognized, however, that in some cases the term “Industrial Composite” has been officially incorporated into formal documents. In these cases, it may require some time to alter the wording of the documents to incorporate the new statistics. To assist in such efforts, a special synthetic series, approximating the old Industrial Composite totals from SEPH data, is produced hereafter.

As a word of warning, because of changes in coverage, survey procedures, question wording and other factors that accompanied the survey revisions in April 1983, it is not possible to exactly reproduce the Industrial Composite. However, research has indicated that it is possible by combining selected subcategories to construct data series in which the average weekly earnings for Canada and provinces normally differ from previous data by one percent or less. These derived totals will be released until December 1985.

## ANNEXE 2

### ESTIMATIONS DE L’“ENSEMBLE DES INDUSTRIES”

Avant avril 1983, nous produisions des données sur l’emploi, la rémunération et les heures pour un regroupement appelé “ensemble des industries”. Ce regroupement couvrait tous les secteurs de l’industrie sauf l’agriculture, le gouvernement, la défense, les hôpitaux, les écoles, les organismes religieux, les ménages privés, la pêche, le piégeage et la chasse; de plus, seules les firmes ayant 20 salariés ou plus étaient enquêtées. Ainsi, l’emploi et la rémunération hebdomadaire moyenne pour ce regroupement n’ont jamais constitué des mesures globales.

Avec les débuts de l’Enquête sur l’emploi, la rémunération et les heures de travail (EERH), le regroupement “ensemble des industries” n’a plus de raison d’être. L’enquête EERH couvre beaucoup plus de secteurs que l’enquête qu’elle remplace. De plus, ses regroupements représentent une couverture beaucoup plus complète de l’économie, tant par industrie que par taille d’employeur. Nous avons donc décidé de ne pas publier l’“ensemble des industries” dans le cadre de l’enquête EERH. Pour cette raison, nous recommandons aux utilisateurs de se tourner vers les nouvelles données publiées aussitôt que possible.

Nous reconnaissons que, dans certains cas, le terme “ensemble des industries” soit inclus officiellement dans le texte de documents formels. Il peut arriver que dans ces situations le changement de formulation pour s’accorder aux nouvelles statistiques demande un certain temps. Pour venir en aide aux utilisateurs pendant ce temps, nous publions ci-après des séries spéciales qui sont des approximations des anciennes séries de l’“ensemble des industries”, calculées à partir des données de l’EERH.

Il ne faut pas oublier qu’il s’agit d’approximation. En effet, il est impossible de reproduire exactement l’“ensemble des industries” à cause des changements touchant la couverture de l’enquête, les règles de l’enquête, la formulation des questions et d’autres facteurs accompagnant la révision de l’enquête en avril 1983. Cependant, des recherches ont montré qu’il était possible, en combinant certaines sous-catégories, de construire des séries de données pour lesquelles la rémunération hebdomadaire moyenne pour le Canada et les provinces ne différerait des données réelles que de 1% ou moins. Nous publierons ces séries dérivées jusqu’au mois d’enquête: décembre 1985.

**Estimates of Average Weekly Earnings for "Industrial Composite",  
Canada and Provinces**

## SELECTED PUBLICATIONS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

### Catalogue

#### Monthly

72-002 Employment, Earnings and Hours. Bil.

Industry and area data on industrial employment, average weekly earnings average weekly hours and average hourly earnings.

72-008 Estimates of Employees by Province and Industry. Bil.

Monthly estimates of total employment in non-agricultural industries for Canada and the provinces, (This publication is terminated with March 1983 data).

#### Quarterly

72-005 Estimates of Labour Income. Bil.

Monthly estimates of wages and salaries and supplementary labour income on unadjusted and seasonally adjusted basis by industry for Canada and the provinces with annual totals.

#### Occasional

72-516 Estimates of Employees by Province and Industry, 1961-1976. Bil.

Monthly estimates of total employees by industry and province in the non-agricultural sector - both seasonally adjusted and unadjusted series, 1961-1976.

72-517 Employment, Earnings and Hours, 1978. Bil.

Employment, earnings and hours statistics for the months of January to April 1978 inclusively which supersede data previously published in the monthly publication 72-002.

## CHOIX DE PUBLICATIONS

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

### Catalogue

#### Mensuel

72-002 Emploi, gains et durée du travail. Bil.

Données par industrie et par région sur l'emploi, les gains hebdomadaires moyens du travail, les gains horaires moyens et les heures hebdomadaires moyennes.

72-008 Estimations du nombre de salariés par province et par industrie. Bil.

Estimations mensuelles de l'ensemble des effectifs dans les industries non agricoles pour le Canada et les provinces. (Cette publication se termine avec les estimations de mars 1983).

#### Trimestriel

72-005 Estimations du revenu du travail. Bil.

Estimations mensuelles des salaires, des traitements et du revenu supplémentaire du travail, désaisonnalisées et non désaisonnalisées, par branche d'activité économique pour le Canada et les provinces, de même que des totaux annuels.

#### Hors série

72-516 Estimations du nombre de salariés par province et par industrie, 1961-1976. Bil.

Estimations mensuelles désaisonnalisées et non désaisonnalisées du nombre total de salariés par industrie et par province pour l'ensemble des industries non agricoles de 1961-1976.

72-517 Emploi, gains et durée du travail, 1978. Bil.

Chiffres révisés de l'emploi, des gains et de la durée du travail pour les mois de janvier à avril 1978 inclusivement. Ces données remplacent celles qui avaient été précédemment publiées dans les éditions mensuelles de la publication numéro 72-002 au catalogue.

## Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Employment, earnings and hours,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9900) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(973-6586)	Vancouver	(666-3691)
Credit Card only (973-8018)			

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

1(613)990-8115

## Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Emploi, gains et durée du travail,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-9900) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)

## Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

## Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

## NOTE TO USERS

Data for the current month are preliminary estimates and are subject to revision in the next issue of this publication.

Effective with June 1985, data for urban areas have been removed and the remaining statistical tables have been re-numbered as a result of the changes.

The following is a conversion from old to new table numbers:

New Table Number	Former Table Number	Nouveau numéro de tableau	Ancien numéro de tableau
1.1	2	1.1	2
1.2	3	1.2	3
2.1	5	2.1	5
2.2	6	2.2	6
3.1	11	3.1	11
3.2	12	3.2	12
4.1	15	4.1	15
4.2	16	4.2	16
5.1	17	5.1	17
5.2	18	5.2	18
6.1	20	6.1	20

Data for urban areas will continue to be made available to users on request. For further information on obtaining unpublished data, please contact Jack Beauregard or Renée Arsenault at (613)990-9900. The data are also available on the Canadian Socio-Economic Information Management System (CANSIM) and include a cautionary note concerning the interpretation of the data. Users interested in accessing data via CANSIM should contact one of Statistics Canada's regional reference centres at the numbers listed on the inside front cover of this publication or contact CANSIM directly at (613)991-1150.

## AVIS AUX UTILISATEURS

Les données du mois le plus récent sont des estimations préliminaires et seront révisées lors de la prochaine parution de cette publication.

À partir de juin 1985, les données pour les régions urbaines ont été supprimées et les tableaux qui font encore partie de cette publication ont été renumérotés.

Le tableau qui suit vous permet de passer des anciens aux nouveaux numéros de tableaux:

Les données pour les régions urbaines sont toujours disponibles sur demande. Pour plus d'information sur la façon d'obtenir des données non-publiées veuillez communiquer avec Jack Beauregard ou Renée Arsenault au (613)990-9900. Notez que l'on peut toujours obtenir ces séries du Système canadien d'information socio-économique (CANSIM), où nous avons ajouté une mise en garde concernant l'interprétation de ces données. Les utilisateurs voulant obtenir des chiffres par l'intermédiaire de CANSIM doivent contacter un des centres de consultation de Statistique Canada dont les numéros de téléphone se trouvent à l'endos du couvert de cette publication ou en communiquant directement avec CANSIM au (613)991-1150.

## REVISIONS TO HISTORICAL DATA

### 1984

There has been a revision to the data published monthly in the January to July 1984 issues of Catalogue 72-002 for the industries listed below. The revised series appear in the September 1984 issue. All data variables for the following series at the Canada, Provinces and Territories level may be affected:

1. Total Number of Employees - All Survey Units
2. Salaried Employees - All Survey Units
3. Total Number of Employees - Take-All Units
4. Salaried Employees - Take-All Units

## RÉVISIONS AUX DONNÉES HISTORIQUES

### 1984

Des révisions ont été apportées aux chiffres publiés dans le catalogue mensuel numéro 72-002 pour les mois de janvier à juillet 1984, pour les industries mentionnées ci-dessous. Les séries révisées figurent dans le catalogue du mois de septembre 1984. Toutes les variables pour les séries qui suivent aux niveaux du Canada, provinces et territoires peuvent être affectées:

1. Nombre total de salariés - Ensemble des unités
2. Employés - Ensemble des unités
3. Nombre total de salariés - Unités à tirage complet
4. Employés - Unités à tirage complet

Service producing industries	501 - 951	Branches productrices de services
Commercial, business and personal services	801 - 899	Services socio-culturels, comm. et pers.
Education and related services	801 - 809	Enseignement et services annexes

## COMMENTARY

### Preliminary Estimates<sup>1</sup> (Unadjusted data) - August 1985

Preliminary data for August 1985 showed an estimated 9,084.2 thousand employees for the Canada industrial aggregate<sup>2</sup>, down slightly from the July 1985 estimate of 9,089.6 thousand. Marginal decreases were noted in the community, business and personal services. Slight increases were registered in trade and transportation, communication and other utilities while the remaining industry divisions showed no significant changes. Decreases were registered in Newfoundland, Quebec, Ontario, Manitoba and the Northwest Territories while the remaining provinces increased or remained unchanged.

Average weekly earnings at the Canada industrial aggregate level were estimated at \$419.58 for August, virtually unchanged from \$420.00 in July. Decreases registered in community, business and personal services and in mines, quarries and oil wells were offset by increases in forestry and in manufacturing. All provinces registered decreases except British Columbia, the Yukon and the Northwest Territories.

1

<sup>1</sup> See note on "Statistical presentation" under "Concepts and Methods" at the back of this publication.

<sup>2</sup> The industrial aggregate is the sum of all industries with the exception of agriculture; fishing and trapping; religious organizations; private households and military personnel.

Goods-producing industries comprise forestry; mines, quarries and oil wells; manufacturing and construction.

Service-producing industries include transportation, communication and other utilities; trade; finance, insurance and real estate; community, business and personal services (except religious organizations and private households) and public administration (except military personnel).

## OBSERVATIONS

### Estimations préliminaires<sup>1</sup> (chiffres non désaisonnalisés) - Août 1985

Selon les données préliminaires, le nombre de salariés pour l'ensemble des activités économiques<sup>2</sup> au Canada atteignait 9,084.2 milliers de personnes en août 1985, représentant une légère diminution de 5.4 milliers de personnes entre juillet et août. Des diminutions ont été notées principalement dans les services socio-culturels, communautaires et personnels. Le commerce et les transports, communications et autres services publics ont enregistré des hausses alors que les autres divisions de l'activité économique n'ont pratiquement pas varié. Des diminutions ont été enregistrées à Terre-Neuve, au Québec, en Ontario, au Manitoba et aux Territoires du Nord-Ouest alors que les autres provinces ont augmenté ou sont demeurées stables.

La rémunération hebdomadaire moyenne pour l'ensemble des activités économiques était estimée à \$419.58 pour le mois d'août, pratiquement inchangée par rapport à celle de \$420.00 en juillet. Les diminutions enregistrées dans les services socio-culturels, communautaires et personnels de même que dans les mines, carrières et puits de pétrole ont été contrebalancées par des augmentations dans les forêts et dans les manufactures. Toutes les provinces ont rapporté des diminutions à l'exception de la Colombie-Britannique, du Yukon et des Territoires du Nord-Ouest.

<sup>1</sup> Voir la partie "Présentation statistique" sous la rubrique "concepts et méthodes", à la fin de cette publication.

<sup>2</sup> L'ensemble des activités économiques est la somme de toutes les industries à l'exception de l'agriculture, la pêche et le piégeage, les organismes religieux, les ménages privés et les services de défense.

Les industries productrices de biens englobent les forêts, les mines, les carrières et puits de pétrole, les manufactures et la construction.

La branche des services englobe les transports, les communications et autres services publics, le commerce, les finances, assurances et affaires immobilières, les services communautaires aux entreprises et personnels (sauf les organismes religieux et les ménages privés) et l'administration publique (à l'exception du personnel militaire).

		thousands - milliers											
305	Wire & wire products - Fil métallique et ses produits	9.6	9.6	9.7	2.5	2.5	2.6	7.1	7.1	7.1	...	...	...
306	Hardware, tools & cutlery - Quincaillerie, outils et coutellerie	4.0	3.8	4.0	1.4	1.4	1.4	2.5	2.3	2.6	...	...	...
307	Heating equipment - Appareils de chauffage	1.1	0.9	0.9	...	...	...	0.7	0.5	0.6	...	...	...
308	Machine shops - Ateliers d'usinage	3.1	3.1	3.2	1.3	1.3	1.3	1.8	1.8	1.8	...	...	...
309	Misc. metal fabricating - Fabrication de produits métalliques divers	10.0	10.3	10.3	3.2	3.2	3.2	6.8	7.1	7.1	...	...	...
311-318	Machinery industries (except electrical) - Fabrication de machines (sauf électriques)	47.9	48.1	49.0	24.7	24.7	24.9	22.5	22.6	23.3	...	...	...
311	Agric. implements - Instruments aratoires	5.3	5.7	6.0	2.1	2.1	2.2	3.3	3.6	3.8	...	...	...
315	Misc. machinery & equipment - Machines et équipement divers	26.6	26.4	27.2	10.8	10.8	11.0	15.4	15.3	15.8	...	...	...
316	Commercial refriger. & air cond. equip. - Equip. comm. de réfrig. & de climat.	2.8	2.7	2.7	1.1	1.0	1.0	1.8	1.7	1.7	...	...	...
318	Office & store machinery - Machines de bureau et de commerce	13.2	13.3	13.1	10.8	10.8	10.8	2.1	2.1	2.0	...	...	...
321-329	Transportation equipment industries - Fabrication d'équipement de transport	159.8	160.8	160.2	41.4	41.5	40.8	118.2	119.0	119.0	...	...	...
321	Aircraft & aircraft parts - Aéronefs et pièces	31.2	31.2	31.4	13.5	13.5	13.5	17.7	17.7	18.0	...	...	...
323	Motor vehicles - Véhicules automobiles	51.8	51.6	51.5	10.6	10.7	10.6	41.2	40.9	40.8	...	...	...
324	Truck bodies & trailers - Carrosseries de camions et remorques	8.3	8.3	8.5	1.5	1.5	1.6	6.7	6.7	6.8	...	...	...
325	Motor vehicle parts & accessories - Pièces et accessoires d'automobiles	48.8	49.9	49.6	9.7	9.7	9.1	38.9	40.0	40.2	...	...	...
327	Shipbuilding & repair - Construction et réparation de navires	10.2	10.1	9.1	2.6	2.6	2.6	7.5	7.4	6.5	...	...	...
331-339	Electrical products industries - Fabrication de produits électriques	87.0	86.8	87.1	37.6	37.5	37.6	49.2	49.2	49.3	...	...	...
331	Small electrical appliances - Petits appareils électriques	1.9	2.0	2.3	0.5	0.5	0.6	1.4	1.4	1.6	...	...	...
332	Major appliances (including non-electric) - Gros appareils (incluant non électriques)	7.1	7.1	7.2	2.0	2.0	2.0	5.1	5.1	5.2	...	...	...
335	Communications equipment - Équipement de télécommunication	37.9	38.0	37.6	19.6	19.6	19.5	18.3	18.3	18.0	...	...	...
336	Electrical industrial equipment - Équipement électrique industriel	16.8	16.6	16.9	6.8	6.7	6.7	10.0	9.9	10.2	...	...	...
338	Electric wire & cable - Fils & câbles électriques	8.8	8.8	8.8	3.4	3.4	3.4	5.4	5.4	5.4	...	...	...
339	Misc. electrical products - Produits électriques divers	10.1	10.1	10.0	3.5	3.5	3.5	6.6	6.6	6.5	...	...	...
351-359	Non-metallic mineral products industries - Fabrication de produits minéraux non métalliques	32.0	31.9	32.0	9.3	9.2	9.2	22.6	22.6	22.6	...	...	...
351	Clay products - Produits en argile	1.7	1.7	1.8	0.4	0.4	0.4	1.3	1.3	1.3	...	...	...
354	Concrete products - Produits en béton	3.7	3.7	3.5	...	...	...	...	...	...	...	...	...
355	Ready-mix concrete - Béton préparé	4.2	4.1	4.2	0.8	0.8	0.9	3.3	3.3	3.3	...	...	...
356	Glass & glass products - Verre et articles en verre	9.9	9.8	9.8	2.3	2.2	2.2	7.6	7.5	7.6	...	...	...
357	Abrasives - Abrasifs	1.2	1.2	1.2	0.4	0.4	0.4	0.8	0.8	0.9	...	...	...
359	Misc. non-metallic mineral products - Produits minéraux non métalliques divers	6.2	6.3	6.2	2.4	2.4	2.4	3.7	3.8	3.8	...	...	...
365-369	Petroleum & coal products - Fabrication de produits du pétrole et du charbon	22.5	22.5	22.1	16.0	16.0	15.7	5.9	6.0	5.9	...	...	...
365	Petroleum refineries - Raffineries de pétrole	22.2	22.2	21.9	16.0	16.0	15.6	5.7	5.7	5.7	...	...	...
372-379	Chemical & chemical products industries - Industrie chimique	75.5	75.7	76.2	43.3	43.3	43.2	31.1	31.2	31.8	...	...	...
373	Plastics and synthetic resins - Matières plastiques et résines synthétiques	5.4	5.5	5.5	3.2	3.3	3.3	2.2	2.2	2.2	...	...	...
374	Pharmaceuticals & medicines - Produits pharmaceutiques & médicaments	16.5	16.5	17.3	11.1	11.2	11.3	5.1	5.1	5.6	...	...	...
375	Paint & varnish - Peinture et vernis	5.2	5.2	5.2	3.0	3.0	3.0	2.1	2.1	2.1	...	...	...
376	Soap & cleaning compounds - Savon et produits de nettoyage	6.6	6.7	6.6	3.4	3.4	3.4	3.0	3.0	3.0	...	...	...
377	Toilet preparations - Produits de toilette	5.6	5.6	5.8	3.0	2.9	3.0	2.2	2.2	2.3	...	...	...
378	Industrial chemicals - Produits chimiques industriels	22.6	22.8	22.3	12.2	12.3	11.8	10.3	10.4	10.4	...	...	...

Concepts and methods are described at the back of this publication.

Les concepts et méthodes sont décrits à la fin de la présente publication.

## CONCEPTS AND METHODS

### Objectives

The Survey of Employment, Payrolls and Hours is designed to measure, on a monthly basis, the levels and month-to-month trends of employment, paid hours and earnings. These measures are compiled at detailed industrial and geographic levels.

All industries are covered by the survey with the exception of agriculture, fishing and trapping, private household services, religious organizations, and military services.

### Source of Data

The statistics contained in this report are based on information obtained through a mail survey of firms, institutions and organizations of all sizes.

The **firm** is defined as any business entity whether incorporated or not; it comprises sole proprietorships, partnerships, corporations and other forms of organization such as co-operatives. Most firms consist of only one "establishment" (see definition under Industrial Classification) but, in some cases, the firm is made up of a number of establishments which may or may not be engaged in the same kind of economic activity.

The universe for the survey is derived from a central file of employers maintained by the Business Register and Profiling Division of Statistics Canada.

### Industrial Classification

All **firms** are assigned to an industry on the basis of their principal activity. In instances where the firm is engaged in only one kind of industrial activity, the industrial classification is straightforward. Classification problems arise when a firm is active in more than one kind of classifiable industrial activity. This usually occurs when a firm operates more than one establishment. The **establishment** (typically a factory, mine, store or a similar unit) is defined, for statistical purposes, as the smallest separate operating entity capable of reporting all elements of basic industrial data which permit the calculation of "census value added" or "gross mark up" or "gross profit" as well as data on employment and payrolls.

For purposes of detailed geographical statistics, the establishment is often sub-divided into **reporting units** which, although not capable of reporting all basic industrial statistics, can report employment, payrolls and hours data for particular locations.

The industrial classification of the statistics contained in this report is based on the 1970 version of the Standard Industrial Classification. A description of the various industries and groups of industries is contained

## CONCEPTS ET MÉTHODES

### Objectifs

L'enquête sur l'emploi, la rémunération et les heures de travail a pour objet de mesurer mensuellement les niveaux et les tendances de l'emploi, des heures rémunérées et des gains. Ces mesures sont rassemblées à des niveaux détaillés selon l'activité économique et le lieu géographique.

L'enquête vise tous les secteurs de l'activité économique sauf l'agriculture, la pêche et le piégeage, le service domestique des ménages, les organismes religieux et les services de la défense.

### Source des données

Les statistiques présentées dans ce bulletin se fondent sur des renseignements recueillis au moyen d'une enquête postale menée auprès des entreprises et autres organismes ou établissements de toutes tailles.

Le terme **entreprise** désigne toute entité commerciale ou industrielle constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une société en nom collectif, d'une corporation ou d'une autre forme quelconque d'organisation, telle une coopérative. La plupart des entreprises ne comptent qu'un seul "établissement" (voir la définition sous la rubrique "Classement par activité économique") mais, dans certains cas, l'entreprise peut regrouper plusieurs établissements qui exercent ou non le même genre d'activité.

L'univers de l'enquête est établi à l'aide d'un registre central des employeurs tenu par la Division des profils et du registre des entreprises de Statistique Canada.

### Classement par activité économique

Toutes les **entreprises** appartiennent à une branche d'activité économique déterminée en fonction de leur activité principale. Si l'entreprise n'exerce qu'un seul genre d'activité économique, le classement est simple. Les problèmes surgissent lorsqu'elle en exerce plus d'un, par exemple lorsqu'elle possède plus d'un **établissement**. À des fins statistiques, on définit l'établissement (en général une usine, une mine, un magasin ou une unité semblable) comme la plus petite unité constituant un ensemble fonctionnel distinct capable de déclarer, à l'égard de l'activité économique, tous les éléments statistiques de base qui permettent de calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut", ainsi que des données sur l'emploi et la rémunération.

Pour obtenir des statistiques géographiques détaillées, souvent on subdivise l'établissement en **unités déclarantes** qui, bien qu'elles ne puissent fournir toutes les statistiques de base, sont en mesure de déclarer des données sur l'emploi, la rémunération et les heures de travail relativement à certains endroits.

Le classement des statistiques que nous présentons dans ce volume s'inspire de la Classification des activités économiques, de 1970. Vous trouverez une description de ces diverses activités et de leurs groupements dans le bulletin de la Classification

in the "Standard Industrial Classification Manual", Catalogue No. 12-501. The "S.I.C. Code" columns on the tables correspond to the codes of this manual. These tables also contain the following groupings which are not part of the "Standard Industrial Classification Manual":

- a) Industrial aggregate (031-951) represents the sum of all the industries included in the survey (see Objectives).
- b) Goods-producing industries (031-421) comprise forestry, mining, manufacturing and construction.
- c) Service-producing industries (501 to 951) consist of transportation, communication and other utilities, trade, finance, insurance and real estate, services (except for religious organizations and private households), and public administration (with the exception of military personnel, and other government services).
- d) Durable goods manufacturing (durable) includes wood industries (251-259), furniture and fixture industries (261-268), primary metal industries (291-298), metal fabricating industries except machinery and transportation equipment (301-309), machinery industries except electrical machinery (311-318), transportation equipment industries (321-329), electrical products industries (331-339), and non-metallic mineral products industries (351-359).
- e) Non-durable goods manufacturing (non-dur) is the sum of food and beverage industries (101-109), tobacco products industries (151-153), rubber and plastic products industries (162-165), leather industries (172-179), textile industries (181-189), knitting mills (231-239), clothing industries (243-249), paper and allied industries (271-274), printing, publishing and allied industries (286-289), petroleum and coal products industries (365-369), chemical and chemical products industries (372-379), and miscellaneous manufacturing industries (391-399).
- f) Building construction (404, 421) comprises building construction (404) and special-trade contractors (421).
- g) Industrial and Heavy (Engineering) construction (406, 409) includes highway, bridge and street construction (406) and other construction (409).
- h) Education services (809T) consist of kindergartens and nursery schools (801), elementary and secondary schools (802), schools of arts and performing arts (803), vocational centers, trade schools and business colleges (804), post-secondary non-university educational institutions (805), universities and colleges (806), and education and related services (809).
- i) Public administration (909-951) contains only the establishments engaged in activities that are gov-

des activités économiques, n<sup>o</sup> 12-501 au catalogue. Les codes C.A.É. qui apparaissent dans les colonnes de certains tableaux de notre publication correspondent aux codes de ce bulletin. Les tableaux en question renferment aussi les groupes suivants, qui ne figurent pas dans la Classification des activités économiques:

- a) Ensemble des activités économiques (031-951) — Il s'agit de la somme des diverses activités économiques visées par l'enquête (voir objectifs).
- b) Branche productrice de biens (031-421) — Ce groupe englobe les forêts, les mines, les manufactures et la construction.
- c) Branche des services (501-951) — Englobe les transports, les communications et autres services publics, le commerce, les finances, assurances et affaires immobilières, les services (sauf les organismes religieux et les ménages privés), et l'administration publique (à l'exception du personnel militaire et des autres services gouvernementaux).
- d) Fabrication des biens durables (durables) — Englobe les industries du bois (251-259), l'industrie du meuble et des accessoires d'ameublement (261-268), l'industrie de première transformation des métaux (291-298), l'industrie des produits métalliques (sauf les machines et le matériel de transport) (301-309), la fabrication des machines (sauf le matériel électrique) (311-318), l'industrie du matériel de transport (321-329), l'industrie des appareils et du matériel électriques (331-339) et l'industrie des produits minéraux non métalliques (351-359).
- e) Fabrication des biens non durables (non dur.) — Englobe l'industrie des aliments et boissons (101-109), l'industrie du tabac (151-153), l'industrie du caoutchouc et des produits en matière plastique (162-165), l'industrie du cuir (172-179), l'industrie textile (181-189), la bonneterie (231-239), l'industrie de l'habillement (243-249), l'industrie du papier et des produits connexes (271-274), l'imprimerie, l'édition et industries connexes (286-289), l'industrie du pétrole, du charbon et de leurs dérivés (360-369), l'industrie chimique et des produits connexes (372-379), et les industries manufacturières diverses (391-399).
- f) Bâtiment (404, 421) — Englobe la construction de bâtiments (404) et l'activité des entrepreneurs spécialisés (421).
- g) Construction industrielle et lourde (travaux de génie) (406, 409) — Englobe la construction de routes, ponts et rues (406) et autres constructions (409).
- h) Enseignement et services connexes (809T) — Englobe les jardins d'enfants et écoles maternelles (801), les écoles primaires et secondaires (802), les écoles de beaux-arts (803), les centres de formation professionnelle, écoles de métiers et collèges commerciaux (804), les établissements d'enseignement postsecondaire non universitaire (805), les universités et collèges (806), et l'enseignement et services connexes (809).
- i) Administration publique (909-951) — Comprend les établissements dont les activités ont un caractère essentiellement

ernmental in character and those serving as internal service agencies of the public service. Government owned establishments primarily engaged in activities assigned to other industries are classified in those industries along with similar establishments owned by non-government bodies. Therefore, data included in this industry division do not represent the actual number of persons employed by government at any level.

## Geographic Classification

Reporting units are assigned to a province, a census division, an economic region (for the province of Quebec and Ontario) and, where applicable, to a metropolitan or urban area. The survey selected metropolitan and urban areas as delineated for the 1981 Census of Population; these areas usually consist of the urban centre as well as the surrounding territory and had a population of 25,000 inhabitants or more. The reporting units not located in a tabulated urban area or not allocated to a compiled census division are included in the provincial and national totals.

A description of the various geographical areas is contained in the "Standard Geographical Classification Manual, 1981", Catalogue No. 12-567.

## Definitions

### 1. Reference Period

Conceptually, the data in this report refer to the last seven days in the specified month. In practice, few firms keep payroll records covering precisely this period. Therefore, firms are asked to report for their last pay period or pay periods in each month. When the reported pay period is longer than one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period.

If, owing to **strikes**, unpaid holidays or other similar unpaid circumstances, the data reported are not representative of the last seven days of the month, adjustments are made to reflect the economic situation of the reference period (i.e. when a strike effects the last seven days of the survey month, the derived data will reflect the strike situation).

### 2. Employee

All persons drawing pay for services rendered or for paid absences and for whom the employer is required to complete a Revenue Canada T-4 Supplementary Form constitute employees.

gouvernemental, et les organismes auxiliaires assurant les services internes de l'État. Les établissements publics dont l'activité dominante relève d'autres activités économiques sont classés sous les mêmes rubriques que les établissements privés semblables. Ainsi, les données publiées pour cette division économique ne représentent pas le nombre réel de personnes employées par les différents pouvoirs publics.

## Classement géographique

On attribue les unités déclarantes à une province, à une division de recensement, à une région économique (pour les provinces suivantes: Québec et Ontario) et, s'il y a lieu, à une région métropolitaine ou urbaine. Les régions métropolitaines et urbaines choisies pour l'enquête sont celles du recensement de la population de 1981; ces régions, qui se composent habituellement d'un centre urbain et du territoire environnant, comptaient lors du dernier recensement 25,000 habitants ou plus. Les unités déclarantes situées en dehors de toute région urbaine indiquée dans les tableaux, ou non attribuées à une division de recensement prise en compte, font partie des totaux provinciaux et nationaux.

La description des diverses régions géographiques se trouve dans la "Classification géographique type, 1981", numéro 12-567 au catalogue.

## Définitions

### 1. Période de référence

En théorie, les données sur l'emploi se rapportent aux sept derniers jours du mois de référence. Dans la pratique, peu d'entreprises tiennent des registres de paye pour cette période précise; on demande donc aux répondants de faire porter leur déclaration sur la(les) dernière(s) période(s) de paye de chaque mois. Lorsque la période de paye sur laquelle porte la déclaration dépasse une semaine, on rajuste les données en divisant le nombre de jours d'activité hebdomadaire de l'entreprise par le nombre de jours ouvrables compris dans la période de paye sur laquelle porte la déclaration.

Si, en raison d'une **grève**, d'un congé non payé ou d'autres circonstances semblables, les données déclarées ne sont pas représentatives des sept derniers jours du mois, on procède aux rajustements qui s'imposent afin de traduire la situation qui régnait pendant la période de référence (cela signifie que lorsqu'une grève touche les sept derniers jours du mois d'enquête, les données qui en découlent reflètent l'état de grève).

### 2. Salarié

Toute personne rétribuée pour ses services ou ses absences et pour laquelle l'employeur doit remplir une déclaration T-4 Supplémentaire de Revenu Canada, est un salarié.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment) and casual or temporary employees (those who are hired for discontinuous periods or on an irregular basis). It also comprises working owners, directors, partners and other officers of incorporated businesses.

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self-employed, unpaid family workers, persons doing non-remunerative work, pensioners, home workers, members of elected or appointed bodies, persons working outside Canada, military personnel and persons providing services to an establishment on a contract basis. It also excludes persons who did not receive any pay from the employer for the entire survey reference period (e.g. persons on strike, persons on unpaid holidays, persons receiving remuneration from an insurance, Workmen's Compensation or other related fund, etc.); however, employees paid from the employer for a part of the reference period and unemployed or on strike for the rest are counted as employed.

The employees are classified into the following categories:

- a) **Employees paid by the hour**  
Any employee whose basic wage is expressed as an hourly rate.
- b) **Salaried Employees**  
Any employee whose basic remuneration is a fixed amount for a period of at least one week.
- c) **Other Employees**  
Those employees whose basic remuneration is in the form of commissions, piece rates, mileage allowances, etc.
- d) **Non-teaching Staff**  
All employees other than teachers and academic staff, i.e. president, vice-president, librarian, registrar, bursar, accountant, guidance counsellor, laboratory technician, personnel officer, and other services (e.g. janitor, caretaker, bus driver, etc.)
- e) **Teaching Staff**  
Those classified as teachers, instructors or academics in the payroll records (e.g. principal, professor, dean, head of department, master, teacher, etc.) whether they teach during the day or evening. Supply or substitute teachers are excluded.
- f) **Supply or Substitute Teachers**  
Teachers who are called in to teach whenever their services are needed either to augment

Le terme "salariés" désigne les salariés à temps plein, les salariés à temps partiel (ceux qui travaillent régulièrement un nombre d'heures inférieur à la semaine normale de travail de l'entreprise) et les salariés occasionnels ou temporaires (ceux qui sont embauchés de façon irrégulière ou temporaire). Il désigne aussi les propriétaires, les administrateurs, les associés et les autres dirigeants actifs des entreprises constituées en corporation.

Le concept de salarié exclut les propriétaires et les associés des entreprises non constituées en corporation et ceux des bureaux voués à l'exercice d'une profession libérale, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les retraités, les travailleurs à domicile, les membres des corps élus ou nommés, les personnes travaillant à l'extérieur du Canada, le personnel militaire et les personnes fournissant des services à un établissement sur une base forfaitaire. Sont également exclus les travailleurs n'ayant pas reçu de paye de leur employeur pendant la période de référence de l'enquête (i.e. les personnes en grève, en congé non payé, celles recevant une rémunération aux termes d'un régime d'assurance, d'une caisse d'indemnisation des accidents au travail ou d'une caisse analogue, etc.); cependant, les travailleurs rémunérés par leur employeur pour une partie de la période de référence, mais en chômage ou en grève pendant l'autre partie, sont quand même considérés comme salariés.

Les salariés sont classés dans les catégories suivantes:

- a) **Salariés rémunérés à l'heure**  
Tout salarié dont la rémunération de base est calculée selon un taux horaire.
- b) **Employés**  
Tout salarié dont la rémunération de base constitue une somme fixe versée pour une période d'au moins une semaine.
- c) **Autres salariés**  
Tout salarié dont la rémunération de base se présente sous forme de commissions, de salaire à la pièce, d'indemnités de trajet, etc.
- d) **Personnel non enseignant**  
Tous les salariés autres que le personnel enseignant, c'est-à-dire le président, le vice-président, le bibliothécaire, le secrétaire général, l'économiste, le comptable, les orienteurs, les techniciens de laboratoire, les agents du personnel, le concierge, les chauffeurs d'autobus, etc.
- e) **Personnel enseignant**  
Tout travailleur classé comme enseignant ou chargé de cours dans les dossiers du service de la paye (directeur, professeurs, doyens, chefs de département, maîtres, enseignants, etc.), qu'il enseigne le jour ou le soir. Les suppléants ou remplaçants sont exclus.
- f) **Suppléants ou remplaçants**  
Enseignants appelés à se présenter au travail lorsqu'on a besoin de leurs services soit pour accroître le

the existing staff or as a short-term replacement for a full-time or part-time teacher.

### 3. Earnings

Earnings represent gross pay before deductions for taxes, unemployment insurance contributions, etc.

The payroll concept does not include supplementary labour costs such as employer's contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or director's fees.

#### a) Gross Pay

Gross pay includes salaries, straight-time wages, piece-work and regular commission earnings, regular paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey reference week.

#### b) Overtime Pay

All pay received for the number of hours worked in excess of the standard workday or workweek.

### 4. Hours

#### a) Total hours paid

All hours worked, including overtime hours, **plus** hours of paid absence (e.g. holidays, vacation, sick leave, jury duty, etc.)

#### b) Overtime Hours

The total hours for which overtime was paid. These represent the hours worked.

### 5. Paid Absence

Paid absence comprises paid holidays, vacation, sick leave including industrial injury and personal leave such as bereavement leave, jury duty, etc.

### 6. Standard Workweek

The hours in the standard workweek constitute the average number of hours of work normally scheduled in a workweek.

personnel existant, soit pour remplacer pendant une courte période un enseignant à temps plein ou à temps partiel.

### 3. Gains

Les gains représentent la rémunération brute avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc.

Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents, ni les jetons de présence des administrateurs.

#### a) Rémunération brute

Comprend les salaires, les traitements à taux ordinaires, la rémunération du travail à la pièce et les commissions régulières, ainsi que les primes, indemnités de vie chère et autres gratifications versées régulièrement, les payes de surtemps et la rémunération des absences payées dans la semaine de référence de l'enquête.

#### b) Rémunération du temps supplémentaire

Ensemble de la rémunération versée pour le nombre d'heures de travail effectuées en sus de la journée ou de la semaine normale de travail.

### 4. Heures

#### a) Nombre total d'heures payées

Ensemble des heures travaillées, y compris les heures supplémentaires, **plus** les heures de congé (par ex., les jours fériés, les vacances, les congés de maladie, les congés pour service judiciaire, etc.)

#### b) Heures supplémentaires

Total des heures payées à un taux majoré; il s'agit d'heures réellement travaillées.

### 5. Absence payée

Les absences payées comprennent toutes les heures rémunérées dans le cas des jours fériés payés, des vacances, des congés de maladie, ainsi que des congés d'accident du travail et des congés pour motifs personnels tels que les congés de deuil et les congés pour service judiciaire.

### 6. Semaine normale de travail

Les heures d'une semaine normale de travail reflètent la moyenne des heures de travail normalement fixées pour une semaine.

## 7. Take-all and Take-some Units

Take-all units are reporting units of firms or organizations which are included in the survey sample with certainty every month. These include:

- a) All firms or organizations with 200 or more employees;
- b) All firms with more than one reporting unit;
- c) Firms which report their survey data on computer listings rather than on the standard questionnaire;
- d) Units of government departments and crown corporations;
- e) Units belonging to elementary and secondary schools;
- f) Certain other pre-specified units or firms.

Take-some units are all the other firms in the universe which have a known probability of selection.

## Methodology

The statistics contained in this publication are based on information obtained through a sample survey of reporting units. The data is collected by means of questionnaires mailed monthly to a sample of about 70,000 reporting units selected out of a universe of about 700,000. The sample covers all industries in scope for the survey, all provinces and territories and all sizes of units. Both the universe and the sample are updated monthly for births and deaths.

## Stratification

For the determination of the survey sample size and for the purpose of the sample selection, the universe of reporting units is stratified by 12 provinces and territories, 16 industry groups and 4 size groups. (An industry group is slightly more detailed than the 1-digit industry code). The size of a unit is defined to be the total number of paid employees in that unit. The four size groups are 0 to 19, 20 to 49, 50 to 199 and 200 or more employees.

The universe of reporting units is further stratified into **take-all** and **take-some** categories as defined earlier under Definitions.

## 7. Unités à tirage complet et à tirage partiel

Les unités à tirage complet sont les unités déclarantes d'entreprises ou d'organisations incluses en permanence dans l'échantillon de l'enquête. Elles comprennent:

- a) toutes les entreprises de 200 salariés ou plus;
- b) toutes les entreprises ayant plus d'une unité déclarante;
- c) les entreprises qui déclarent leurs données au moyen d'un imprimé d'ordinateur plutôt qu'à l'aide du questionnaire;
- d) unités des services gouvernementaux et des sociétés de la couronne;
- e) unités propres aux écoles primaires et secondaires;
- f) d'autres unités ou entreprises préalablement choisies.

Les unités à tirage partiel sont toutes les autres entreprises qui ont une probabilité connue de ne pas être choisies dans l'échantillon de l'enquête. Lorsqu'elles sont choisies, de telles unités sortent de l'enquête après un certain nombre de mois.

## Méthodologie

Les statistiques présentées dans cette publication se fondent sur les résultats d'une enquête effectuée par sondage auprès d'unités déclarantes. Les données sont recueillies au moyen d'un questionnaire posté tous les mois à un échantillon de quelque 70,000 unités déclarantes provenant d'un univers d'environ 700,000 unités. L'échantillon couvre toutes les activités économiques que vise l'enquête, ainsi que les toutes les provinces et les territoires et toutes les tailles d'unité. Chaque mois, nous mettons à jour l'univers ainsi que l'échantillon, en tenant compte des créations et des disparitions d'unités ou d'entreprises.

## Stratification

Pour déterminer la taille et la composition de l'échantillon, nous répartissons l'univers des unités déclarantes en 12 provinces et territoires, 16 groupes industriels (activités économiques) et quatre groupes de taille. (Un groupe industriel est légèrement plus détaillé qu'une industrie dont le code n'a qu'un chiffre). La taille d'une unité se définit comme étant le nombre total de salariés rémunérés que compte cette unité. Les quatre groupes de taille sont 0 à 19, 20 à 49, 50 à 199 et 200 salariés et plus.

En outre, l'univers des unités déclarantes est stratifié en deux catégories: les unités à **tirage complet** et les unités à **tirage partiel**, au sens que nous avons précisé dans la section "Définitions".

## Sample allocation and selection

The size of the take-some sample for the survey has been determined so as to provide estimates of total number of paid employees at the industry group and province level with a prespecified reliability. The determination has been done under the requirement that the sample at the industry group and province level is allocated to each size group in proportion to the total estimated take-some employment in that size group. If the sampling fraction resulting from this allocation is less than .01, then a minimum sampling fraction of .01 is adopted in order to avoid unusually large weights. The allocation makes the probability of inclusion of a unit in the sample in a size stratum approximately proportional to the average number of employees per unit in that size stratum. The sample design, therefore, provides for a small sample of small reporting units if the concentration of employment is mainly in the large reporting units. On the other hand, if the proportion of total employment from small reporting units is substantial, then the sample will include a large number of small reporting units.

The number of reporting units to be selected at the industry group, province and size levels is again allocated to each three-digit industry within that industry group, province and size in proportion to the total number of reporting units in that three-digit industry. In other words, the sampling fraction used at the three-digit industry level is the same as the one determined at the industry group, province and size. However, it should be noted that a minimum sample of three units is selected whenever the use of the sampling fraction results in less than 3 units. If the universe itself is less than three units, then all the units are taken into the sample.

A systematic sample of the predetermined number of units is drawn from the take-some universe in every three-digit industry, province and size group. The total sample is the sum of the number of take-all and selected take-some units.

## Sample rotation

The design provides for rotation of the take-some sample within a three-digit industry, province and size group. Each month, approximately one-twelfth of the take-some sample is replaced. This means that units generally remain in the sample for 12 months before rotating out. The units are not eligible for reselection for at least 12 months after they rotate out.

In some small three-digit industry, province and size group cells it may not be possible to rotate out units each month. Consequently, in some small cells, units may have to stay longer than 12 months.

## Répartition et choix de l'échantillon

La taille de la portion à tirage partiel de l'échantillon a été déterminée de façon à fournir, avec une fiabilité prédéterminée, des estimations du nombre total de salariés rémunérés, au niveau du groupe industriel et de la province. Ce calcul tient compte du fait que l'échantillon, au niveau du groupe industriel et de la province, doit être réparti dans chaque groupe de taille proportionnellement à l'estimation de l'emploi total au sein de la portion à tirage partiel de chacun des groupes de taille. Si la fraction d'échantillon résultant de cette répartition est inférieure à 0.01, on la remplace alors par la fraction minimale 0.01 afin d'éviter toute pondération excessive. La répartition est telle que la probabilité qu'une unité entre dans une strate particulière de l'échantillon est à peu près proportionnelle au nombre moyen de salariés par unité comprise dans cette strate. Le plan d'échantillonnage prévoit donc un petit échantillon de petites unités déclarantes lorsque l'emploi se concentre principalement dans les grandes unités déclarantes. Par contre, si l'emploi total provenant des petites unités déclarantes est élevé, alors l'échantillon contiendra un grand nombre de petites unités déclarantes.

Le nombre d'unités qu'il faut choisir au niveau du groupe industriel, de la province et de la taille est, en outre, réparti entre chacune des industries ayant un code à trois chiffres, lesquelles font partie du groupe industriel, de la province et de la taille considérés; cette répartition se fait proportionnellement au nombre total d'unités déclarantes comprises dans l'industrie dont le code comporte trois chiffres. En d'autres termes, la fraction d'échantillon utilisée au niveau industriel à trois chiffres est la même que celle déterminée pour le groupe industriel, la province et la taille. Il faut cependant noter que l'échantillon minimal est de trois unités, peu importe le résultat obtenu en utilisant la fraction d'échantillon. S'il y a moins de trois unités dans l'univers, toutes les unités disponibles sont incluses dans l'échantillon.

Au sein de la portion à tirage partiel, on choisit un échantillon systématique d'un nombre prédéterminé d'unités dans chaque industrie ayant un code à trois chiffres, et ce dans chaque province et chaque groupe de taille. L'échantillon total résulte de la somme du nombre d'unités à tirage complet et du nombre d'unités à tirage partiel sélectionnées.

## Rotation de l'échantillon

Pour chaque industrie (code à trois chiffres), province et groupe de taille, le plan prévoit une rotation de la portion à tirage partiel de l'échantillon. Chaque mois, le douzième environ de la portion à tirage partiel de l'échantillon est remplacé. Cela signifie qu'en général les unités demeurent 12 mois dans l'échantillon avant d'en sortir par voie de rotation. Les unités ne peuvent pas être choisies de nouveau avant au moins 12 mois suivant leur mois de sortie.

Dans le cas de certaines petites cellules (une cellule regroupe les unités de même industrie au niveau du code à trois chiffres, même province et même groupe de taille), il est parfois impossible d'assurer la rotation des unités chaque mois. Ainsi, il peut arriver que des unités demeurent plus de douze mois dans certaines petites cellules.

## Data edit and correction

All the questionnaires are initially screened for completeness by the interviewers of the Statistics Canada regional offices. Thereafter, extensive computer edit procedures for accuracy and consistency are performed at the Ottawa head office. As a result of any of the above-mentioned editing techniques, the respondent may be contacted to confirm or explain the data.

The edit procedures include the comparison of the values of key characteristics (e.g. number of employees, hours worked, salary per employee, etc.) reported for consecutive months by the same unit in order to detect large changes or errors in reporting. Whenever there is a large change or the data appears inconsistent, the record is signaled by the computer edit for review and is subject to correction or acceptance as appropriate.

## Follow-up

Reporting units which are non-respondents to the initial mailing are followed up by telephone by the staff of the regional offices of Statistics Canada. Priority for this follow-up is given to (i) units which are in the sample for the first time and which have not responded, (ii) units which have not responded for two consecutive months, (iii) large nonrespondent units. Follow-up also takes into account response rates and employment in the various industry groups in determining priority.

If units continue to be non-respondents even after follow-up, then data will be imputed for these units. All the records with imputed values are subject to the edits mentioned above.

## Imputation

Imputation for nonrespondent units which have been in the survey for more than one month is based on the ratio of the monthly changes. The ratio of the monthly change for each characteristic is calculated from units that responded both in the current and the previous month and is applied to the previous month's data of each nonrespondent.

For the nonresponding units that are new to the survey, imputation is based on other sources of information such as the employment intention of the unit, the characteristics of the responding units in the same industry group, province and size.

## Estimates

The basic "building block" for producing the monthly estimates is the three-digit industry, province and size group. Estimates at higher levels are obtained by the aggregation of the above estimates. Estimates of averages are obtained by first estimating the totals for the

## Vérification des données et correction

Au départ, les interviewers des bureaux régionaux de Statistique Canada s'assurent que tous les questionnaires sont complets. Ultérieurement, le personnel du bureau d'Ottawa vérifie par ordinateur l'exactitude et la cohérence des chiffres déclarés. À chacune de ces deux étapes de vérification, un répondant peut donc être prié de confirmer ou d'expliquer ses chiffres.

Nos procédés de vérification nous permettent de comparer les valeurs de certaines caractéristiques (nombre de salariés, heures de travail, gains par salarié, etc.) déclarées par la même unité plusieurs mois de suite. Ainsi, il est possible de déceler les grandes variations ou les erreurs, s'il en est. Chaque fois qu'une forte variation apparaît ou que les données semblent incohérentes, l'ordinateur signale le cas, et l'enregistrement est aussitôt corrigé s'il comporte effectivement une erreur.

## Méthode de suivi

Le personnel des bureaux régionaux de Statistique Canada relance par téléphone les unités déclarantes qui tardent à répondre au questionnaire. Cette méthode de suivi s'adresse en priorité (i) aux unités qui font partie de l'échantillon pour la première fois et qui n'ont pas encore répondu; (ii) aux unités qui accusent un retard de deux mois consécutifs; (iii) aux grandes unités non répondantes. Pour déterminer l'ordre de priorité des suivis, on tient compte des taux de réponse et du volume de l'emploi dans les différents groupes industriels.

Lorsque des unités persistent à ne pas répondre même après le suivi, des données leurs sont imputées. Tous les enregistrements dont les données découlent d'une imputation sont soumis aux vérifications mentionnées ci-dessus.

## Imputation

L'imputation de données aux unités non répondantes comprises dans le champ de l'enquête depuis plus d'un mois est basée sur le ratio des variations mensuelles de ces unités. Le ratio de la variation mensuelle d'une caractéristique se calcule à partir des unités qui ont répondu pour le mois courant et le mois précédent, et s'applique aux données du mois précédent de chaque unité non répondante.

Dans le cas des unités non répondantes qui figurent dans l'enquête pour la première fois, l'imputation se fonde sur d'autres sources d'information telles que les prévisions d'emploi de l'unité et les caractéristiques des unités déclarantes du même groupe industriel, de la même province et de la même taille.

## Estimations

L'élément de base qui sert à établir les estimations est l'industrie (code à trois chiffres), la province et la taille. Les estimations plus agrégatives sont obtenues par la sommation des estimations susdites. Pour calculer les moyennes, on estime d'abord les totaux du numérateur et ceux du dénominateur, au

numerator and the denominator at the desired level and then calculating the ratio. Estimates for certain sub-provincial areas are also produced, treating the sub-province as a domain. Coefficients of variation for estimates of some key characteristics at all levels are also produced.

Provision has also been made in the estimation procedure to change the weights of "unusually large" observations occurring in size groups 1, 2 and 3. These observations are termed "outliers" and are judged not to be representative of other units in that size group. The weights of the remaining units are adjusted accordingly.

### Reliability of the estimates

There are two types of errors possible in estimates based on a sample survey: sampling and non-sampling.

**Sampling errors** occur because observations are made only on a sample rather than on the entire universe. Estimates based on a sample differ from the figures that would have been obtained if a complete census had been taken using the same questionnaires, instructions, interviewers and processing techniques. This difference with respect to a particular estimate is called the sampling error of the estimate.

**Non-sampling errors** are errors which are not related to sampling and may occur in a survey operation for many reasons. Non-response, coverage and classification errors, differences in the interpretation of the questions, incorrect information from respondents, mistakes in recording, coding and processing of data are examples of non-sampling errors. It should be noted that non-sampling errors also occur in complete censuses. In the Survey of Employment, Payrolls and Hours, efforts to reduce non-sampling errors include careful design of questionnaires, editing of data, follow-up of and imputation for non-respondents and thorough control of processing operations.

### Indicators of sampling error

The sampling error, as described above, is not known. However, it can be estimated from the sample itself by using a statistical measure called the **standard error** of a survey estimate. When the standard error is expressed as a percent of the estimate, it is known as the relative standard error or coefficient of variation.

Alphabetic symbols of the coefficient of variation are used in this publication (see Tables A to F at the end of this explanatory note) to give an indication of the reliability of the estimates and are based on a 12-month average of the coefficients of variation. The ranges of the coefficients of variation and their corresponding alphabetic indicator are given in the following table.

niveau désiré, puis on en fixe le ratio. Nous produisons aussi des estimations concernant certaines régions infraprovinciales, considérant chacune de ces régions comme un domaine. Enfin, nous calculons des coefficients de variation pour les estimations de certaines caractéristiques clés, à tous les niveaux.

Le procédé d'estimation comporte en outre des mécanismes qui permettent de changer les poids lorsque des observations "exceptionnellement grandes" apparaissent chez les unités des groupes de taille 1, 2 ou 3. Ces observations, dites "aberrantes", ne sont pas représentatives des autres unités du même groupe de taille, de sorte que l'on rajuste les poids des autres unités en conséquence.

### Fiabilité des estimations

En ce qui concerne les estimations basées sur un sondage, il existe deux types d'erreurs possibles, soit les erreurs d'échantillonnage et les erreurs non liées à l'échantillonnage.

Les **erreurs d'échantillonnage** proviennent de ce que les observations se font à partir d'un échantillon au lieu de l'univers complet. Les estimations basées sur un échantillon diffèrent des statistiques que l'on obtiendrait d'un recensement complet effectué au moyen des mêmes questionnaires, des mêmes directives, des mêmes interviewers et des mêmes techniques de traitement. Cette différence, lorsqu'il s'agit d'une estimation particulière, s'appelle erreur d'échantillonnage de l'estimation.

Les **erreurs non dues à l'échantillonnage** ne se rattachent pas à l'échantillon et peuvent se produire tout au long d'une enquête pour plusieurs raisons. Les cas de non-réponse, les anomalies de couverture et de classification, les différences d'interprétation des questions, la communication de renseignements inexacts par les répondants et les fautes d'entrée, de codage et de traitement des données sont autant d'erreurs non attribuables à l'échantillonnage. Il faut noter que des erreurs de ce genre peuvent aussi se produire dans les recensements. Pour l'enquête sur l'emploi, la rémunération et les heures de travail, nous avons tenté d'en réduire le risque par une formulation soignée des questionnaires, par une vérification rigoureuse des chiffres déclarés, par le travail de suivi, par l'imputation de données aux unités non répondantes et par un contrôle attentif des techniques de traitement.

### Indicateurs des erreurs d'échantillonnage

L'erreur d'échantillonnage que nous venons de décrire reste inconnue. On peut cependant l'estimer à partir de l'échantillon, en utilisant une mesure appelée **écart-type** d'une estimation de sondage. Lorsque l'écart-type est exprimé en pourcentage de l'estimation, on l'appelle écart-type relatif ou coefficient de variation.

Dans la présente publication, nous utilisons des symboles littéraux de coefficient de variation (voir tableaux A à F à la fin de cette note explicative), pour indiquer le degré de fiabilité des estimations; cette symbolisation repose sur la moyenne des coefficients de variation de 12 mois. Les intervalles de confiance des coefficients de variation et les symboles correspondants sont précisés dans le tableau suivant.

## ALPHABETIC INDICATORS OF COEFFICIENT OF VARIATION

Alphabetic Indicator	Range of Coefficient of Variation Percent
A	0 - 1.0
B	1.1 - 2.5
C	2.6 - 5.0
D	5.1 - 10.0
E	10.1 - 15.0
F	15.1 - 25.0
G	> 25.0

The sample estimate and its standard error (derived from the coefficient of variation) may be used to construct an interval within which the unknown census value is expected to be contained with a prescribed confidence. The particular sample used in this survey is one of a large number of all possible samples of the same size that could have been selected using the same sample design. Estimates derived from the different samples would differ from each other. If intervals from two standard errors below the estimate to two standard errors above the estimate are constructed using each of the above estimates, then approximately 19 out of 20 of the intervals would include the census value. Such an interval is called a 95 percent confidence interval. For example, let the estimate under consideration be the total number of paid employees at Canada level in Construction and say it is 450,000 employees. If the estimate has a reliability indicator A, then assuming that the coefficient of variation of the estimate is 1%, the standard error of the estimate would be 4,500 employees. Therefore, in this case, one can say with 95% confidence that the census value of total paid employees in Construction is included in the interval 441,000 to 459,000 employees.

In general, the estimates of monthly changes are expected to be more reliable than the estimates of levels due to the large overlap of reporting units in the monthly samples and the high correlation between the reported values for two consecutive months.

## Statistical Presentation

### 1. Data Revision

Each month, statistics for the two latest months are prepared from the survey of Employment, Payrolls and Hours. Data for the most current month are titled **preliminary** estimates and are based on a response rate of around 80%. Estimates are also prepared for the month immediately preceding the most current month; these are known as **revised** estimates and are based on a higher rate of response (approximately 90%).

## INDICATEURS LITTÉRAUX DU COEFFICIENT DE VARIATION

Indicateur littéral	Intervalle de confiance du coefficient de variation en pourcentage
A	0 - 1.0
B	1.1 - 2.5
C	2.6 - 5.0
D	5.1 - 10.0
E	10.1 - 15.0
F	15.1 - 25.0
G	> 25.0

L'estimation de l'échantillon et son écart-type (établi d'après le coefficient de variation) peuvent servir à construire un intervalle à l'intérieur duquel s'inscrira, sous réserve d'une limite de confiance prédéterminée, la valeur inconnue que l'on obtiendrait par recensement. L'échantillon sur lequel s'appuie notre enquête n'est qu'un des multiples fragments de même taille que nous aurions pu choisir en utilisant le même plan. Les estimations tirées d'autres échantillons du même univers diffèreraient les unes des autres. Si l'on construisait des intervalles allant de deux écarts-types sous l'estimation à deux écarts-types au-dessus de l'estimation, en utilisant chacune des estimations possibles (selon l'échantillon choisi), environ 19 intervalles sur 20 contiendraient alors la valeur que donnerait un recensement. Ce genre d'intervalle se nomme intervalle de confiance à 95%. Prenons par exemple comme estimation le nombre total de salariés de la construction pour l'ensemble du Canada, et supposons que ce nombre soit 450,000. Si l'indicateur de fiabilité de cette estimation est A, et si son coefficient de variation s'établit à 1%, alors l'écart-type de l'estimation sera de 4,500 salariés. Dans ce cas, on peut donc dire avec 95% de confiance que le nombre total de salariés de la construction, obtenu par recensement, se situe dans l'intervalle 441,000 à 459,000 salariés.

En général, on s'attend à ce que les estimations des variations mensuelles soient plus fiables que les estimations de niveaux, par suite de l'ample chevauchement des unités déclarantes au sein des échantillons mensuels, et de la forte corrélation qui existe entre les valeurs déclarées pour deux mois consécutifs.

## Présentation statistique

### 1. Révision des données

Chaque mois, nous préparons, à l'égard des deux derniers mois, des statistiques tirées de l'enquête sur l'emploi, la rémunération et les heures de travail. Les données du mois le plus récent sont appelées estimations **préliminaires** et se fondent sur un taux de réponse d'environ 80%. Nous établissons également des estimations pour le mois qui précède le mois le plus récent; il s'agit d'estimations **révisées** qui prennent appui sur un taux de réponse plus élevé (environ 90%).

## 2. Data Release

As soon as the estimates become available, selected highly aggregated statistics are released in the Statistics Canada Daily, while detailed data are entered in the Canadian Socio-Economic Information Management System (i.e. CANSIM).

Detailed estimates appear in this report at a later date.

## 3. Rounding

Totals and averages for any level of geographical or industrial aggregation are calculated using unrounded figures and then rounded using the usual procedure adopted by Statistics Canada. Published employment figures are rounded to hundreds. The sum of individually rounded items may not always equal the total.

## 4. Averages

The average weekly earnings (including overtime) is obtained by dividing the total weekly payrolls by the number of employees. It is calculated for the total number of employees, for the hourly-rated employees, for the salaried employees, and for the other types of employees.

The average weekly overtime earnings is derived by dividing the overtime weekly payrolls by the number of employees. It is calculated for the total number of employees, the hourly-rated employees and the salaried employees.

The average hourly earnings (including overtime) is obtained by dividing the total weekly payrolls by the total weekly number of hours (the total weekly number of hours is reported for the hourly-rated employees while, for salaried employees, it is derived by multiplying the average standard workweek hours by the number of salaried employees). It is calculated for the hourly-rated employees and for the salaried employees.

The average hourly overtime earnings is calculated for the hourly-rated employees by dividing the overtime weekly payrolls by the weekly number of overtime hours reported for this group of employees.

The average weekly hours (including overtime) is obtained by dividing the total weekly number of hours by the number of employees. This statistic is calculated for the hourly-rated employees and the salaried employees.

The average weekly overtime hours is derived by dividing the weekly number of overtime hours by the number of employees. This average is calculated for the hourly-rated employees.

## 2. Diffusion des données

Dès que les estimations requises sont disponibles, des statistiques choisies à un niveau d'aggrégation élevé paraissent dans le Quotidien de Statistique Canada, tandis que les chiffres détaillés sont introduits dans le Système canadien d'information socio-économique (CANSIM).

Les estimations détaillées apparaissent dans ce bulletin plus tard.

## 3. Arrondissement

Les totaux et les moyennes des divers niveaux d'agrégation géographique ou industrielle sont calculés au moyen des chiffres bruts, ensuite arrondis conformément à la méthode d'arrondissement habituelle de Statistique Canada. Les nombres publiés concernant l'emploi sont arrondis à la centaine. Par conséquent, il peut arriver que la somme des chiffres arrondis individuellement ne corresponde pas au total.

## 4. Moyennes

On obtient les rémunérations hebdomadaires moyennes (y compris celles du temps supplémentaire) en divisant les rémunérations hebdomadaires totales par le nombre de salariés. Ces moyennes sont calculées à l'égard du nombre total de salariés, de salariés rémunérés à l'heure, d'employés et des autres catégories de salariés.

Pour obtenir les rémunérations hebdomadaires moyennes du temps supplémentaire, on divise les rémunérations hebdomadaires pour le temps supplémentaire par le nombre de salariés. Ces moyennes sont calculées à l'égard du nombre total de salariés, de salariés rémunérés à l'heure et d'employés.

On obtient les gains horaires moyens (y compris la rémunération pour le temps supplémentaire) en divisant les rémunérations hebdomadaires totales par le nombre total hebdomadaire d'heures travaillées (le nombre total d'heures hebdomadaires est celui déclaré pour les salariés rémunérés à l'heure, tandis que dans le cas des employés on l'établit en multipliant la moyenne des heures fournies pendant la semaine normale de travail par le nombre d'employés). Nous calculons cette statistique à l'égard des salariés rémunérés à l'heure et des employés.

Quant au temps supplémentaire, on calcule les gains horaires moyens des salariés rémunérés à l'heure en divisant les rémunérations hebdomadaires pour le temps supplémentaire par le nombre d'heures supplémentaires hebdomadaires déclarées pour ce groupe de salariés.

Pour déterminer les heures hebdomadaires moyennes (y compris les heures supplémentaires) on divise le total des heures hebdomadaires par le nombre de salariés. Cette statistique est établie à l'égard des salariés rémunérés à l'heure ainsi qu'à l'égard des employés.

Pour calculer les heures supplémentaires moyennes hebdomadaires on divise le nombre d'heures supplémentaires hebdomadaires par le nombre de salariés.

The average weekly earnings (excluding overtime) is obtained by dividing the weekly payrolls, which exclude the overtime weekly payrolls, by the number of employees. This estimate is calculated for hourly-rated employees and salaried employees.

## 5. Unpublished Data

A large number of non-confidential detailed industrial and geographic estimates are compiled but not included in this report. Although the reliability of these estimates is lower than the reliability of the published estimates, these data will be available on request on a cost recovery basis.

In addition to the total number of employees for the education industry, data are also available for the teaching and non-teaching staff separately.

## 6. CANSIM

Data published in this report are also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System).

Tables giving the CANSIM matrix numbers, the CANSIM series numbers and the types of survey estimates are presented at the end of this explanatory text (see Tables I to V) to provide the user with an easy and quick link to the CANSIM system.

Generally speaking, the CANSIM matrix number identifies a type of survey estimates for a particular geographic area, while the CANSIM series number represents an industrial level. Owing to the different types of data aggregations (all units, take-all units, take-some units) and to the large number of survey estimate types (number of employees, average hourly earnings of hourly-rated employees, etc.), the user will have to follow the steps given hereafter to select the proper CANSIM matrix and series numbers.

a) Determine the type of tabulated information needed (this will define the value of "x" for the CANSIM series number of Table II):

- i) Aggregation of all survey units has the value 1,
- ii) Aggregation of take-all units has the value 2 and
- iii) Aggregation of take-some units has the value 3.

b) Determine the type of survey estimates required; this will provide the value of "y" for the CANSIM series number. This value is obtained by consulting Table I which lists the 20 types of survey estimates; the number of salaried employees, for example, constitutes type 2.

La moyenne des rémunérations hebdomadaires (temps supplémentaire exclu) s'obtient en divisant les rémunérations hebdomadaires, qui excluent les rémunérations hebdomadaires pour le temps supplémentaire, par le nombre de salariés. Cette estimation est calculée à l'égard des salariés rémunérés à l'heure, de même qu'à l'égard des employés.

## 5. Données non publiées

Nous établissons, aux niveaux industriel et géographique, un grand nombre d'estimations non confidentielles détaillées qui, toutefois, ne figurent pas dans le présent ouvrage. Bien que leur fiabilité soit plus faible que celle des estimations publiées, ces données peuvent être obtenues sur demande sur une base de recouvrement des coûts.

Outre le chiffre total des salariés du domaine de l'éducation, nous pouvons aussi fournir des données distinctes concernant le personnel enseignant et le personnel non enseignant.

## 6. CANSIM

Les données qui apparaissent dans la présente publication sont également disponibles sous une forme ordiolingue dans CANSIM (Système canadien d'information socio-économique).

Les intéressés trouveront à la fin de ces notes explicatives des tableaux indiquant les numéros des matrices CANSIM, les numéros des séries CANSIM et les types d'estimations de l'enquête (voir tableaux I à V). Ces tableaux fournissent à l'utilisateur un moyen d'accès facile et rapide au système CANSIM.

De façon générale, le numéro de matrice CANSIM désigne un type d'estimation de l'enquête pour une région géographique particulière, tandis qu'un numéro de série CANSIM désigne un niveau industriel. En raison de la multiplicité des types d'agrégation (ensemble des unités, unités à tirage complet, unités à tirage partiel) et des nombreux types d'estimations de l'enquête (nombre de salariés, salaires horaires moyens des salariés rémunérés à l'heure, etc.), l'utilisateur devra franchir les étapes suivantes pour choisir les bons numéros de matrice et de série CANSIM.

a) Déterminer le type désiré de totalisation parmi les cas suivants (cette opération définira la valeur de "x" pour le numéro de série CANSIM au tableau II):

- i) ensemble des unités de l'enquête: vaut 1,
- ii) unités à tirage complet: vaut 2 et
- iii) unités à tirage partiel: vaut 3.

b) Déterminer le type requis d'estimations de l'enquête; cette opération fixera la valeur de "y" pour le numéro de série CANSIM. On obtient cette valeur en consultant le tableau I, qui contient la liste des 20 types d'estimations de l'enquête; le type "employés", par exemple, a la valeur 2.

- c) Determine the industrial level needed and refer to the Industry Code column of the CANSIM series number Table II to find the rest of the series number (e.g. Industry Code 031 has series number **x.y.1.1.1.1**).
- d) Determine the geographical level required and refer to the CANSIM matrix number tables (Tables III to V) to select the appropriate matrix number.

A specific example would be as follows. The "average weekly overtime earnings of salaried employees" for "all survey units" is needed for the Ontario total manufacturing. The CANSIM series number will be 1.13.1.1.3 according to:

- i) The "x" value of 1 for the "All survey units" aggregation,
- ii) The "y" value of 13 for the type of survey estimates and
- iii) The tail-end of the series number 1.1.3 for the manufacturing Industry Code 101-399.

The CANSIM matrix number will be 8375 because the type of estimates 13 is required for Ontario.

It should be noted that only two types of survey estimates are available for the Census Agglomerations (i.e. estimates 01: total number of employees, and 05: average weekly earnings (including overtime) of all employees), while twenty types of estimates are available for Canada, the provinces and the Census Metropolitan Areas.

For further information on CANSIM call (613) 991-1150 or write CANSIM Division, Statistics Canada, R.H. Coats BLDG., Ottawa, Ontario, K1A 0T6.

## 7. Confidentiality

The information presented in this publication has been reviewed to ensure that the confidentiality of individual responses is respected.

- c) Déterminer le niveau industriel désiré et utiliser la colonne "code des industries" du tableau II des numéros de série CANSIM pour trouver les autres chiffres du numéro de série (par ex. le code d'industrie 031 possède le numéro de série **x.y.1.1.1.1**).
- d) Déterminer le niveau géographique requis et utiliser les tableaux de numéros de matrice CANSIM (Tableaux III à V) pour choisir le numéro de matrice approprié.

Voici un exemple. Supposons que l'on veuille connaître la "rémunération hebdomadaire moyenne du surtemps des employés" de "l'ensemble des unités de l'enquête" pour les manufactures de l'Ontario. Le numéro de série CANSIM sera 1.13.1.1.3, puisque:

- i) la valeur de "x" pour le groupe "ensemble des unités de l'enquête" est 1,
- ii) la valeur de "y" pour le type d'estimation est 13, et
- iii) la fin du numéro de série pour le "code d'industrie" des manufactures 101-399 est 1.1.3.

Le numéro de matrice CANSIM sera 8375, car le type d'estimation 13 s'applique à l'Ontario.

Notons qu'il n'existe que deux types d'estimations au niveau des agglomérations de recensement (i.e. les estimations 01: nombre total des salariés, et 05: salaires hebdomadaires moyens (y compris le surtemps) pour l'ensemble des salariés), alors qu'il y a vingt types d'estimations disponibles aux niveaux du Canada, des provinces et des régions métropolitaines.

Pour de plus amples informations concernant CANSIM, téléphoner à (613) 991-1150 ou écrire à Division CANSIM, Statistique Canada, immeuble R.H. Coats, Ottawa, Ontario, K1A 0T6.

## 7. Confidentialité

Les données du présent bulletin sont vérifiées afin de s'assurer qu'elles respectent le caractère confidentiel des réponses fournies par les entreprises.

## CANSIM Matrix and Series Reference Numbers

## Numéros de référence des matrices et séries CANSIM

TABLE I. Type of Estimates

TABLEAU I. Type d'estimations

Estimates Estimations	Description
1	All employees - Ensemble des salariés
2	Salaried employees - Employés
3	Employees paid by the hour - Salariés rémunérés à l'heure
4	Other employees - Autres salariés
5	Average weekly earnings (including overtime) of all employees - Rémunération hebdomadaire moyenne (incluant le temps supplémentaire) de l'ensemble des salariés
6	Average weekly earnings (including overtime) of salaried employees - Rémunération hebdomadaire moyenne (incluant le temps supplémentaire) des employés
7	Average weekly earnings (including overtime) of employees paid by the hour - Rémunération hebdomadaire moyenne (incluant le temps supplémentaire) des salariés rémunérés à l'heure
8	Average weekly earnings (including overtime) of other employees - Rémunération hebdomadaire moyenne (incluant le temps supplémentaire) des autres salariés
9	Average weekly earnings (excluding overtime) of all employees - Rémunération hebdomadaire moyenne (excluant le temps supplémentaire) de l'ensemble des salariés
10	Average weekly earnings (excluding overtime) of salaried employees - Rémunération hebdomadaire moyenne (excluant le temps supplémentaire) des employés
11	Average weekly earnings (excluding overtime) of employees paid by the hour - Rémunération hebdomadaire moyenne (excluant le temps supplémentaire) des salariés rémunérés à l'heure
12	Average weekly overtime earnings of all employees - Rémunération hebdomadaire moyenne pour travail supplémentaire, ensemble des salariés
13	Average weekly overtime earnings of salaried employees - Rémunération hebdomadaire moyenne pour travail supplémentaire, des employés
14	Average weekly overtime earnings of employees paid by the hour - Rémunération hebdomadaire moyenne pour travail supplémentaire des salariés rémunérés à l'heure
15	Average weekly hours of salaried employees - Heures hebdomadaires moyennes des employés
16	Average weekly hours of employees paid by the hour - Heures hebdomadaires moyennes des salariés rémunérés à l'heure
17	Average weekly overtime hours of employees paid by the hour - Heures supplémentaires hebdomadaires moyennes des salariés rémunérés à l'heure
18	Average hourly earnings of salaried employees - Rémunération horaire moyenne des employés
19	Average hourly earnings (including overtime) of employees paid by the hour - Rémunération horaire moyenne (incluant le temps supplémentaire) des salariés rémunérés à l'heure
20	Average hourly overtime earnings of employees paid by the hour - Rémunération horaire moyenne du travail supplémentaire, des salariés rémunérés à l'heure

## ANNEX 2

### "INDUSTRIAL COMPOSITE" ESTIMATES

For data produced on employment, payrolls, and hours prior to April 1983, there was an aggregate entitled "Industrial Composite". This covered all sectors except agriculture, government, defence, hospitals, schools, religion, household services, and fishing, trapping and hunting; in addition, only firms with 20 or more employees were surveyed. Therefore, neither employment nor average weekly earnings for the Industrial Composite were ever intended to be global measures.

With the beginning of the Survey of Employment, Payrolls and Hours (SEPH) in April 1983, the Industrial Composite classification ceased to have its original justification. The SEPH survey has much more complete coverage than its predecessor, and its aggregates provide much fuller coverage of the economy, both by industry and by size of employer, than did the Industrial Composite. For this reason, it was decided not to continue the Industrial Composite as a regular SEPH output. Users are encouraged to change to the new published data as soon as possible.

It is recognized, however, that in some cases the term "Industrial Composite" has been officially incorporated into formal documents. In these cases, it may require some time to alter the wording of the documents to incorporate the new statistics. To assist in such efforts, a special synthetic series, approximating the old Industrial Composite totals from SEPH data, is produced hereafter.

As a word of warning, because of changes in coverage, survey procedures, question wording and other factors that accompanied the survey revisions in April 1983, it is not possible to exactly reproduce the Industrial Composite. However, research has indicated that it is possible by combining selected subcategories to construct data series in which the average weekly earnings for Canada and provinces normally differ from previous data by one percent or less. These derived totals will be released until December 1985.

## ANNEXE 2

### ESTIMATIONS DE L'"ENSEMBLE DES INDUSTRIES"

Avant avril 1983, nous produisions des données sur l'emploi, la rémunération et les heures pour un regroupement appelé "ensemble des industries". Ce regroupement couvrait tous les secteurs de l'industrie sauf l'agriculture, le gouvernement, la défense, les hôpitaux, les écoles, les organismes religieux, les ménages privés, la pêche, le piégeage et la chasse; de plus, seules les firmes ayant 20 salariés ou plus étaient enquêtées. Ainsi, l'emploi et la rémunération hebdomadaire moyenne pour ce regroupement n'ont jamais constitué des mesures globales.

Avec les débuts de l'Enquête sur l'emploi, la rémunération et les heures de travail (EERH), le regroupement "ensemble des industries" n'a plus de raison d'être. L'enquête EERH couvre beaucoup plus de secteurs que l'enquête qu'elle remplace. De plus, ses regroupements représentent une couverture beaucoup plus complète de l'économie, tant par industrie que par taille d'employeur. Nous avons donc décidé de ne pas publier l'"ensemble des industries" dans le cadre de l'enquête EERH. Pour cette raison, nous recommandons aux utilisateurs de se tourner vers les nouvelles données publiées aussitôt que possible.

Nous reconnaissons que, dans certains cas, le terme "ensemble des industries" soit inclus officiellement dans le texte de documents formels. Il peut arriver que dans ces situations le changement de formulation pour s'accorder aux nouvelles statistiques demande un certain temps. Pour venir en aide aux utilisateurs pendant ce temps, nous publions ci-après des séries spéciales qui sont des approximations des anciennes séries de l'"ensemble des industries", calculées à partir des données de l'EERH.

Il ne faut pas oublier qu'il s'agit d'approximation. En effet, il est impossible de reproduire exactement l'"ensemble des industries" à cause des changements touchant la couverture de l'enquête, les règles de l'enquête, la formulation des questions et d'autres facteurs accompagnant la révision de l'enquête en avril 1983. Cependant, des recherches ont montré qu'il était possible, en combinant certaines sous-catégories, de construire des séries de données pour lesquelles la rémunération hebdomadaire moyenne pour le Canada et les provinces ne différerait des données réelles que de 1% ou moins. Nous publierons ces séries dérivées jusqu'au mois d'enquête: décembre 1985.

**Estimates of Average Weekly Earnings for "Industrial Composite",  
Canada and Provinces**

**Estimations de la rémunération hebdomadaire moyenne pour l'"ensemble des industries",  
Canada et provinces**

Area Région	Average weekly earnings Rémunération hebdomadaire moyenne

## SELECTED PUBLICATIONS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

### Catalogue

#### Monthly

72-002 Employment, Earnings and Hours. Bil.

Industry and area data on industrial employment, average weekly earnings average weekly hours and average hourly earnings.

72-008 Estimates of Employees by Province and Industry. Bil.

Monthly estimates of total employment in non-agricultural industries for Canada and the provinces, (This publication is terminated with March 1983 data).

#### Quarterly

72-005 Estimates of Labour Income. Bil.

Monthly estimates of wages and salaries and supplementary labour income on unadjusted and seasonally adjusted basis by industry for Canada and the provinces with annual totals.

#### Occasional

72-516 Estimates of Employees by Province and Industry, 1961-1976. Bil.

Monthly estimates of total employees by industry and province in the non-agricultural sector - both seasonally adjusted and unadjusted series, 1961-1976.

72-517 Employment, Earnings and Hours, 1978. Bil.

Employment, earnings and hours statistics for the months of January to April 1978 inclusively which supersede data previously published in the monthly publication 72-002.

## CHOIX DE PUBLICATIONS

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

### Catalogue

#### Mensuel

72-002 Emploi, gains et durée du travail. Bil.

Données par industrie et par région sur l'emploi, les gains hebdomadaires moyens du travail, les gains horaires moyens et les heures hebdomadaires moyennes.

72-008 Estimations du nombre de salariés par province et par industrie. Bil.

Estimations mensuelles de l'ensemble des effectifs dans les industries non agricoles pour le Canada et les provinces. (Cette publication se termine avec les estimations de mars 1983).

#### Trimestriel

72-005 Estimations du revenu du travail. Bil.

Estimations mensuelles des salaires, des traitements et du revenu supplémentaire du travail, désaisonnalisées et non désaisonnalisées, par branche d'activité économique pour le Canada et les provinces, de même que des totaux annuels.

#### Hors série

72-516 Estimations du nombre de salariés par province et par industrie, 1961-1976. Bil.

Estimations mensuelles désaisonnalisées et non désaisonnalisées du nombre total de salariés par industrie et par province pour l'ensemble des industries non agricoles de 1961-1976.

72-517 Emploi, gains et durée du travail, 1978. Bil.

Chiffres révisés de l'emploi, des gains et de la durée du travail pour les mois de janvier à avril 1978 inclusive-ment. Ces données remplacent celles qui avaient été précédemment publiées dans les éditions mensuelles de la publication numéro 72-002 au catalogue.

## Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Employment, earnings and hours,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9900) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(973-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

Newfoundland and Labrador	Zenith 0-7037
Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192

Toronto

Credit Card only (973-8018)

## Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Emploi, gains et durée du travail,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-9900) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(990-8116)	Edmonton	(420-3027)
Toronto	(973-6586)	Vancouver	(666-3691)

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, aux **utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres régionaux de consultation.

## Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

## Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

## NOTE TO USERS

Data for the current month are preliminary estimates and are subject to revision in the next issue of this publication.

Effective with June 1985, data for urban areas have been removed and the remaining statistical tables have been re-numbered as a result of the changes.

The following is a conversion from old to new table numbers:

New Table Number	Former Table Number
1.1	2
1.2	3
2.1	5
2.2	6
3.1	11
3.2	12
4.1	15
4.2	16
5.1	17
5.2	18
6.1	20

Data for urban areas will continue to be made available to users on request. For further information on obtaining unpublished data, please contact Jack Beauregard or Renée Arsenault at (613)990-9900. The data are also available on the Canadian Socio-Economic Information Management System (CANSIM) and include a cautionary note concerning the interpretation of the data. Users interested in accessing data via CANSIM should contact one of Statistics Canada's regional reference centres at the numbers listed on the inside front cover of this publication or contact CANSIM directly at (613)991-1150.

## REVISIONS TO HISTORICAL DATA

### 1984

There has been a revision to the data published monthly in the January to July 1984 issues of Catalogue 72-002 for the industries listed below. The revised series appear in the September 1984 issue. All data variables for the following series at the Canada, Provinces and Territories level may be affected:

1. Total Number of Employees - All Survey Units
2. Salaried Employees - All Survey Units
3. Total Number of Employees - Take-All Units
4. Salaried Employees - Take-All Units

## AVIS AUX UTILISATEURS

Les données du mois le plus récent sont des estimations préliminaires et seront révisées lors de la prochaine parution de cette publication.

À partir de juin 1985, les données pour les régions urbaines ont été supprimées et les tableaux qui font encore partie de cette publication ont été renumérotés.

Le tableau qui suit vous permet de passer des anciens aux nouveaux numéros de tableaux:

Nouveau numéro de tableau	Ancien numéro de tableau
1.1	2
1.2	3
2.1	5
2.2	6
3.1	11
3.2	12
4.1	15
4.2	16
5.1	17
5.2	18
6.1	20

Les données pour les régions urbaines sont toujours disponibles sur demande. Pour plus d'information sur la façon d'obtenir des données non-publiées veuillez communiquer avec Jack Beauregard ou Renée Arsenault au (613)990-9900. Notez que l'on peut toujours obtenir ces séries du Système canadien d'information socio-économique (CANSIM), où nous avons ajouté une mise en garde concernant l'interprétation de ces données. Les utilisateurs voulant obtenir des chiffres par l'intermédiaire de CANSIM doivent contacter un des centres de consultation de Statistique Canada dont les numéros de téléphone se trouvent à l'endos du couvert de cette publication ou en communiquant directement avec CANSIM au (613)991-1150.

## RÉVISIONS AUX DONNÉES HISTORIQUES

### 1984

Des révisions ont été apportées aux chiffres publiés dans le catalogue mensuel numéro 72-002 pour les mois de janvier à juillet 1984, pour les industries mentionnées ci-dessous. Les séries révisées figurent dans le catalogue du mois de septembre 1984. Toutes les variables pour les séries qui suivent aux niveaux du Canada, provinces et territoires peuvent être affectées:

1. Nombre total de salariés - Ensemble des unités
2. Employés - Ensemble des unités
3. Nombre total de salariés - Unités à tirage complet
4. Employés - Unités à tirage complet

Service producing industries	501 - 951	Branches productrices de services
Commercial, business and personal services	801 - 899	Services socio-culturels, comm. et pers.
Education and related services	801 - 809	Enseignement et services annexes
Education, excluding libraries and museums	809T	Enseignement et services sauf bibliothèques, musées
Education, n.e.s.	809	Enseignement, n.c.a.
Health and Welfare Services	821 - 828	Services médicaux et sociaux
Welfare organizations	828	Organismes de bien-être
Amusement and recreation	841 - 849	Divertissements et loisirs
Theatrical and other Staged Entertainment	845	Services de théâtre et autres spectacles
Misc. amusement and recreation	849	Services divers de divertissements et de loisirs
Services to business management	851 - 869	Services fournis aux entreprises
Engineering and scientific services	864	Bureaux d'études et services scientifiques
Misc. services	891 - 899	Services divers
Misc. services, n.e.s.	899	Services divers, n.c.a.

## COMMENTARY

### Preliminary Estimates<sup>1</sup> (Unadjusted data) - September 1985

Preliminary data for September 1985 showed an estimated 9,194.5 thousand employees for the Canada industrial aggregate<sup>2</sup> an increase of 99.8 thousand from August. Gains were noted in forestry, transportation, communication and other utilities and in the community, business and personal services while the remaining industry groups decreased. All provinces and territories registered increases except New Brunswick and the Yukon which decreased and Prince Edward Island and Northwest Territories which remained unchanged.

Average weekly earnings at the Canada industrial aggregate level increased from \$420.08 in August to \$423.02 in September. All industry groups registered increases with the exception of transportation, communication and other utilities and finance, insurance and real estate. All provinces and territories increased except Nova Scotia, Alberta, Yukon and Northwest Territories which registered decreases.

---

<sup>1</sup> See note on "Statistical presentation" under "Concepts and Methods" at the back of this publication.

<sup>2</sup> The industrial aggregate is the sum of all industries with the exception of agriculture; fishing and trapping; religious organizations; private households and military personnel. Goods-producing industries comprise forestry; mines, quarries and oil wells; manufacturing and construction. Service-producing industries include transportation, communication and other utilities; trade; finance, insurance and real estate; community, business and personal services (except religious organizations and private households) and public administration (except military personnel).

## OBSERVATIONS

### Estimations préliminaires<sup>1</sup> (chiffres non désaisonnalisés) - Septembre 1985

Selon les données préliminaires, le nombre de salariés pour l'ensemble des activités économiques<sup>2</sup> au Canada atteignait 9,194.5 milliers de personnes en septembre 1985, représentant une augmentation de 99.8 milliers de personnes entre août et septembre. Des augmentations ont été notées dans les forêts, les transports, communications et autres services publics et dans les services socio-culturels, communautaires et personnels alors que les autres divisions de l'activité économique ont diminué. Toutes les provinces et territoires ont contribué à cette augmentation à l'exception du Nouveau-Brunswick et du Yukon qui ont diminué et de l'Île-du-Prince-Édouard et des Territoires du Nord-Ouest qui sont demeurés inchangés.

La rémunération hebdomadaire moyenne pour l'ensemble des activités économiques a augmenté passant de \$420.08 en août à \$423.02 en septembre. Toutes les divisions de l'activité économique ont enregistré des hausses sauf les transports, communications et autres services publics et les finances, assurances et affaires immobilières. Toutes les provinces et territoires ont augmenté exception faite de la Nouvelle-Écosse, de l'Alberta, du Yukon, et des Territoires du Nord-Ouest qui ont enregistré des baisses.

---

<sup>1</sup> Voir la partie "Présentation statistique" sous la rubrique "concepts et méthodes", à la fin de cette publication.

<sup>2</sup> L'ensemble des activités économiques est la somme de toutes les industries à l'exception de l'agriculture, la pêche et le piégeage, les organismes religieux, les ménages privés et les services de défense. Les industries productrices de biens englobent les forêts, les mines, les carrières et puits de pétrole, les manufactures et la construction. La branche des services englobe les transports, les communications et autres services publics, le commerce, les finances, assurances et affaires immobilières, les services communautaires aux entreprises et personnels (sauf les organismes religieux et les ménages privés) et l'administration publique (à l'exception du personnel militaire).

Concepts and methods are described at the back of this publication.

Les concepts et méthodes sont décrits à la fin de la présente publication.

## CONCEPTS AND METHODS

### Objectives

The Survey of Employment, Payrolls and Hours is designed to measure, on a monthly basis, the levels and month-to-month trends of employment, paid hours and earnings. These measures are compiled at detailed industrial and geographic levels.

All industries are covered by the survey with the exception of agriculture, fishing and trapping, private household services, religious organizations, and military services.

### Source of Data

The statistics contained in this report are based on information obtained through a mail survey of firms, institutions and organizations of all sizes.

The **firm** is defined as any business entity whether incorporated or not; it comprises sole proprietorships, partnerships, corporations and other forms of organization such as co-operatives. Most firms consist of only one "establishment" (see definition under Industrial Classification) but, in some cases, the firm is made up of a number of establishments which may or may not be engaged in the same kind of economic activity.

The universe for the survey is derived from a central file of employers maintained by the Business Register and Profiling Division of Statistics Canada.

### Industrial Classification

All **firms** are assigned to an industry on the basis of their principal activity. In instances where the firm is engaged in only one kind of industrial activity, the industrial classification is straightforward. Classification problems arise when a firm is active in more than one kind of classifiable industrial activity. This usually occurs when a firm operates more than one establishment. The **establishment** (typically a factory, mine, store or a similar unit) is defined, for statistical purposes, as the smallest separate operating entity capable of reporting all elements of basic industrial data which permit the calculation of "census value added" or "gross mark up" or "gross profit" as well as data on employment and payrolls.

For purposes of detailed geographical statistics, the establishment is often sub-divided into **reporting units** which, although not capable of reporting all basic industrial statistics, can report employment, payrolls and hours data for particular locations.

The industrial classification of the statistics contained in this report is based on the 1970 version of the Standard Industrial Classification. A description of the various industries and groups of industries is contained

## CONCEPTS ET MÉTHODES

### Objectifs

L'enquête sur l'emploi, la rémunération et les heures de travail a pour objet de mesurer mensuellement les niveaux et les tendances de l'emploi, des heures rémunérées et des gains. Ces mesures sont rassemblées à des niveaux détaillés selon l'activité économique et le lieu géographique.

L'enquête vise tous les secteurs de l'activité économique sauf l'agriculture, la pêche et le piégeage, le service domestique des ménages, les organismes religieux et les services de la défense.

### Source des données

Les statistiques présentées dans ce bulletin se fondent sur des renseignements recueillis au moyen d'une enquête postale menée auprès des entreprises et autres organismes ou établissements de toutes tailles.

Le terme **entreprise** désigne toute entité commerciale ou industrielle constituée ou non en corporation; il peut s'agir d'une entreprise à propriétaire unique, d'une société en nom collectif, d'une corporation ou d'une autre forme quelconque d'organisation, telle une coopérative. La plupart des entreprises ne comptent qu'un seul "établissement" (voir la définition sous la rubrique "Classement par activité économique") mais, dans certains cas, l'entreprise peut regrouper plusieurs établissements qui exercent ou non le même genre d'activité.

L'univers de l'enquête est établi à l'aide d'un registre central des employeurs tenu par la Division des profils et du registre des entreprises de Statistique Canada.

### Classement par activité économique

Toutes les **entreprises** appartiennent à une branche d'activité économique déterminée en fonction de leur activité principale. Si l'entreprise n'exerce qu'un seul genre d'activité économique, le classement est simple. Les problèmes surgissent lorsqu'elle en exerce plus d'un, par exemple lorsqu'elle possède plus d'un **établissement**. À des fins statistiques, on définit l'établissement (en général une usine, une mine, un magasin ou une unité semblable) comme la plus petite unité constituant un ensemble fonctionnel distinct capable de déclarer, à l'égard de l'activité économique, tous les éléments statistiques de base qui permettent de calculer la "valeur ajoutée" ou la "majoration brute" ou le "bénéfice brut", ainsi que des données sur l'emploi et la rémunération.

Pour obtenir des statistiques géographiques détaillées, souvent on subdivise l'établissement en **unités déclarantes** qui, bien qu'elles ne puissent fournir toutes les statistiques de base, sont en mesure de déclarer des données sur l'emploi, la rémunération et les heures de travail relativement à certains endroits.

Le classement des statistiques que nous présentons dans ce volume s'inspire de la Classification des activités économiques, de 1970. Vous trouverez une description de ces diverses activités et de leurs groupements dans le bulletin de la Classification

in the "Standard Industrial Classification Manual", Catalogue No. 12-501. The "S.I.C. Code" columns on the tables correspond to the codes of this manual. These tables also contain the following groupings which are not part of the "Standard Industrial Classification Manual":

- a) Industrial aggregate (031-951) represents the sum of all the industries included in the survey (see Objectives).
- b) Goods-producing industries (031-421) comprise forestry, mining, manufacturing and construction.
- c) Service-producing industries (501 to 951) consist of transportation, communication and other utilities, trade, finance, insurance and real estate, services (except for religious organizations and private households), and public administration (with the exception of military personnel, and other government services).
- d) Durable goods manufacturing (durable) includes wood industries (251-259), furniture and fixture industries (261-268), primary metal industries (291-298), metal fabricating industries except machinery and transportation equipment (301-309), machinery industries except electrical machinery (311-318), transportation equipment industries (321-329), electrical products industries (331-339), and non-metallic mineral products industries (351-359).
- e) Non-durable goods manufacturing (non-dur) is the sum of food and beverage industries (101-109), tobacco products industries (151-153), rubber and plastic products industries (162-165), leather industries (172-179), textile industries (181-189), knitting mills (231-239), clothing industries (243-249), paper and allied industries (271-274), printing, publishing and allied industries (286-289), petroleum and coal products industries (365-369), chemical and chemical products industries (372-379), and miscellaneous manufacturing industries (391-399).
- f) Building construction (404, 421) comprises building construction (404) and special-trade contractors (421).
- g) Industrial and Heavy (Engineering) construction (406, 409) includes highway, bridge and street construction (406) and other construction (409).
- h) Education services (809T) consist of kindergartens and nursery schools (801), elementary and secondary schools (802), schools of arts and performing arts (803), vocational centers, trade schools and business colleges (804), post-secondary non-university educational institutions (805), universities and colleges (806), and education and related services (809).
- i) Public administration (909-951) contains only the establishments engaged in activities that are gov-

des activités économiques, n° 12-501 au catalogue. Les codes C.A.É. qui apparaissent dans les colonnes de certains tableaux de notre publication correspondent au codes de ce bulletin. Les tableaux en question renferment aussi les groupes suivants, qui ne figurent pas dans la Classification des activités économiques:

- a) Ensemble des activités économiques (031-951) — Il s'agit de la somme des diverses activités économiques visées par l'enquête (voir objectifs).
- b) Branche productrice de biens (031-421) — Ce groupe englobe les forêts, les mines, les manufactures et la construction.
- c) Branche des services (501-951) — Englobe les transports, les communications et autres services publics, le commerce, les finances, assurances et affaires immobilières, les services (sauf les organismes religieux et les ménages privés), et l'administration publique (à l'exception du personnel militaire et des autres services gouvernementaux).
- d) Fabrication des biens durables (durables) — Englobe les industries du bois (251-259), l'industrie du meuble et des accessoires d'ameublement (261-268), l'industrie de première transformation des métaux (291-298), l'industrie des produits métalliques (sauf les machines et le matériel de transport) (301-309), la fabrication des machines (sauf le matériel électrique) (311-318), l'industrie du matériel de transport (321-329), l'industrie des appareils et du matériel électriques (331-339) et l'industrie des produits minéraux non métalliques (351-359).
- e) Fabrication des biens non durables (non dur.) — Englobe l'industrie des aliments et boissons (101-109), l'industrie du tabac (151-153), l'industrie du caoutchouc et des produits en matière plastique (162-165), l'industrie du cuir (172-179), l'industrie textile (181-189), la bonneterie (231-239), l'industrie de l'habillement (243-249), l'industrie du papier et des produits connexes (271-274), l'imprimerie, l'édition et industries connexes (286-289), l'industrie du pétrole, du charbon et de leurs dérivés (360-369), l'industrie chimique et des produits connexes (372-379), et les industries manufacturières diverses (391-399).
- f) Bâtiment (404, 421) — Englobe la construction de bâtiments (404) et l'activité des entrepreneurs spécialisés (421).
- g) Construction industrielle et lourde (travaux de génie) (406, 409) — Englobe la construction de routes, ponts et rues (406) et autres constructions (409).
- h) Enseignement et services connexes (809T) — Englobe les jardins d'enfants et écoles maternelles (801), les écoles primaires et secondaires (802), les écoles de beaux-arts (803), les centres de formation professionnelle, écoles de métiers et collèges commerciaux (804), les établissements d'enseignement postsecondaire non universitaire (805), les universités et collèges (806), et l'enseignement et services connexes (809).
- i) Administration publique (909-951) — Comprend les établissements dont les activités ont un caractère essentiellement

ernmental in character and those serving as internal service agencies of the public service. Government owned establishments primarily engaged in activities assigned to other industries are classified in those industries along with similar establishments owned by non-government bodies. Therefore, data included in this industry division do not represent the actual number of persons employed by government at any level.

## Geographic Classification

Reporting units are assigned to a province, a census division, an economic region (for the province of Quebec and Ontario) and, where applicable, to a metropolitan or urban area. The survey selected metropolitan and urban areas as delineated for the 1981 Census of Population; these areas usually consist of the urban centre as well as the surrounding territory and had a population of 25,000 inhabitants or more. The reporting units not located in a tabulated urban area or not allocated to a compiled census division are included in the provincial and national totals.

A description of the various geographical areas is contained in the "Standard Geographical Classification Manual, 1981", Catalogue No. 12-567.

## Definitions

### 1. Reference Period

Conceptually, the data in this report refer to the last seven days in the specified month. In practice, few firms keep payroll records covering precisely this period. Therefore, firms are asked to report for their last pay period or pay periods in each month. When the reported pay period is longer than one week, the data are reduced to a week using the number of days the firm usually operates during a week divided by the number of working days covered by the reported pay period.

If, owing to **strikes**, unpaid holidays or other similar unpaid circumstances, the data reported are not representative of the last seven days of the month, adjustments are made to reflect the economic situation of the reference period (i.e. when a strike effects the last seven days of the survey month, the derived data will reflect the strike situation).

### 2. Employee

All persons drawing pay for services rendered or for paid absences and for whom the employer is required to complete a Revenue Canada T-4 Supplementary Form constitute employees.

gouvernemental, et les organismes auxiliaires assurant les services internes de l'État. Les établissements publics dont l'activité dominante relève d'autres activités économiques sont classés sous les mêmes rubriques que les établissements privés semblables. Ainsi, les données publiées pour cette division économique ne représentent pas le nombre réel de personnes employées par les différents pouvoirs publics.

## Classement géographique

On attribue les unités déclarantes à une province, à une division de recensement, à une région économique (pour les provinces suivantes: Québec et Ontario) et, s'il y a lieu, à une région métropolitaine ou urbaine. Les régions métropolitaines et urbaines choisies pour l'enquête sont celles du recensement de la population de 1981; ces régions, qui se composent habituellement d'un centre urbain et du territoire environnant, comptaient lors du dernier recensement 25,000 habitants ou plus. Les unités déclarantes situées en dehors de toute région urbaine indiquée dans les tableaux, ou non attribuées à une division de recensement prise en compte, font partie des totaux provinciaux et nationaux.

La description des diverses régions géographiques se trouve dans la "Classification géographique type, 1981", numéro 12-567 au catalogue.

## Définitions

### 1. Période de référence

En théorie, les données sur l'emploi se rapportent aux sept derniers jours du mois de référence. Dans la pratique, peu d'entreprises tiennent des registres de paye pour cette période précise; on demande donc aux répondants de faire porter leur déclaration sur la(les) dernière(s) période(s) de paye de chaque mois. Lorsque la période de paye sur laquelle porte la déclaration dépasse une semaine, on rajuste les données en divisant le nombre de jours d'activité hebdomadaire de l'entreprise par le nombre de jours ouvrables compris dans la période de paye sur laquelle porte la déclaration.

Si, en raison d'une **grève**, d'un congé non payé ou d'autres circonstances semblables, les données déclarées ne sont pas représentatives des sept derniers jours du mois, on procède aux rajustements qui s'imposent afin de traduire la situation qui régnait pendant la période de référence (cela signifie que lorsqu'une grève touche les sept derniers jours du mois d'enquête, les données qui en découlent reflètent l'état de grève).

### 2. Salarié

Toute personne rétribuée pour ses services ou ses absences et pour laquelle l'employeur doit remplir une déclaration T-4 Supplémentaire de Revenu Canada, est un salarié.

The employee concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment) and casual or temporary employees (those who are hired for discontinuous periods or on an irregular basis). It also comprises working owners, directors, partners and other officers of incorporated businesses.

The employee concept excludes owners or partners of unincorporated businesses and professional practices, the self-employed, unpaid family workers, persons doing non-remunerative work, pensioners, home workers, members of elected or appointed bodies, persons working outside Canada, military personnel and persons providing services to an establishment on a contract basis. It also excludes persons who did not receive any pay from the employer for the entire survey reference period (e.g. persons on strike, persons on unpaid holidays, persons receiving remuneration from an insurance, Workmen's Compensation or other related fund, etc.); however, employees paid from the employer for a part of the reference period and unemployed or on strike for the rest are counted as employed.

The employees are classified into the following categories:

- a) **Employees paid by the hour**  
Any employee whose basic wage is expressed as an hourly rate.
- b) **Salaried Employees**  
Any employee whose basic remuneration is a fixed amount for a period of at least one week.
- c) **Other Employees**  
Those employees whose basic remuneration is in the form of commissions, piece rates, mileage allowances, etc.
- d) **Non-teaching Staff**  
All employees other than teachers and academic staff, i.e. president, vice-president, librarian, registrar, bursar, accountant, guidance counsellor, laboratory technician, personnel officer, and other services (e.g. janitor, caretaker, bus driver, etc.)
- e) **Teaching Staff**  
Those classified as teachers, instructors or academics in the payroll records (e.g. principal, professor, dean, head of department, master, teacher, etc.) whether they teach during the day or evening. Supply or substitute teachers are excluded.
- f) **Supply or Substitute Teachers**  
Teachers who are called in to teach whenever their services are needed either to augment

Le terme "salariés" désigne les salariés à temps plein, les salariés à temps partiel (ceux qui travaillent régulièrement un nombre d'heures inférieur à la semaine normale de travail de l'entreprise) et les salariés occasionnels ou temporaires (ceux qui sont embauchés de façon irrégulière ou temporaire). Il désigne aussi les propriétaires, les administrateurs, les associés et les autres dirigeants actifs des entreprises constituées en corporation.

Le concept de salarié exclut les propriétaires et les associés des entreprises non constituées en corporation et ceux des bureaux voués à l'exercice d'une profession libérale, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les bénévoles, les retraités, les travailleurs à domicile, les membres des corps élus ou nommés, les personnes travaillant à l'extérieur du Canada, le personnel militaire et les personnes fournissant des services à un établissement sur une base forfaitaire. Sont également exclus les travailleurs n'ayant pas reçu de paye de leur employeur pendant la période de référence de l'enquête (i.e. les personnes en grève, en congé non payé, celles recevant une rémunération aux termes d'un régime d'assurance, d'une caisse d'indemnisation des accidents au travail ou d'une caisse analogue, etc.); cependant, les travailleurs rémunérés par leur employeur pour une partie de la période de référence, mais en chômage ou en grève pendant l'autre partie, sont quand même considérés comme salariés.

Les salariés sont classés dans les catégories suivantes:

- a) **Salariés rémunérés à l'heure**  
Tout salarié dont la rémunération de base est calculée selon un taux horaire.
- b) **Employés**  
Tout salarié dont la rémunération de base constitue une somme fixe versée pour une période d'au moins une semaine.
- c) **Autres salariés**  
Tout salarié dont la rémunération de base se présente sous forme de commissions, de salaire à la pièce, d'indemnités de trajet, etc.
- d) **Personnel non enseignant**  
Tous les salariés autres que le personnel enseignant, c'est-à-dire le président, le vice-président, le bibliothécaire, le secrétaire général, l'économiste, le comptable, les orienteurs, les techniciens de laboratoire, les agents du personnel, le concierge, les chauffeurs d'autobus, etc.
- e) **Personnel enseignant**  
Tout travailleur classé comme enseignant ou chargé de cours dans les dossiers du service de la paye (directeur, professeurs, doyens, chefs de département, maîtres, enseignants, etc.), qu'il enseigne le jour ou le soir. Les suppléants ou remplaçants sont exclus.
- f) **Suppléants ou remplaçants**  
Enseignants appelés à se présenter au travail lorsqu'on a besoin de leurs services soit pour accroître le

the existing staff or as a short-term replacement for a full-time or part-time teacher.

### 3. Earnings

Earnings represent gross pay before deductions for taxes, unemployment insurance contributions, etc.

The payroll concept does not include supplementary labour costs such as employer's contributions to unemployment insurance, medical plans, Workmen's Compensation and other welfare plans, nor does it include the cost of equipment, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, bonuses paid at irregular and infrequent intervals or director's fees.

#### a) Gross Pay

Gross pay includes salaries, straight-time wages, piece-work and regular commission earnings, regular paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey reference week.

#### b) Overtime Pay

All pay received for the number of hours worked in excess of the standard workday or workweek.

### 4. Hours

#### a) Total hours paid

All hours worked, including overtime hours, **plus** hours of paid absence (e.g. holidays, vacation, sick leave, jury duty, etc.)

#### b) Overtime Hours

The total hours for which overtime was paid. These represent the hours worked.

### 5. Paid Absence

Paid absence comprises paid holidays, vacation, sick leave including industrial injury and personal leave such as bereavement leave, jury duty, etc.

### 6. Standard Workweek

The hours in the standard workweek constitute the average number of hours of work normally scheduled in a workweek.

personnel existant, soit pour remplacer pendant une courte période un enseignant à temps plein ou à temps partiel.

### 3. Gains

Les gains représentent la rémunération brute avant toutes déductions d'impôt, de cotisations d'assurance-chômage, etc.

Le concept de rémunération ne comprend pas les frais supplémentaires de main-d'oeuvre tels que les contributions de l'employeur à la caisse d'assurance-chômage, aux régimes d'assurance-maladie, à la caisse d'indemnisation des accidents du travail et à d'autres régimes de prévoyance; il ne comprend pas non plus le coût du matériel, la valeur du couvert et du gîte, les paiements en nature, les frais de déplacement, les indemnités de retraite, les gratifications versées à intervalles irréguliers et peu fréquents, ni les jetons de présence des administrateurs.

#### a) Rémunération brute

Comprend les salaires, les traitements à taux ordinaires, la rémunération du travail à la pièce et les commissions régulières, ainsi que les primes, indemnités de vie chère et autres gratifications versées régulièrement, les payes de surtemps et la rémunération des absences payées dans la semaine de référence de l'enquête.

#### b) Rémunération du temps supplémentaire

Ensemble de la rémunération versée pour le nombre d'heures de travail effectuées en sus de la journée ou de la semaine normale de travail.

### 4. Heures

#### a) Nombre total d'heures payées

Ensemble des heures travaillées, y compris les heures supplémentaires, **plus** les heures de congé (par ex., les jours fériés, les vacances, les congés de maladie, les congés pour service judiciaire, etc.)

#### b) Heures supplémentaires

Total des heures payées à un taux majoré; il s'agit d'heures réellement travaillées.

### 5. Absence payée

Les absences payées comprennent toutes les heures rémunérées dans le cas des jours fériés payés, des vacances, des congés de maladie, ainsi que des congés d'accident du travail et des congés pour motifs personnels tels que les congés de deuil et les congés pour service judiciaire.

### 6. Semaine normale de travail

Les heures d'une semaine normale de travail reflètent la moyenne des heures de travail normalement fixées pour une semaine.

## 7. Take-all and Take-some Units

Take-all units are reporting units of firms or organizations which are included in the survey sample with certainty every month. These include:

- a) All firms or organizations with 200 or more employees;
- b) All firms with more than one reporting unit;
- c) Firms which report their survey data on computer listings rather than on the standard questionnaire;
- d) Units of government departments and crown corporations;
- e) Units belonging to elementary and secondary schools;
- f) Certain other pre-specified units or firms.

Take-some units are all the other firms in the universe which have a known probability of selection.

## Methodology

The statistics contained in this publication are based on information obtained through a sample survey of reporting units. The data is collected by means of questionnaires mailed monthly to a sample of about 70,000 reporting units selected out of a universe of about 700,000. The sample covers all industries in scope for the survey, all provinces and territories and all sizes of units. Both the universe and the sample are updated monthly for births and deaths.

## Stratification

For the determination of the survey sample size and for the purpose of the sample selection, the universe of reporting units is stratified by 12 provinces and territories, 16 industry groups and 4 size groups. (An industry group is slightly more detailed than the 1-digit industry code). The size of a unit is defined to be the total number of paid employees in that unit. The four size groups are 0 to 19, 20 to 49, 50 to 199 and 200 or more employees.

The universe of reporting units is further stratified into **take-all** and **take-some** categories as defined earlier under Definitions.

## 7. Unités à tirage complet et à tirage partiel

Les unités à tirage complet sont les unités déclarantes d'entreprises ou d'organisations incluses en permanence dans l'échantillon de l'enquête. Elles comprennent:

- a) toutes les entreprises de 200 salariées ou plus;
- b) toutes les entreprises ayant plus d'une unité déclarante;
- c) les entreprises qui déclarent leurs données au moyen d'un imprimé d'ordinateur plutôt qu'à l'aide du questionnaire;
- d) unités des services gouvernementaux et des sociétés de la couronne;
- e) unités propres aux écoles primaires et secondaires;
- f) d'autres unités ou entreprises préalablement choisies.

Les unités à tirage partiel sont toutes les autres entreprises qui ont une probabilité connue de ne pas être choisies dans l'échantillon de l'enquête. Lorsqu'elles sont choisies, de telles unités sortent de l'enquête après un certain nombre de mois.

## Méthodologie

Les statistiques présentées dans cette publication se fondent sur les résultats d'une enquête effectuée par sondage auprès d'unités déclarantes. Les données sont recueillies au moyen d'un questionnaire posté tous les mois à un échantillon de quelque 70,000 unités déclarantes provenant d'un univers d'environ 700,000 unités. L'échantillon couvre toutes les activités économiques que vise l'enquête, ainsi que toutes les provinces et les territoires et toutes les tailles d'unité. Chaque mois, nous mettons à jour l'univers ainsi que l'échantillon, en tenant compte des créations et des disparitions d'unités ou d'entreprises.

## Stratification

Pour déterminer la taille et la composition de l'échantillon, nous répartissons l'univers des unités déclarantes en 12 provinces et territoires, 16 groupes industriels (activités économiques) et quatre groupes de taille. (Un groupe industriel est légèrement plus détaillé qu'une industrie dont le code n'a qu'un chiffre). La taille d'une unité se définit comme étant le nombre total de salariés rémunérés que compte cette unité. Les quatre groupes de taille sont 0 à 19, 20 à 49, 50 à 199 et 200 salariés et plus.

En outre, l'univers des unités déclarantes est stratifié en deux catégories: les unités à **tirage complet** et les unités à **tirage partiel**, au sens que nous avons précisé dans la section "Définitions".

## Sample allocation and selection

The size of the take-some sample for the survey has been determined so as to provide estimates of total number of paid employees at the industry group and province level with a prespecified reliability. The determination has been done under the requirement that the sample at the industry group and province level is allocated to each size group in proportion to the total estimated take-some employment in that size group. If the sampling fraction resulting from this allocation is less than .01, then a minimum sampling fraction of .01 is adopted in order to avoid unusually large weights. The allocation makes the probability of inclusion of a unit in the sample in a size stratum approximately proportional to the average number of employees per unit in that size stratum. The sample design, therefore, provides for a small sample of small reporting units if the concentration of employment is mainly in the large reporting units. On the other hand, if the proportion of total employment from small reporting units is substantial, then the sample will include a large number of small reporting units.

The number of reporting units to be selected at the industry group, province and size levels is again allocated to each three-digit industry within that industry group, province and size in proportion to the total number of reporting units in that three-digit industry. In other words, the sampling fraction used at the three-digit industry level is the same as the one determined at the industry group, province and size. However, it should be noted that a minimum sample of three units is selected whenever the use of the sampling fraction results in less than 3 units. If the universe itself is less than three units, then all the units are taken into the sample.

A systematic sample of the predetermined number of units is drawn from the take-some universe in every three-digit industry, province and size group. The total sample is the sum of the number of take-all and selected take-some units.

## Sample rotation

The design provides for rotation of the take-some sample within a three-digit industry, province and size group. Each month, approximately one-twelfth of the take-some sample is replaced. This means that units generally remain in the sample for 12 months before rotating out. The units are not eligible for reselection for at least 12 months after they rotate out.

In some small three-digit industry, province and size group cells it may not be possible to rotate out units each month. Consequently, in some small cells, units may have to stay longer than 12 months.

## Répartition et choix de l'échantillon

La taille de la portion à tirage partiel de l'échantillon a été déterminée de façon à fournir, avec une fiabilité prédéterminée, des estimations du nombre total de salariés rémunérés, au niveau du groupe industriel et de la province. Ce calcul tient compte du fait que l'échantillon, au niveau du groupe industriel et de la province, doit être réparti dans chaque groupe de taille proportionnellement à l'estimation de l'emploi total au sein de la portion à tirage partiel de chacun des groupes de taille. Si la fraction d'échantillon résultant de cette répartition est inférieure à 0.01, on la remplace alors par la fraction minimale 0.01 afin d'éviter toute pondération excessive. La répartition est telle que la probabilité qu'une unité entre dans une strate particulière de l'échantillon est à peu près proportionnelle au nombre moyen de salariés par unité comprise dans cette strate. Le plan d'échantillonnage prévoit donc un petit échantillon de petites unités déclarantes lorsque l'emploi se concentre principalement dans les grandes unités déclarantes. Par contre, si l'emploi total provenant des petites unités déclarantes est élevé, alors l'échantillon contiendra un grand nombre de petites unités déclarantes.

Le nombre d'unités qu'il faut choisir au niveau du groupe industriel, de la province et de la taille est, en outre, réparti entre chacune des industries ayant un code à trois chiffres, lesquelles font partie du groupe industriel, de la province et de la taille considérés; cette répartition se fait proportionnellement au nombre total d'unités déclarantes comprises dans l'industrie dont le code comporte trois chiffres. En d'autres termes, la fraction d'échantillon utilisée au niveau industriel à trois chiffres est la même que celle déterminée pour le groupe industriel, la province et la taille. Il faut cependant noter que l'échantillon minimal est de trois unités, peu importe le résultat obtenu en utilisant la fraction d'échantillon. S'il y a moins de trois unités dans l'univers, toutes les unités disponibles sont incluses dans l'échantillon.

Au sein de la portion à tirage partiel, on choisit un échantillon systématique d'un nombre prédéterminé d'unités dans chaque industrie ayant un code à trois chiffres, et ce dans chaque province et chaque groupe de taille. L'échantillon total résulte de la somme du nombre d'unités à tirage complet et du nombre d'unités à tirage partiel sélectionnées.

## Rotation de l'échantillon

Pour chaque industrie (code à trois chiffres), province et groupe de taille, le plan prévoit une rotation de la portion à tirage partiel de l'échantillon. Chaque mois, le douzième environ de la portion à tirage partiel de l'échantillon est remplacé. Cela signifie qu'en général les unités demeurent 12 mois dans l'échantillon avant d'en sortir par voie de rotation. Les unités ne peuvent pas être choisies de nouveau avant au moins 12 mois suivant leur mois de sortie.

Dans le cas de certaines petites cellules (une cellule regroupe les unités de même industrie au niveau du code à trois chiffres, même province et même groupe de taille), il est parfois impossible d'assurer la rotation des unités chaque mois. Ainsi, il peut arriver que des unités demeurent plus de douze mois dans certaines petites cellules.

## Data edit and correction

All the questionnaires are initially screened for completeness by the interviewers of the Statistics Canada regional offices. Thereafter, extensive computer edit procedures for accuracy and consistency are performed at the Ottawa head office. As a result of any of the above-mentioned editing techniques, the respondent may be contacted to confirm or explain the data.

The edit procedures include the comparison of the values of key characteristics (e.g. number of employees, hours worked, salary per employee, etc.) reported for consecutive months by the same unit in order to detect large changes or errors in reporting. Whenever there is a large change or the data appears inconsistent, the record is signaled by the computer edit for review and is subject to correction or acceptance as appropriate.

## Follow-up

Reporting units which are non-respondents to the initial mailing are followed up by telephone by the staff of the regional offices of Statistics Canada. Priority for this follow-up is given to (i) units which are in the sample for the first time and which have not responded, (ii) units which have not responded for two consecutive months, (iii) large nonrespondent units. Follow-up also takes into account response rates and employment in the various industry groups in determining priority.

If units continue to be non-respondents even after follow-up, then data will be imputed for these units. All the records with imputed values are subject to the edits mentioned above.

## Imputation

Imputation for nonrespondent units which have been in the survey for more than one month is based on the ratio of the monthly changes. The ratio of the monthly change for each characteristic is calculated from units that responded both in the current and the previous month and is applied to the previous month's data of each nonrespondent.

For the nonresponding units that are new to the survey, imputation is based on other sources of information such as the employment intention of the unit, the characteristics of the responding units in the same industry group, province and size.

## Estimates

The basic "building block" for producing the monthly estimates is the three-digit industry, province and size group. Estimates at higher levels are obtained by the aggregation of the above estimates. Estimates of averages are obtained by first estimating the totals for the

## Vérification des données et correction

Au départ, les interviewers des bureaux régionaux de Statistique Canada s'assurent que tous les questionnaires sont complets. Ultérieurement, le personnel du bureau d'Ottawa vérifie par ordinateur l'exactitude et la cohérence des chiffres déclarés. À chacune de ces deux étapes de vérification, un répondant peut donc être prié de confirmer ou d'expliquer ses chiffres.

Nos procédés de vérification nous permettent de comparer les valeurs de certaines caractéristiques (nombre de salariés, heures de travail, gains par salarié, etc.) déclarées par la même unité plusieurs mois de suite. Ainsi, il est possible de déceler les grandes variations ou les erreurs, s'il en est. Chaque fois qu'une forte variation apparaît ou que les données semblent incohérentes, l'ordinateur signale le cas, et l'enregistrement est aussitôt corrigé s'il comporte effectivement une erreur.

## Méthode de suivi

Le personnel des bureaux régionaux de Statistique Canada relance par téléphone les unités déclarantes qui tardent à répondre au questionnaire. Cette méthode de suivi s'adresse en priorité (i) aux unités qui font partie de l'échantillon pour la première fois et qui n'ont pas encore répondu; (ii) aux unités qui accusent un retard de deux mois consécutifs; (iii) aux grandes unités non répondantes. Pour déterminer l'ordre de priorité des suivis, on tient compte des taux de réponse et du volume de l'emploi dans les différents groupes industriels.

Lorsque des unités persistent à ne pas répondre même après le suivi, des données leurs sont imputées. Tous les enregistrements dont les données découlent d'une imputation sont soumis aux vérifications mentionnées ci-dessus.

## Imputation

L'imputation de données aux unités non répondantes comprises dans le champ de l'enquête depuis plus d'un mois est basée sur le ratio des variations mensuelles de ces unités. Le ratio de la variation mensuelle d'une caractéristique se calcule à partir des unités qui ont répondu pour le mois courant et le mois précédent, et s'applique aux données du mois précédent de chaque unité non répondante.

Dans le cas des unités non répondantes qui figurent dans l'enquête pour la première fois, l'imputation se fonde sur d'autres sources d'information telles que les prévisions d'emploi de l'unité et les caractéristiques des unités déclarantes du même groupe industriel, de la même province et de la même taille.

## Estimations

L'élément de base qui sert à établir les estimations est l'industrie (code à trois chiffres), la province et la taille. Les estimations plus agrégatives sont obtenues par la sommation des estimations susdites. Pour calculer les moyennes, on estime d'abord les totaux du numérateur et ceux du dénominateur, au

numerator and the denominator at the desired level and then calculating the ratio. Estimates for certain sub-provincial areas are also produced, treating the sub-province as a domain. Coefficients of variation for estimates of some key characteristics at all levels are also produced.

Provision has also been made in the estimation procedure to change the weights of "unusually large" observations occurring in size groups 1, 2 and 3. These observations are termed "outliers" and are judged not to be representative of other units in that size group. The weights of the remaining units are adjusted accordingly.

### Reliability of the estimates

There are two types of errors possible in estimates based on a sample survey: sampling and non-sampling.

**Sampling errors** occur because observations are made only on a sample rather than on the entire universe. Estimates based on a sample differ from the figures that would have been obtained if a complete census had been taken using the same questionnaires, instructions, interviewers and processing techniques. This difference with respect to a particular estimate is called the sampling error of the estimate.

**Non-sampling errors** are errors which are not related to sampling and may occur in a survey operation for many reasons. Non-response, coverage and classification errors, differences in the interpretation of the questions, incorrect information from respondents, mistakes in recording, coding and processing of data are examples of non-sampling errors. It should be noted that non-sampling errors also occur in complete censuses. In the Survey of Employment, Payrolls and Hours, efforts to reduce non-sampling errors include careful design of questionnaires, editing of data, follow-up of and imputation for non-respondents and thorough control of processing operations.

### Indicators of sampling error

The sampling error, as described above, is not known. However, it can be estimated from the sample itself by using a statistical measure called the **standard error** of a survey estimate. When the standard error is expressed as a percent of the estimate, it is known as the relative standard error or coefficient of variation.

Alphabetic symbols of the coefficient of variation are used in this publication (see Tables A to F at the end of this explanatory note) to give an indication of the reliability of the estimates and are based on a 12-month average of the coefficients of variation. The ranges of the coefficients of variation and their corresponding alphabetic indicator are given in the following table.

niveau désiré, puis on en fixe le ratio. Nous produisons aussi des estimations concernant certaines régions infraprovinciales, considérant chacune de ces régions comme un domaine. Enfin, nous calculons des coefficients de variation pour les estimations de certaines caractéristiques clés, à tous les niveaux.

Le procédé d'estimation comporte en outre des mécanismes qui permettent de changer les poids lorsque des observations "exceptionnellement grandes" apparaissent chez les unités des groupes de taille 1, 2 ou 3. Ces observations, dites "aberrantes", ne sont pas représentatives des autres unités du même groupe de taille, de sorte que l'on rajuste les poids des autres unités en conséquence.

### Fiabilité des estimations

En ce qui concerne les estimations basées sur un sondage, il existe deux types d'erreurs possibles, soit les erreurs d'échantillonnage et les erreurs non liées à l'échantillonnage.

Les **erreurs d'échantillonnage** proviennent de ce que les observations se font à partir d'un échantillon au lieu de l'univers complet. Les estimations basées sur un échantillon diffèrent des statistiques que l'on obtiendrait d'un recensement complet effectué au moyen des mêmes questionnaires, des mêmes directives, des mêmes interviewers et des mêmes techniques de traitement. Cette différence, lorsqu'il s'agit d'une estimation particulière, s'appelle erreur d'échantillonnage de l'estimation.

Les **erreurs non dues à l'échantillonnage** ne se rattachent pas à l'échantillon et peuvent se produire tout au long d'une enquête pour plusieurs raisons. Les cas de non-réponse, les anomalies de couverture et de classification, les différences d'interprétation des questions, la communication de renseignements inexacts par les répondants et les fautes d'entrée, de codage et de traitement des données sont autant d'erreurs non attribuables à l'échantillonnage. Il faut noter que des erreurs de ce genre peuvent aussi se produire dans les recensements. Pour l'enquête sur l'emploi, la rémunération et les heures de travail, nous avons tenté d'en réduire le risque par une formulation soignée des questionnaires, par une vérification rigoureuse des chiffres déclarés, par le travail de suivi, par l'imputation de données aux unités non répondantes et par un contrôle attentif des techniques de traitement.

### Indicateurs des erreurs d'échantillonnage

L'erreur d'échantillonnage que nous venons de décrire reste inconnue. On peut cependant l'estimer à partir de l'échantillon, en utilisant une mesure appelée **écart-type** d'une estimation de sondage. Lorsque l'écart-type est exprimé en pourcentage de l'estimation, on l'appelle écart-type relatif ou coefficient de variation.

Dans la présente publication, nous utilisons des symboles littéraux de coefficient de variation (voir tableaux A à F à la fin de cette note explicative), pour indiquer le degré de fiabilité des estimations; cette symbolisation repose sur la moyenne des coefficients de variation de 12 mois. Les intervalles de confiance des coefficients de variation et les symboles correspondants sont précisés dans le tableau suivant.

## ALPHABETIC INDICATORS OF COEFFICIENT OF VARIATION

Alphabetic Indicator	Range of Coefficient of Variation Percent
A	0 - 1.0
B	1.1 - 2.5
C	2.6 - 5.0
D	5.1 - 10.0
E	10.1 - 15.0
F	15.1 - 25.0
G	> 25.0

## INDICATEURS LITTÉRAUX DU COEFFICIENT DE VARIATION

Indicateur littéral	Intervalle de confiance du coefficient de variation en pourcentage
A	0 - 1.0
B	1.1 - 2.5
C	2.6 - 5.0
D	5.1 - 10.0
E	10.1 - 15.0
F	15.1 - 25.0
G	> 25.0

The sample estimate and its standard error (derived from the coefficient of variation) may be used to construct an interval within which the unknown census value is expected to be contained with a prescribed confidence. The particular sample used in this survey is one of a large number of all possible samples of the same size that could have been selected using the same sample design. Estimates derived from the different samples would differ from each other. If intervals from two standard errors below the estimate to two standard errors above the estimate are constructed using each of the above estimates, then approximately 19 out of 20 of the intervals would include the census value. Such an interval is called a 95 percent confidence interval. For example, let the estimate under consideration be the total number of paid employees at Canada level in Construction and say it is 450,000 employees. If the estimate has a reliability indicator A, then assuming that the coefficient of variation of the estimate is 1%, the standard error of the estimate would be 4,500 employees. Therefore, in this case, one can say with 95% confidence that the census value of total paid employees in Construction is included in the interval 441,000 to 459,000 employees.

In general, the estimates of monthly changes are expected to be more reliable than the estimates of levels due to the large overlap of reporting units in the monthly samples and the high correlation between the reported values for two consecutive months.

### Statistical Presentation

#### 1. Data Revision

Each month, statistics for the two latest months are prepared from the survey of Employment, Payrolls and Hours. Data for the most current month are titled **preliminary** estimates and are based on a response rate of around 80%. Estimates are also prepared for the month immediately preceding the most current month; these are known as **revised** estimates and are based on a higher rate of response (approximately 90%).

L'estimation de l'échantillon et son écart-type (établi d'après le coefficient de variation) peuvent servir à construire un intervalle à l'intérieur duquel s'inscrira, sous réserve d'une limite de confiance prédéterminée, la valeur inconnue que l'on obtiendrait par recensement. L'échantillon sur lequel s'appuie notre enquête n'est qu'un des multiples fragments de même taille que nous aurions pu choisir en utilisant le même plan. Les estimations tirées d'autres échantillons du même univers diffèreraient les unes des autres. Si l'on construisait des intervalles allant de deux écarts-types sous l'estimation à deux écarts-types au-dessus de l'estimation, en utilisant chacune des estimations possibles (selon l'échantillon choisi), environ 19 intervalles sur 20 contiendraient alors la valeur que donnerait un recensement. Ce genre d'intervalle se nomme intervalle de confiance à 95%. Prenons par exemple comme estimation le nombre total de salariés de la construction pour l'ensemble du Canada, et supposons que ce nombre soit 450,000. Si l'indicateur de fiabilité de cette estimation est A, et si son coefficient de variation s'établit à 1%, alors l'écart-type de l'estimation sera de 4,500 salariés. Dans ce cas, on peut donc dire avec 95% de confiance que le nombre total de salariés de la construction, obtenu par recensement, se situe dans l'intervalle 441,000 à 459,000 salariés.

En général, on s'attend à ce que les estimations des variations mensuelles soient plus fiables que les estimations de niveaux, par suite de l'ample chevauchement des unités déclarantes au sein des échantillons mensuels, et de la forte corrélation qui existe entre les valeurs déclarées pour deux mois consécutifs.

### Présentation statistique

#### 1. Révision des données

Chaque mois, nous préparons, à l'égard des deux derniers mois, des statistiques tirées de l'enquête sur l'emploi, la rémunération et les heures de travail. Les données du mois le plus récent sont appelées estimations **préliminaires** et se fondent sur un taux de réponse d'environ 80%. Nous établissons également des estimations pour le mois qui précède le mois le plus récent; il s'agit d'estimations **révisées** qui prennent appui sur un taux de réponse plus élevé (environ 90%).

## 2. Data Release

As soon as the estimates become available, selected highly aggregated statistics are released in the Statistics Canada Daily, while detailed data are entered in the Canadian Socio-Economic Information Management System (i.e. CANSIM).

Detailed estimates appear in this report at a later date.

## 3. Rounding

Totals and averages for any level of geographical or industrial aggregation are calculated using unrounded figures and then rounded using the usual procedure adopted by Statistics Canada. Published employment figures are rounded to hundreds. The sum of individually rounded items may not always equal the total.

## 4. Averages

The average weekly earnings (including overtime) is obtained by dividing the total weekly payrolls by the number of employees. It is calculated for the total number of employees, for the hourly-rated employees, for the salaried employees, and for the other types of employees.

The average weekly overtime earnings is derived by dividing the overtime weekly payrolls by the number of employees. It is calculated for the total number of employees, the hourly-rated employees and the salaried employees.

The average hourly earnings (including overtime) is obtained by dividing the total weekly payrolls by the total weekly number of hours (the total weekly number of hours is reported for the hourly-rated employees while, for salaried employees, it is derived by multiplying the average standard workweek hours by the number of salaried employees). It is calculated for the hourly-rated employees and for the salaried employees.

The average hourly overtime earnings is calculated for the hourly-rated employees by dividing the overtime weekly payrolls by the weekly number of overtime hours reported for this group of employees.

The average weekly hours (including overtime) is obtained by dividing the total weekly number of hours by the number of employees. This statistic is calculated for the hourly-rated employees and the salaried employees.

The average weekly overtime hours is derived by dividing the weekly number of overtime hours by the number of employees. This average is calculated for the hourly-rated employees.

## 2. Diffusion des données

Dès que les estimations requises sont disponibles, des statistiques choisies à un niveau d'aggrégation élevé paraissent dans le Quotidien de Statistique Canada, tandis que les chiffres détaillés sont introduits dans le Système canadien d'information socio-économique (CANSIM).

Les estimations détaillées apparaissent dans ce bulletin plus tard.

## 3. Arrondissement

Les totaux et les moyennes des divers niveaux d'agrégation géographique ou industrielle sont calculés au moyen des chiffres bruts, ensuite arrondis conformément à la méthode d'arrondissement habituelle de Statistique Canada. Les nombres publiés concernant l'emploi sont arrondis à la centaine. Par conséquent, il peut arriver que la somme des chiffres arrondis individuellement ne corresponde pas au total.

## 4. Moyennes

On obtient les rémunérations hebdomadaires moyennes (y compris celles du temps supplémentaire) en divisant les rémunérations hebdomadaires totales par le nombre de salariés. Ces moyennes sont calculées à l'égard du nombre total de salariés, de salariés rémunérés à l'heure, d'employés et des autres catégories de salariés.

Pour obtenir les rémunérations hebdomadaires moyennes du temps supplémentaire, on divise les rémunérations hebdomadaires pour le temps supplémentaire par le nombre de salariés. Ces moyennes sont calculées à l'égard du nombre total de salariés, de salariés rémunérés à l'heure et d'employés.

On obtient les gains horaires moyens (y compris la rémunération pour le temps supplémentaire) en divisant les rémunérations hebdomadaires totales par le nombre total hebdomadaire d'heures travaillées (le nombre total d'heures hebdomadaires est celui déclaré pour les salariés rémunérés à l'heure, tandis que dans le cas des employés on l'établit en multipliant la moyenne des heures fournies pendant la semaine normale de travail par le nombre d'employés). Nous calculons cette statistique à l'égard des salariés rémunérés à l'heure et des employés.

Quant au temps supplémentaire, on calcule les gains horaires moyens des salariés rémunérés à l'heure en divisant les rémunérations hebdomadaires pour le temps supplémentaire par le nombre d'heures supplémentaires hebdomadaires déclarées pour ce groupe de salariés.

Pour déterminer les heures hebdomadaires moyennes (y compris les heures supplémentaires) on divise le total des heures hebdomadaires par le nombre de salariés. Cette statistique est établie à l'égard des salariés rémunérés à l'heure ainsi qu'à l'égard des employés.

Pour calculer les heures supplémentaires moyennes hebdomadaires on divise le nombre d'heures supplémentaires hebdomadaires par le nombre de salariés.

The average weekly earnings (excluding overtime) is obtained by dividing the weekly payrolls, which exclude the overtime weekly payrolls, by the number of employees. This estimate is calculated for hourly-rated employees and salaried employees.

## 5. Unpublished Data

A large number of non-confidential detailed industrial and geographic estimates are compiled but not included in this report. Although the reliability of these estimates is lower than the reliability of the published estimates, these data will be available on request on a cost recovery basis.

In addition to the total number of employees for the education industry, data are also available for the teaching and non-teaching staff separately.

## 6. CANSIM

Data published in this report are also available in machine readable form through CANSIM (Canadian Socio-Economic Information Management System).

Tables giving the CANSIM matrix numbers, the CANSIM series numbers and the types of survey estimates are presented at the end of this explanatory text (see Tables I to V) to provide the user with an easy and quick link to the CANSIM system.

Generally speaking, the CANSIM matrix number identifies a type of survey estimates for a particular geographic area, while the CANSIM series number represents an industrial level. Owing to the different types of data aggregations (all units, take-all units, take-some units) and to the large number of survey estimate types (number of employees, average hourly earnings of hourly-rated employees, etc.), the user will have to follow the steps given hereafter to select the proper CANSIM matrix and series numbers.

- a) Determine the type of tabulated information needed (this will define the value of "x" for the CANSIM series number of Table II):
  - i) Aggregation of all survey units has the value 1,
  - ii) Aggregation of take-all units has the value 2 and
  - iii) Aggregation of take-some units has the value 3.
- b) Determine the type of survey estimates required; this will provide the value of "y" for the CANSIM series number. This value is obtained by consulting Table I which lists the 20 types of survey estimates; the number of salaried employees, for example, constitutes type 2.

La moyenne des rémunérations hebdomadaires (temps supplémentaire exclu) s'obtient en divisant les rémunérations hebdomadaires, qui excluent les rémunérations hebdomadaires pour le temps supplémentaire, par le nombre de salariés. Cette estimation est calculée à l'égard des salariés rémunérés à l'heure, de même qu'à l'égard des employés.

## 5. Données non publiées

Nous établissons, aux niveaux industriel et géographique, un grand nombre d'estimations non confidentielles détaillées qui, toutefois, ne figurent pas dans le présent ouvrage. Bien que leur fiabilité soit plus faible que celle des estimations publiées, ces données peuvent être obtenues sur demande sur une base de recouvrement des coûts.

Outre le chiffre total des salariés du domaine de l'éducation, nous pouvons aussi fournir des données distinctes concernant le personnel enseignant et le personnel non enseignant.

## 6. CANSIM

Les données qui apparaissent dans la présente publication sont également disponibles sous une forme ordiolingue dans CANSIM (Système canadien d'information socio-économique).

Les intéressés trouveront à la fin de ces notes explicatives des tableaux indiquant les numéros des matrices CANSIM, les numéros des séries CANSIM et les types d'estimations de l'enquête (voir tableaux I à V). Ces tableaux fournissent à l'utilisateur un moyen d'accès facile et rapide au système CANSIM.

De façon générale, le numéro de matrice CANSIM désigne un type d'estimation de l'enquête pour une région géographique particulière, tandis qu'un numéro de série CANSIM désigne un niveau industriel. En raison de la multiplicité des types d'agrégation (ensemble des unités, unités à tirage complet, unités à tirage partiel) et des nombreux types d'estimations de l'enquête (nombre de salariés, salaires horaires moyens des salariés rémunérés à l'heure, etc.), l'utilisateur devra franchir les étapes suivantes pour choisir les bons numéros de matrice et de série CANSIM.

- a) Déterminer le type désiré de totalisation parmi les cas suivants (cette opération définira la valeur de "x" pour le numéro de série CANSIM au tableau II):
  - i) ensemble des unités de l'enquête: vaut 1,
  - ii) unités à tirage complet: vaut 2 et
  - iii) unités à tirage partiel: vaut 3.
- b) Déterminer le type requis d'estimations de l'enquête; cette opération fixera la valeur de "y" pour le numéro de série CANSIM. On obtient cette valeur en consultant le tableau I, qui contient la liste des 20 types d'estimations de l'enquête; le type "employés", par exemple, a la valeur 2.

- c) Determine the industrial level needed and refer to the Industry Code column of the CANSIM series number Table II to find the rest of the series number (e.g. Industry Code 031 has series number **x.y.1.1.1.1**).
- d) Determine the geographical level required and refer to the CANSIM matrix number tables (Tables III to V) to select the appropriate matrix number.

A specific example would be as follows. The "average weekly overtime earnings of salaried employees" for "all survey units" is needed for the Ontario total manufacturing. The CANSIM series number will be 1.13.1.1.3 according to:

- i) The "x" value of 1 for the "All survey units" aggregation,
- ii) The "y" value of 13 for the type of survey estimates and
- iii) The tail-end of the series number 1.1.3 for the manufacturing Industry Code 101-399.

The CANSIM matrix number will be 8375 because the type of estimates 13 is required for Ontario.

It should be noted that only two types of survey estimates are available for the Census Agglomerations (i.e. estimates 01: total number of employees, and 05: average weekly earnings (including overtime) of all employees), while twenty types of estimates are available for Canada, the provinces and the Census Metropolitan Areas.

For further information on CANSIM call (613) 991-1150 or write CANSIM Division, Statistics Canada, R.H. Coats BLDG., Ottawa, Ontario, K1A 0T6.

## 7. Confidentiality

The information presented in this publication has been reviewed to ensure that the confidentiality of individual responses is respected.

- c) Déterminer le niveau industriel désiré et utiliser la colonne "code des industries" du tableau II des numéros de série CANSIM pour trouver les autres chiffres du numéro de série (par ex. le code d'industrie 031 possède le numéro de série **x.y.1.1.1.1**).
- d) Déterminer le niveau géographique requis et utiliser les tableaux de numéros de matrice CANSIM (Tableaux III à V) pour choisir le numéro de matrice approprié.

Voici un exemple. Supposons que l'on veuille connaître la "rémunération hebdomadaire moyenne du surtemps des employés" de "l'ensemble des unités de l'enquête" pour les manufactures de l'Ontario. Le numéro de série CANSIM sera 1.13.1.1.3, puisque:

- i) la valeur de "x" pour le groupe "ensemble des unités de l'enquête" est 1,
- ii) la valeur de "y" pour le type d'estimation est 13, et
- iii) la fin du numéro de série pour le "code d'industrie" des manufactures 101-399 est 1.1.3.

Le numéro de matrice CANSIM sera 8375, car le type d'estimation 13 s'applique à l'Ontario.

Notons qu'il n'existe que deux types d'estimations au niveau des agglomérations de recensement (i.e. les estimations 01: nombre total des salariés, et 05: salaires hebdomadaires moyens (y compris le surtemps) pour l'ensemble des salariés), alors qu'il y a vingt types d'estimations disponibles aux niveaux du Canada, des provinces et des régions métropolitaines.

Pour de plus amples informations concernant CANSIM, téléphoner à (613) 991-1150 ou écrire à Division CANSIM, Statistique Canada, immeuble R.H. Coats, Ottawa, Ontario, K1A 0T6.

## 7. Confidentialité

Les données du présent bulletin sont vérifiées afin de s'assurer qu'elles respectent le caractère confidentiel des réponses fournies par les entreprises.

TABLE I. Type of Estimates

TABLEAU I. Type d'estimations

Estimates Estimations	Description
1	All employees - Ensemble des salariés
2	Salaried employees - Employés
3	Employees paid by the hour - Salariés rémunérés à l'heure
4	Other employees - Autres salariés
5	Average weekly earnings (including overtime) of all employees - Rémunération hebdomadaire moyenne (incluant le temps supplémentaire) de l'ensemble des salariés
6	Average weekly earnings (including overtime) of salaried employees - Rémunération hebdomadaire moyenne (incluant le temps supplémentaire) des employés
7	Average weekly earnings (including overtime) of employees paid by the hour - Rémunération hebdomadaire moyenne (incluant le temps supplémentaire) des salariés rémunérés à l'heure
8	Average weekly earnings (including overtime) of other employees - Rémunération hebdomadaire moyenne (incluant le temps supplémentaire) des autres salariés
9	Average weekly earnings (excluding overtime) of all employees - Rémunération hebdomadaire moyenne (excluant le temps supplémentaire) de l'ensemble des salariés
10	Average weekly earnings (excluding overtime) of salaried employees - Rémunération hebdomadaire moyenne (excluant le temps supplémentaire) des employés
11	Average weekly earnings (excluding overtime) of employees paid by the hour - Rémunération hebdomadaire moyenne (excluant le temps supplémentaire) des salariés rémunérés à l'heure
12	Average weekly overtime earnings of all employees - Rémunération hebdomadaire moyenne pour travail supplémentaire, ensemble des salariés
13	Average weekly overtime earnings of salaried employees - Rémunération hebdomadaire moyenne pour travail supplémentaire, des employés
14	Average weekly overtime earnings of employees paid by the hour - Rémunération hebdomadaire moyenne pour travail supplémentaire des salariés rémunérés à l'heure
15	Average weekly hours of salaried employees - Heures hebdomadaires moyennes des employés
16	Average weekly hours of employees paid by the hour - Heures hebdomadaires moyennes des salariés rémunérés à l'heure
17	Average weekly overtime hours of employees paid by the hour - Heures supplémentaires hebdomadaires moyennes des salariés rémunérés à l'heure
18	Average hourly earnings of salaried employees - Rémunération horaire moyenne des employés
19	Average hourly earnings (including overtime) of employees paid by the hour - Rémunération horaire moyenne (incluant le temps supplémentaire) des salariés rémunérés à l'heure
20	Average hourly overtime earnings of employees paid by the hour - Rémunération horaire moyenne du travail supplémentaire, des salariés rémunérés à l'heure

## ANNEX 2

### "INDUSTRIAL COMPOSITE" ESTIMATES

For data produced on employment, payrolls, and hours prior to April 1983, there was an aggregate entitled "Industrial Composite". This covered all sectors except agriculture, government, defence, hospitals, schools, religion, household services, and fishing, trapping and hunting; in addition, only firms with 20 or more employees were surveyed. Therefore, neither employment nor average weekly earnings for the Industrial Composite were ever intended to be global measures.

With the beginning of the Survey of Employment, Payrolls and Hours (SEPH) in April 1983, the Industrial Composite classification ceased to have its original justification. The SEPH survey has much more complete coverage than its predecessor, and its aggregates provide much fuller coverage of the economy, both by industry and by size of employer, than did the Industrial Composite. For this reason, it was decided not to continue the Industrial Composite as a regular SEPH output. Users are encouraged to change to the new published data as soon as possible.

It is recognized, however, that in some cases the term "Industrial Composite" has been officially incorporated into formal documents. In these cases, it may require some time to alter the wording of the documents to incorporate the new statistics. To assist in such efforts, a special synthetic series, approximating the old Industrial Composite totals from SEPH data, is produced hereafter.

As a word of warning, because of changes in coverage, survey procedures, question wording and other factors that accompanied the survey revisions in April 1983, it is not possible to exactly reproduce the Industrial Composite. However, research has indicated that it is possible by combining selected subcategories to construct data series in which the average weekly earnings for Canada and provinces normally differ from previous data by one percent or less. These derived totals will be released until December 1985.

## ANNEXE 2

### ESTIMATIONS DE L'"ENSEMBLE DES INDUSTRIES"

Avant avril 1983, nous produisions des données sur l'emploi, la rémunération et les heures pour un regroupement appelé "ensemble des industries". Ce regroupement couvrait tous les secteurs de l'industrie sauf l'agriculture, le gouvernement, la défense, les hôpitaux, les écoles, les organismes religieux, les ménages privés, la pêche, le piégeage et la chasse; de plus, seules les firmes ayant 20 salariés ou plus étaient enquêtées. Ainsi, l'emploi et la rémunération hebdomadaire moyenne pour ce regroupement n'ont jamais constitué des mesures globales.

Avec les débuts de l'Enquête sur l'emploi, la rémunération et les heures de travail (EERH), le regroupement "ensemble des industries" n'a plus de raison d'être. L'enquête EERH couvre beaucoup plus de secteurs que l'enquête qu'elle remplace. De plus, ses regroupements représentent une couverture beaucoup plus complète de l'économie, tant par industrie que par taille d'employeur. Nous avons donc décidé de ne pas publier l'"ensemble des industries" dans le cadre de l'enquête EERH. Pour cette raison, nous recommandons aux utilisateurs de se tourner vers les nouvelles données publiées aussitôt que possible.

Nous reconnaissons que, dans certains cas, le terme "ensemble des industries" soit inclus officiellement dans le texte de documents formels. Il peut arriver que dans ces situations le changement de formulation pour s'accorder aux nouvelles statistiques demande un certain temps. Pour venir en aide aux utilisateurs pendant ce temps, nous publions ci-après des séries spéciales qui sont des approximations des anciennes séries de l'"ensemble des industries", calculées à partir des données de l'EERH.

Il ne faut pas oublier qu'il s'agit d'approximation. En effet, il est impossible de reproduire exactement l'"ensemble des industries" à cause des changements touchant la couverture de l'enquête, les règles de l'enquête, la formulation des questions et d'autres facteurs accompagnant la révision de l'enquête en avril 1983. Cependant, des recherches ont montré qu'il était possible, en combinant certaines sous-catégories, de construire des séries de données pour lesquelles la rémunération hebdomadaire moyenne pour le Canada et les provinces ne différerait des données réelles que de 1% ou moins. Nous publierons ces séries dérivées jusqu'au mois d'enquête: décembre 1985.

## SELECTED PUBLICATIONS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

### Catalogue

#### Monthly

72-002 Employment, Earnings and Hours. Bil.

Industry and area data on industrial employment, average weekly earnings average weekly hours and average hourly earnings.

72-008 Estimates of Employees by Province and Industry. Bil.

Monthly estimates of total employment in non-agricultural industries for Canada and the provinces, (This publication is terminated with March 1983 data).

#### Quarterly

72-005 Estimates of Labour Income. Bil.

Monthly estimates of wages and salaries and supplementary labour income on unadjusted and seasonally adjusted basis by industry for Canada and the provinces with annual totals.

#### Occasional

72-516 Estimates of Employees by Province and Industry, 1961-1976. Bil.

Monthly estimates of total employees by industry and province in the non-agricultural sector - both seasonally adjusted and unadjusted series, 1961-1976.

72-517 Employment, Earnings and Hours, 1978. Bil.

Employment, earnings and hours statistics for the months of January to April 1978 inclusively which supersede data previously published in the monthly publication 72-002.

## CHOIX DE PUBLICATIONS

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

### Catalogue

#### Mensuel

72-002 Emploi, gains et durée du travail. Bil.

Données par industrie et par région sur l'emploi, les gains hebdomadaires moyens du travail, les gains horaires moyens et les heures hebdomadaires moyennes.

72-008 Estimations du nombre de salariés par province et par industrie. Bil.

Estimations mensuelles de l'ensemble des effectifs dans les industries non agricoles pour le Canada et les provinces. (Cette publication se termine avec les estimations de mars 1983).

#### Trimestriel

72-005 Estimations du revenu du travail. Bil.

Estimations mensuelles des salaires, des traitements et du revenu supplémentaire du travail, désaisonnalisées et non désaisonnalisées, par branche d'activité économique pour le Canada et les provinces, de même que des totaux annuels.

#### Hors série

72-516 Estimations du nombre de salariés par province et par industrie, 1961-1976. Bil.

Estimations mensuelles désaisonnalisées et non désaisonnalisées du nombre total de salariés par industrie et par province pour l'ensemble des industries non agricoles de 1961-1976.

72-517 Emploi, gains et durée du travail, 1978. Bil.

Chiffres révisés de l'emploi, des gains et de la durée du travail pour les mois de janvier à avril 1978 inclusivement. Ces données remplacent celles qui avaient été précédemment publiées dans les éditions mensuelles de la publication numéro 72-002 au catalogue.
